Environmental Policy in the EU Andrew Jordan, 2012-04-27 This second and fully revised edition brings together some of the most influential work on the theory and practice of contemporary EU environmental policy Comprising five comprehensive parts it includes in depth case studies of contemporary policy issues such as climate change genetically modified organisms and trans Atlantic relations as well as an assessment of how well the EU is responding to new challenges such as enlargement environmental policy integration and sustainability The book s aim is to look forward and ask whether the EU is prepared or even able to respond to the new governance challenges posed by the perceived need to use new policy instruments and processes to mainstream environmental thinking in all EU policy sectors

Comparative Environmental Politics Paul F. Steinberg, Stacy D. Vandever, 2012-02-17 Combining the theoretical tools of comparative politics with the substantive concerns of

environmental policy experts explore responses to environmental problems across nations and political systems How do different societies respond politically to environmental problems around the globe Answering this question requires systematic cross national comparisons of political institutions regulatory styles and state society relations The field of comparative environmental politics approaches this task by bringing the theoretical tools of comparative politics to bear on the substantive concerns of environmental policy This book outlines a comparative environmental politics framework and applies it to concrete real world problems of politics and environmental management After a comprehensive review of the literature exploring domestic environmental politics around the world the book provides a sample of major currents within the field showing how environmental politics intersects with such topics as the greening of the state the rise of social movements and green parties European Union expansion corporate social responsibility federalism political instability management of local commons and policymaking under democratic and authoritarian regimes It offers fresh insights into environmental problems ranging from climate change to water scarcity and the disappearance of tropical forests and it examines actions by state and nonstate actors at levels from the local to the continental The book will help scholars and policymakers make sense of how environmental issues and politics are connected around the globe and is ideal for use in upper level undergraduate and graduate courses

Technology and the Environment in State-Socialist Hungary

Viktor Pál, 2017-09-15 This book explains how and why the state socialist regime in Hungary used technology and propaganda to foster industrialization and the conservation of natural resources simultaneously Further this book explains why this process was ultimately a failure By exploring the environmental pre history of communist Hungary before analyzing the economic development of the K d r regime P l investigates how economic and environmental policies and technology transfer were negotiated between the official communist ideology and the global economic reality of capitalist markets P l argues that the modernization project of the K d r regime 1956 1990 facilitated ecological consciousness at both an individual and societal level which provoked great social unrest when positive environmental impact was not achieved Today global issues of climate change urban pollution resource depletion and overpopulation transcend political systems but economic and environmental discourses varied greatly in the twentieth century This volume is important reading for all those interested in economic and environmental history as well as political science

EU Enlargement and the Environment

JoAnn Carmin, Stacy D. VanDeveer, 2023-05-31 This volume focuses attention on key environmental and institutional changes associated with eastern expansion of the European Union assessing and challenging prevailing views about the outcomes and processes of this historic development Looking at four central themes capacity changes and limitations the EU s mixed messages and conflicting priorities non state actor roles and developments and the exchange of ideas and information the volume shows that enlargement will change the EU not just make it bigger and that EU officials and programs are improving aspects of environmental policy in CEE countries even as they are making others less sustainable This book was previously

published as a special issue of the journal Environmental Politics The Economics of Transition Ichiro Iwasaki, 2020-04-28
In the last three decades since the fall of the Berlin Wall there has been a vast amount of study looking at transforming the planned economy to a market economy from both theoretical and empirical aspects This book provides an overview and insight into transition economies in the recent decades and looks at key economics topics from the so called transition strategy debate to environmental reform The book also includes an analytical review and meta analysis of the existing literature By integrating theoretical discussions and synthesizing empirical findings in a systematic manner this book may help to enlighten the debate on the timing speed and policy sequence of economic transition The book will particularly appeal to researchers policy makers other practitioners and under and post graduate students who are interested in transition economies in Eastern Europe the former Soviet Union Southeast Asia and China It aims to be read as an advanced reader

