Biological Anthropology and Ethics Trudy R. Turner,2012-02-01 Biological anthropologists face an array of ethical issues as they engage in fieldwork around the world In this volume human biologists geneticists paleontologists and primatologists confront their involvement with and obligations to their research subjects their discipline society and the environment Those working with human populations explore such issues as who speaks for a group community consultation and group consent the relationship between expatriate communities and the community of origin and disclosing the identity of both individuals and communities Those working with skeletal remains discuss issues that include access to and ownership of fossil material Primatologists are concerned about the well being of their subjects in laboratory and captive situations and must address yet another set of issues regarding endangered animal populations and conservation in field situations The first comprehensive account of the ethical issues facing biological anthropologists today Biological Anthropology and Ethics opens the door for discussions of ethical issues in professional life

Applied Ethics in Animal Research John P. Gluck,Tony DiPasquale,F. Barbara Orlans,2002 This volume is a collection of chapters all contributed by individuals who have presented their ideas at conferences and who take moderate stands with the use of animals in research Specifically the chapters bear of the issues of notions of the moral standings of animals history of the methods of argumentation knowledge of the animal

mind nature and value of regulatory structures how respect for animals can be converted from theory to action in the laboratory The chapters have been tempered by open discussion with individuals with different opinions and not audiences of true believers It is the hope of all that careful consideration of the positions in these chapters will leave reader with a deepened understanding not necessarily a hardened position **In the Name of Science** F. Barbara Orlans,1993-07-08

Few arguments in biomedical experimentation have stirred such heated debate in recent years as those raised by animal research In this comprehensive analysis of the social political and ethical conflicts surrounding the use of animals in scientific experiments Barbara Orlans judges both ends of the spectrum in this debate unconditional approval or rejection of animal experimentation to be untenable Instead of arguing for either view she thoughtfully explores the ground between the extremes and convincingly makes the case for public policy reforms that serve to improve the welfare of laboratory animals without jeopardizing scientific endeavor This book presents controversial issues in a balanced manner based on careful historical analysis and original research Different mechanisms of oversight for animal experiments are compared and those that have worked well are identified This compelling work will be of interest to biomedical scientists ethicists animal welfare advocates and other readers concerned with this critical issue *Ethics and Science* Adam Briggie,Carl

Mitcham,2012-10-25 This book explores ethical issues at the interfaces of science policy religion and technology cultivating the skills for critical analysis
