Response To Disasters Psychosocial Community And Ecological Approaches:

Response to Disaster Richard Gist, Bernard Lubin, 1999 Psychological service after cataclysmic life events is a prominent component of social response This book reconciles the technical theoretical and applied interests represented in populations and helps define directions of their interaction *Response to Disaster* Richard Gist, Bernard Lubin, 2013-11-12 Psychological service in the wake of cataclysmic life events has emerged as a prominent and visible component of social response This has generated a bandwagon of potential service providers service approaches and service venues Where once help was scarce it has become plentiful enough to engender its own set of conflicts and contradictions along with its intended solace and aid *Response to Disaster* reconciles the technical theoretical and applied interests represented in these various populations and provides a contemporary treatment that can help define the directions of their increasing interaction

Psychosocial Capacity Building in Response to Disasters Joshua L. Miller, 2012-02-28 Disaster responders treat more than just the immediate emotional and psychological trauma of victims they empower individuals and families to heal themselves long into a disaster s aftermath This requires helping survivors to rebuild their ability to meet their emotional and psychological needs not only for themselves but also for others which necessitates a careful consideration of survivors social economic and political realities as their communities heal and recover This comprehensive book integrates Western mental health approaches and international models of psychosocial capacity building within a social ecology framework providing practitioners and volunteers with a blueprint for individual family group and community interventions Joshua L Miller focuses on a range of disasters at local regional national and international levels Global case studies explore the social psychological economic political and cultural issues affecting various reactions to disaster and illustrate the importance of drawing on local cultural practices to promote empowerment and resiliency Miller encourages developing people s capacity to direct their own recovery using a social ecology framework to conceptualize disasters and their consequences He also considers sources of vulnerability and how to support individual family and community resiliency adapt and implement traditional disaster mental health interventions in different contexts use groups and activities to facilitate recovery as part of a larger strategy of psychosocial capacity building and foster collective grieving and memorializing Miller s text examines the unique dynamics of intergroup conflict and the relationship between psychosocial healing social justice and peace and reconciliation Each chapter ends with a mindfulness exercise and a section reviews practitioner self care

of their increasing interaction **Handbook of Social Work Practice with Vulnerable and Resilient Populations** Alex Gitterman, 2014-05-06 When community and family support systems are weak or unavailable and when internal resources fail populations that struggle with chronic persistent acute and or unexpected problems become vulnerable to physical cognitive emotional and social deterioration Yet despite numerous risk factors a large number of vulnerable people do live happy and productive lives This best selling handbook examines not only risk and vulnerability factors in disadvantaged populations but also resilience and protective strategies for managing and overcoming adversity This third edition reflects new demographic data research findings and theoretical developments and accounts for changing economic and political realities including immigration and health care policy reforms Contributors have expanded their essays to include practice with individuals families and groups and new chapters consider working with military members and their families victims and survivors of terrorism and torture bullied children and young men of color Studies of the Holocaust Roberta R Greene, 2013-10-18 It has been more than sixty years since the end of World War II and the liberation of the survivors of the Holocaust Since then many rich personal and historical accounts have been written of the horrific events of those times Mental health workers have strived to give survivors solace for their loss and help them return to a meaningful life Meanwhile scholars continue to ponder the inexplicable facts of genocide Yet Studies of the Holocaust Lessons in Survivorship continues to be timely Based on more than 100 interviews in nine U S locations the book offers a powerful view of survivors hope determination and resilience Study questions elicited survival strategies and revealed how following the war survivors overcame the horrors of the Holocaust formed families built careers and gave to their communities Survivor quotes taken from these interviews illuminate how the survivors maintained competence into old age While memories of pain persist accomplishments are acknowledged and provide lessons for students of human development mental health practitioners and the general public This book was previously published as a special issue of Journal of Human Behaviour and the Social Environment The Developmental Psychopathology of Anxiety Michael W. Vasey, 2001 In The Development Psychopathology of Anxiety the editors have brought together many of the field s most respected and innovative researchers and challenged them to take a fresh look at the major factors that appear to contribute to the etiology and maintenance of anxiety disorders in childhood and throughout the life span The result is a series of creative chapters that will stimulate further theoretical and empirical efforts regarding these important issues and which will be of interest to researchers and clinicians alike Jacket Trauma, Psychopathology, and Violence Cathy Spatz Widom, 2012-06-14 Trauma Psychopathology and Violence Causes Correlates or Consequences critically examines correlates consequences and potential causal relationships involving trauma psychopathology and violence The authors address methodological and theoretical challenges to understanding the interrelationships among trauma psychopathology and violence from the perspective of their own research fields Chapters focus on different types of traumas traumas occurring at different developmental stages and in different contexts and the