The Environment and Sustainable Development in the New Central Europe Zbigniew Bochniarz, Gary B. Cohen, 2007-12-01 With the enlargement of the European Union the accession countries are coming under pressure to develop and meet EU standards for environmental protection and sustainable development In this ongoing process global economic liberalization regulatory policy conservation and lifestyle issues are all involved and creative solutions will have to be found Historians geographers economists ecologists business management experts public policy specialists and community organizers have come together in this volume and examine for the first time environmental issues ranging from national and regional policy and macroeconomics to local studies in community regeneration The evidence suggests that far from being mere passive recipients of instruction and assistance from outside the people of Central and East Central Europe have been engaged actively in working out solutions to these problems Several promising cases illustrate opportunities to overcome crisis situations and offer examples of good practices while others pose warnings The experiences of these countries in wrestling with issues of sustainability continue to be of importance to policy development within the EU and may serve also as examples for both developed and developing countries worldwide Gary Bryner, *The Historical Dictionary of Environmentalism* strategically skips across issues concepts time organizations and cultures not with any pretense of producing a definitive dictionary but rather with the aim of producing an inclusive wide ranging and global history of environmentalism This is done through a chronology a list of acronyms and abbreviations an introductory essay and over 300 cross referenced dictionary entries *The A to Z of Environmentalism* Peter Dauvergne, 2009-09-02 Environmentalism involves hundreds of international environmental groups thousands of national groups and tens of thousands of local ones It also includes hundreds of international agreements hundreds of national environmental agencies and countless environmental sections in other organizations from those in multinational corporations to ones in regional and international organizations Such environmental concepts as sustainable development the precautionary principle corporate social responsibility and eco labeling percolate from all of these sources Every year new ideas refinements policies institutions

markets and problems continue to enter into environmental debates and discourses making it nearly impossible to keep abreast of the changes constantly taking place

The A to Z of Environmentalism is a paperback edition of the **Historical Dictionary of Environmentalism**. It strategically skips across issues, concepts, time, organizations, and cultures, not with any pretense of producing a definitive dictionary but rather with the aim of producing an inclusive, wide-ranging, and global history of environmentalism. This goal is accomplished through a chronology, an introductory essay, and over 300 cross-referenced dictionary entries.

Historical Dictionary of Environmentalism Peter Dauvergne, 2016-09-09

To capture the diversity within environmentalism, this dictionary takes a global tack with a focus on ideas, events, institutions, initiatives, and green movements since the 1960s. It strives to avoid a common error in many histories of environmentalism: to exaggerate the input of the wealthy countries of Europe and North America and understate the influence of Africa, Asia, South and Central America, and the Polar Regions. It aims as well for a more comprehensive analysis than most histories of the modern environmental movement, understanding environmentalism as emerging not only from grassroots and formal nongovernmental associations but also from corporate, governmental, and intergovernmental organizations and initiatives. This assumes the ideas and energy infusing environmentalism with political purpose arise from hundreds of thousands of sources, from corporate boardrooms to bureaucratic policies to international negotiations to activists. Thus, environmentalists are not only indigenous people blocking a logging road, Greenpeace activists protesting a seal hunt, or green candidates contesting an election; an equal or larger number of environmentalists are working within the Japanese bureaucracy to implement environmental policies, within the World Bank to assess the environmental impacts of loans, within Wal-Mart to green its purchasing practices, or within intergovernmental forums to negotiate international environmental agreements. This second edition of **Historical Dictionary of Environmentalism** contains a chronology, an introduction, and an extensive bibliography. The dictionary section has over 300 cross-referenced entries on important events, issues, organizations, ideas, and people shaping the direction of environmentalism worldwide. This book is an excellent access point for students, researchers, and anyone wanting to know more about environmentalism.

The A to Z of the Green Movement Miranda Schreurs, Elim Papadakis, 2009-09-21

Human beings have been concerned about nature and their place in it for millennia. Disquiet about the consequences of human action on the natural environment date back to the ancient Greeks and Romans. The efforts of the green movement can be traced back to the 19th century. In this period, individuals, groups, and organizations began campaigning for the conservation and preservation of natural areas and the protection of wildlife species. Efforts to combat pollution also began. It was not until the 1960s, however, that the green movement in its more modern incarnation emerged. The green movements that arose at this time maintained the concerns with conservation, preservation, and industrial pollution held by earlier generations but added to their agenda new issues including justice, equality, participatory democracy, and sustainability. **The A to Z of the Green Movement** provides a detailed and comprehensive overview of green parties and

