**and Human Rights** Mike Cole,2006-08-21 With a new Preface by leading educationist Peter McLaren the updated second edition of this comprehensive book provides an important educational perspective on world wide equality issues for student teachers and teachers at all stages Each of the five equality issues of gender race sexuality disability and social class are covered as areas in their own right and in relation to education Written by experts in each particular field the chapters trace the history of the various issues up to the present and enable readers to assess their continuing relevance in the future

*Compendium of Readings in Bilingual Education* Rodolfo Rodriguez,1994 Schools Making A Difference Thrupp, Martin,1999-05-01 Does an effective school really come about through the actions of teachers and school leaders or does it also require an advantaged student intake This question reflects a longstanding research debate about whether or not the social class mix of a school s student intake has much effect on individual achievement Schools Making a Difference Let s Be Realistic presents new evidence which suggests that school mix is likely to be important because of the way many school

processes are deeply influenced by student intake characteristics Low socioeconomic schools face numerous intake related constraints which make them highly resistant to improvement efforts By suggesting that failing schools are often overwhelmed rather than ineffective this book provides a sympathetic reappraisal of the performance of teachers and school leaders in such schools It also offers a critical response to the often unrealistic claims of the school effectiveness and school improvement movement and a fresh critique of market reforms in education The British National Bibliography Arthur James Wells,1993 **Civil Rights in Schools** Steven Selig Goldberg,Kathleen Kelley Lynch,1995 Traditionally civil rights in education in the US have been defined through mandates for fair treatment in schools free of bias on race gender and other classifications This work traces the legal history of civil rights suggesting alternatives to the adversarial nature of lawsuits

**Charter Schools in Eight States** ,2009 The first U S charter school opened in 1992 and the scale of the charter movement has since grown to 4 000 schools and more than a million students in 40 states plus the District of Columbia With this growth has also come a contentious debate about the effects of the schools on their own students and on students in nearby traditional public schools TPSs In recent years research has begun to inform this debate but many of the key outcomes have not been adequately examined or have been examined in only a few states Do the conflicting conclusions of different studies reflect real differences in effects driven by variation in charter laws and policies Or do they reflect differences in research approaches some of which may be biased This book examines four primary research questions 1 What are the characteristics of students transferring to charter schools 2 What effect do charter schools have on test score gains for students who transfer between TPSs and charter schools 3 What is the effect of attending a charter high school on the probability of graduating and of entering college 4 What effect does the introduction of charter schools have on test scores of students in nearby TPSs P 4 of cover