contributions of biological and genetic factors in understanding psychopathology and violence Each of the chapters offers recommendations for needed research The book is divided into six topical areas 1 Setting the context 2 Biological and genetic factors in understanding trauma psychopathology and violence 3 Trauma in childhood and risk of psychopathology and violence 4 Culture and community context in understanding trauma psychopathology and violence 5 Responses to disasters and terrorism and 6 Trauma psychopathology and violence in the military The third volume in the American Psychopathological Association series Trauma Psychopathology and Violence is a much needed addition to the scholarship of the mental health consequences of violence and trauma Toxic Turmoil Johan M. Havenaar, Julie G. Cwikel, Evelyn J. Bromet, 2012-12-06 When an accident involves many people and when its consequences are many and serious we speak of a disaster Disasters have the same causal factors as accidents they differ from accidents by the gravity of consequences not by causes The action of a single individual may result in thousands of deaths and huge financial losses The metal fatigue of a screw may by a chain of events cause an explosion killing hundreds or lead to a break in a dam and a devastating flood The fact that minor and unpredictable acts can lead to disasters is important because it allows us to predict that the years to come will bring with them more disasters with ever more severe consequences The density of human populations is growing By the year 2025 some four fifths of the world's population will be living in urban settings An explosion or a gas leak in a densely populated area will cause incomparably more damage than a similar event in a rural area Modern technology is immensely powerful and its power is continuing to grow and can be used in a disastrous manner Aggression is just as possible now as it was in the past but the tools of aggression are vastly more dangerous than ever before This book edited by Johan M Havenaar Julie G Cwikel and Evelyn J Bromet is therefore very timely Emergency Policy Allan McConnell, 2017-03-02 This volume of leading scholarly articles addresses the international dynamics of emergency policy and practice In a world of increasing technological economic and political interdependency it is no longer feasible for states to ignore the pervasive influence of globalisation The crises wrought by industrial disasters catastrophic weather events pandemics financial implosion and cyber intrusion now transcend and challenge national interests with increasing frequency The case studies collected here explore these global dimensions of crisis and the state through the lenses of planning and prevention acute responses recovery and reconstruction and learning about crisis This collection is essential reading for academics policy officials and practitioners with an interest in emergency management risk management and issues of national global security In original introductory and concluding chapters to the volume Legrand and McConnell provide a critical perspective on the challenges that globalisation presents to policymakers under crisis conditions and signposts some of the emerging challenges to the state and international community Large-Scale Evacuation Michael K. Lindell, Pamela Murray-Tuite, Brian Wolshon, Earl J. Baker, 2018-12-07 Large Scale Evacuation introduces the reader to the steps involved in evacuation modelling for towns and cities from understanding the hazards that can require large scale evacuations through

understanding how local officials decide to issue evacuation advisories and households decide whether to comply to transportation simulation and traffic management strategies The author team has been recognized internationally for their research and consulting experience in the field of evacuations Collectively they have 125 years of experience in evacuation including more than 140 projects for federal and state agencies The text explains how to model evacuations that use the road transportation network by combining perspectives from social scientists and transportation engineers fields that have commonly approached evacuation modelling from distinctly different perspectives In doing so it offers a step by step guide through the key questions needed to model an evacuation and its impacts to the evacuation route system as well as evacuation management strategies for influencing demand and expanding capacity The authors also demonstrate how to simulate the resulting traffic and evacuation management strategies that can be used to facilitate evacuee movement and reduce unnecessary demand Case studies which identify key points to analyze in an evacuation plan discuss evacuation termination and re entry and highlight challenges that someone developing an evacuation plan or model should expect are also included This textbook will be of interest to researchers practitioners and advanced students

Creating Katrina, Rebuilding Resilience Michael J. Zakour, Nancy Mock, Paul Kadetz, 2017-11-13 Creating Katrina Rebuilding Resilience Lessons from New Orleans on Vulnerability and Resiliency presents a unique integrative understanding of Hurricane Katrina in the New Orleans area and the progression to disaster vulnerability as well as resilience pathways The book integrates the understanding of vulnerability and resiliency by examining the relationships among these two concepts and theories The disaster knowledge of diverse disciplines and professions is brought together in this book with authors from social work public health community organizing sociology political science public administration psychology anthropology geography and the study of religion The editors offer both expert and an insider perspectives on Katrina because they have lived in New Orleans and experienced Katrina and the recovery An improved understanding of the recovery and reconstruction phases of disaster is also presented and these disaster stages have been the least examined in the disaster and emergency management literature Integrates multiple disciplines to study the long term recovery of the worst non terrorist disaster in U S history Provides a local perspective with at least one co contributor for each chapter living in New Orleans Examines vulnerability and resilience theory and application

Healing Trauma Kitty K. Wu, Catherine S.