movements green issues and green concepts This is done through a chronology an introductory essay a bibliography and hundreds of cross referenced dictionary entries on countries in the world where green parties or proto parties have formed green movement organizations major international environmental conferences and green concepts This useful reference will be greatly valued by students academics journalists and policymakers alike *Historical Dictionary of the Green Movement* Miranda Schreurs,Elim Papadakis,2020-02-26 There are very serious environmental problems facing the planet Biodiversity loss has reached unprecedented levels Climate change is progressing so rapidly that within this century we are likely to see substantial sea level rise There has been dramatic loss of tropical rainforests Plastic pollution is killing wildlife and polluting our oceans Various movements old and new are addressing these green issues Civil society activism has taken on new strategies with the emergence of new technologies and global networks of green activists have formed A new generation of green activists are emerging and boldly criticizing the status quo At the same time in some parts of the world green movements that looked like they were beginning to gain a political foothold or were even doing quite well are in retreat The reasons are complex Some suffer from lack of funding and hostile political and legal environments Others are being attacked by populist politicians who see green activism as a threat The second edition of *Historical Dictionary of the Green Movement* contains a chronology an introduction and an extensive bibliography The dictionary section has over 300 cross referenced on green movements green politics green trends and major environmental agreements and events This book is an excellent resource for students researchers and anyone wanting to know more about the green movement *Climate Policy in Denmark, Germany, Estonia and Poland* Franziska Ehnert,2019 By opening a new dialogue between scholars of public policy and those of public administration *Climate Policy in Denmark Germany Estonia and Poland* offers a timely contribution to climate policy analysis This innovative book explores how and why policies are changed or continued by employing in depth studies from a diverse range of EU countries Analytical and accessible this explorative book will be of value to scholars and students of climate policy public policy and public administration as well as practitioners and policy makers

Understanding Environmental Policy Convergence Helge Jörgens,Andrea Lenschow,Duncan Liefferink,2014-01-09 Over recent decades national environmental policies have converged This book analyses the international and domestic driving forces behind this process *Green Activism in Post-Socialist Europe and the Former Soviet Union* Adam Fagan,JoAnn Carmin,2014-06-11 Green activism played a critical role in the downfall of Soviet style communism in Eastern Europe at the end of the 1980s After the revolutions environmentalists were expected to exert influence within the new democracies and to form the bedrock of the new civil societies that were predicted to flourish across the region the prospect of EU membership provided activist networks with even greater optimism about their political opportunities Two decades later what has been the impact of political and economic liberalisation on environmental campaigners and policy advocates Has access to elites increased with democratisation and Europeanization To what extent does the realm of environmental

politics within individual states and across the region continue to represent an optic on change and continuity Through country case studies and comparative analysis of national movements this edited volume addresses each of these questions and provides a different perspective of green politics in the region This book was previously published as a special issue of Environmental Politics

The Oxford Handbook of the Cold War Richard H. Immerman, Petra Goedde, 2013-01-31 The Oxford Handbook of the Cold War offers a broad reassessment of the period war based on new conceptual frameworks developed in the field of international history Nearing the 25th anniversary of its end the cold war now emerges as a distinct period in twentieth century history yet one which should be evaluated within the broader context of global political economic social and cultural developments The editors have brought together leading scholars in cold war history to offer a new assessment of the state of the field and identify fundamental questions for future research The individual chapters in this volume evaluate both the extent and the limits of the cold war s reach in world history They call into question orthodox ways of ordering the chronology of the cold war and also present new insights into the global dimension of the conflict Even though each essay offers a unique perspective together they show the interconnectedness between cold war and national and transnational developments including long standing conflicts that preceded the cold war and persisted after its end or global transformations in areas such as human rights or economic and cultural globalization Because of its broad mandate the volume is structured not along conventional chronological lines but thematically offering essays on conceptual frameworks regional perspectives cold war instruments and cold war challenges The result is a rich and diverse accounting of the ways in which the cold war should be positioned within the broader context of world history

Contemporary Environmentalism in the Baltic States David Galbreath, 2013-10-18 This book examines the relationship between environmentalism and political transition in Estonia Latvia and Lithuania Environmentalism was a strong force behind the nationalist movements preceding the independence of the Baltic States and the subsequent collapse of the Soviet Union The contributors illustrate how the Baltic States face contemporary environmental challenges through transition enlargement and integration into the European Union This edited collection brings the reader through the political economic and social changes of the post Soviet Baltic States as a way of examining how transition influences environmentalism Secondly the book looks at how the enlargement of the European Union to encompass the Baltic States has influenced political and legal approaches to the environment Finally the contributors examine how regional and global environmental narratives have shaped contemporary environmentalism in the Baltic States From eco nationalism to the world s first green prime minister environmentalism continues to play an important role in Estonia Latvia and Lithuania This book was published as a special issue of the Journal of Baltic Studies

Coping with Accession to the European Union T. Börzel, 2015-12-11 The book explores the role of new modes of governance in helping future member states to cope with their accession to the EU It examines the extent to which civil society and business have assisted the governments of Southern Central and Eastern European accession

countries in taking on the ever more comprehensive body of EU laws and regulations Environmental Leadership Deborah
