*Responding to Disasters* Corporation for National Service (U.S.),1999      Response to Disaster Henry W. Fischer,1998 A third generation disaster researcher challenges what he sees as a myth perpetrated since the genesis of the field in the 1950s that faced with an emergency most people will panic and flee become helplessly impassive or loot He sets out the empirical evidence in statistics and case studies He agrees with colleagues that the mass media are a primary factor in spreading the myth but goes beyond them to address what emergency agencies can do despite it Graduate and undergraduate students interested in social response to disasters the disaster research community and people responsible for responding to disaster might find the treatment interesting Annotation copyrighted by Book News Inc Portland OR

**Response to Disaster** Henry W. Fischer III,2008-08-21 Response to Disaster combines the original research of author Henry W Fischer with the literature used today to describe behavioral and organizational challenges commonly experienced before during and after disasters Actual problems are presented and compared to those often misperceived to occur know as disaster mythology Fisher examines case studies conducted during the post impact and long term recovery periods of major and minor disasters worldwide He asserts that the role of the mass media assists in eliciting needed help with an effective response but also perpetuates disaster mythology Fisher presents striking comparisons between the perception of disaster in the eyes of the general public the actual situations emergency responders face and the way mass media reporters broadcast information Additionally the problems encountered by emergency response organizations are compared and contrasted with general public and media perceptions of disaster response Fisher presents the response to September 11 2001 the south Asian tsunami and hurricane Katrina in this comprehensive third edition      What Disaster Response Management Can

Human System Responses to Disaster Thomas E. Drabek,2012-12-06 This series is dedicated to serving the growing community of scholars and practitioners concerned with the principles and applications of environmental management Each volume is a thorough treatment of a specific topic of importance for proper management practices A fundamental objective of these books is to help the reader discern and implement man's stewardship of our environment and the world's renewable resources For we must strive to understand the relationship between man and nature act to bring harmony to it and nurture an environment that is both stable and productive These objectives have often eluded us because the pursuit of other individual and societal goals has diverted us from a course of living in balance with the environment At times therefore the environmental manager may have to exert restrictive control which is usually best applied to man not nature Attempts to alter or harness nature have often failed or backfired as exemplified by the results of imprudent use of herbicides fertilizers water and other agents Each book in this series will shed light on the fundamental and applied aspects of environmental management It is hoped that each will help solve a practical and serious environmental problem Robert S DeSanto East Lyme Connecticut Acknowledgments