Tang, Eugenie Y. Leung, 2011-04-01 This is the first book written on clinical research and work related to the development of applied trauma psychology in Hong Kong. Contributed by numerous reputable researchers and clinicians, the book covers the latest research on and practice in assessment, psychological sequel, including psychological distress and growth of traumatic experience, evidence-based clinical intervention and rehabilitation services for people affected by various traumatic stresses. Discussed in detail are interpersonal trauma like child sexual abuse and family violence, health and medical trauma such as infectious disease and the pain related to end of life, mass trauma and disaster, including community psychological support programme developed in Hong Kong and Sichuan, as well as the rationale for mainstreaming trauma training in university education. This book serves to strengthen the link between research and practice and between academic work and community awareness. It is a guidebook for professionals serving the traumatized, academics dedicated to research and development of trauma psychology, students learning and educators passing on the existing knowledge and experience accumulated for healing trauma.

Treating Victims of Mass Disaster and Terrorism Jennifer Housley, Larry E Beutler, 2007-01-01 The mental health effects of disasters and terror events can be severe and are most effectively characterized as differing stress reactions with psychological consequences. Empirical studies show that addressing these consequences requires a staged approach to care. This volume, written by leading experts, provides professionals with practical, evidence-based guidance on diagnosis and treatment following disaster and terrorist events and does so in a uniquely reader-friendly manner. It is both a compact how-to reference for use by professional clinicians as well as an ideal educational resource for students and professionals and for practice-oriented continuing education. The unique feature of the book is that it outlines a staged approach for post-disaster mental health care based on empirically supported principles of treatments that work. Practical and reader-friendly, it is a compact and easy-to-follow guide covering all aspects that are relevant in real life.

Postcolonial Disaster Pallavi Rastogi, 2020-04-15 Postcolonial Disaster studies literary fiction about crises of epic proportions in contemporary South Asia and Southern Africa: the oceanic disaster in Sri Lanka, the economic disaster in Zimbabwe, the medical disaster in South Africa and Botswana, and the geopolitical disaster in India and Pakistan. Pallavi Rastogi argues that postcolonial fiction about catastrophe is underpinned by a Disaster Unconscious, a buried but mobile agenda that forces disastrous events to narrate themselves. She writes that in disaster fiction, a literary Story and its real-life Event are in constant dialectic tension. In recent disasters, Story and Event are tied together as the urgency to circulate information and rebuild in the aftermath of the disaster dictates the flow of the narrative. As the Story acquires temporal distance from the Event, such as the seventy-three years since the partition of India in 1947, it plays more with form and theme to expand beyond a tale about an all-consuming tragedy. Story and Event are in a constant dance with each other, and the Disaster Unconscious plays the tune to which they move. Rastogi creates a narratology for postcolonial disaster fiction and brings concepts from Disaster Studies into the realm of literary analysis.

Promoting the Psychosocial Well

Being of Children Following War and Terrorism M.J. Friedman,A. Mikus-Kos,2005-11-15 This book aims to promote the psychosocial well being of children following war and terrorism Experts from the former Yugoslavia Israel Palestine NATO countries and elsewhere have contributed chapters detailing conceptual models and practical examples of community based interventions for children Some authors are experienced experts with extensive experience in providing community based interventions for children during post war reconstruction Others have scientific experience conducting either research or program evaluation for such interventions A third group of participants has experience in both the provision and evaluation of psychosocial services to children These different perspectives are easy to identify from one chapter to the next and provide a creative tension regarding competing approaches to conceptualizing and implementing the most effective interventions It is clear that such alternative views are complementary rather than contradictory The purpose of this book therefore is to show how community based psychosocial approaches can benefit from a thoughtful synthesis of both experiential and empirical strategies that link individual mental health psychosocial well being with the health and stability of the community

In the Line of Fire Cheryl Regehr,Ted Bober,2005 In the wake of disaster emergency responders are first on the scene and last to leave They put concern for the lives of others over concern for their own lives and work tirelessly to recover the bodies of the missing Their heroic actions save lives provide comfort to and care for the wounded and inspire onlookers but at what cost to themselves We now know that rescue workers who are exposed to mutilated bodies mass destruction multiple casualties and life threatening situations may become the hidden victims of disaster The traumatic consequences of exposure can profoundly impact emergency responders radiate to their families and permeate the emergency organization This much needed new book based on the authors original research and clinical experience describes the consequences of trauma exposure on police officers fire fighters and paramedics Weaving data collected in large scale quantitative studies with the personal stories of responders shared in qualitative interviews this much needed account explores the personal organizational and societal factors that can ameliorate or exacerbate traumatic response Stress theory organizational theory crisis theory and trauma theory provide a framework for understanding trauma responses and guiding intervention strategies Using an ecological perspective the authors explore interventions spanning prevention disaster response and follow up on individual family group organizational and community levels They provide specific suggestions for planning intervention programs developing trauma response teams training emergency service responders and mental health professionals and evaluating the effectiveness of services provided Disaster whether large scale or small underscores our ongoing vulnerability and the crucial need for response plans that address the health and well being of those who confront disaster on a daily basis In the Line of Fire speaks directly to these emergency response workers as well as to the mental health professionals who provide them with services the administrators who support their efforts and the family members who wonder if their loved one will return home safely from work tonight
