Riker, Kathryn Sikkink, A comprehensive look at the global movements that are transforming international relations Localizing and Transnationalizing Contentious Politics Teresa S. Encarnacion Tadem, 2009-08-16 The Philippines makes an interesting case for examining direct and collective acts of contention against the neoliberal project of economic globalization Crippled by foreign debt indiscriminate liberalization of trade falling stock markets and perpetual corruption the Philippines is also a democratic polity and one of the few countries in Asia with a vibrant and dynamic civil society sector This collection has chapters on the Freedom from Debt Coalition's campaign on debt relief the Stop the New Round Coalition's advocacy to change international trade rules and barriers the global taxation initiative as embodied in Tobin tax advocacy in the country the Transparency and Accountability Network's anti corruption effort and the Philippine Fair Trade Forum's enterprise on fair trade Localizing and Transnationalizing Contentious Politics is the first work of its kind to focus on five global civil society movements in the Philippines and their responses to the inequities of neoliberal globalization Northern scholars have acknowledged the persistent absence of the South in research on activism around global issues and this book can help fill this gap Using political process theory as a framework the book traces the emergence development and diffusion of these social movements in the Philippines Globalization is taken as the environment in which they operate to highlight the role of increased interdependence and internationalization and the predominance of a particular ideology in the dynamics of contention **Transnational Activism in Asia** Nicola Piper, Anders Uhlin, 2004-06 This book offers new perspectives on transnational activism with a focus on Asia The chapters and case studies examine macro and micro aspects of power and how cross border activities of civil society groups relate to problems of democracy *The Oxford Handbook of Social Movements* Donatella della Porta, Mario Diani, 2015-10-29 The Oxford Handbook of Social Movements is an innovative volume that presents a comprehensive exploration of social movement studies mapping the field and expanding it to examine the recent developments in cognate areas of studies within and beyond sociology and political science This volume brings together the most distinguished social and political scientists working in this field each writing thought provoking essays in their area of expertise and facilitates conversations between classic social movement agenda and lines of research The Oxford Handbook of Social Movements discusses core theoretical perspectives recent contributions from the field and how patterns of macro social change may affect social movements as well as suggesting what contributions social movement studies can give to other research areas in various disciplines *Handbook of Social Movements Across Disciplines* Bert Klandermans, Conny Roggeband, 2009-12-18 This book aims to revisit the interdisciplinary roots of social movement studies Each discipline raises its own questions and approaches the

subject from a different angle or perspective The chapters of this handbook are written by internationally renowned scholars representing the various disciplines involved They each review the approach their sector has developed and discuss their disciplines contributions and insights to the knowledge of social movements Furthermore each chapter addresses the unanswered questions and discusses the overlaps with other fields as well as reviewing the interdisciplinary advances so far

Anthropogenic Rivers Jerome Whittington, 2019-01-15 In the 2000s Laos was treated as a model country for the efficacy of privatized sustainable hydropower projects as viable options for World Bank led development By viewing hydropower as a process that creates ecologically uncertain environments Jerome Whittington reveals how new forms of managerial care have emerged in the context of a privatized dam project successfully targeted by transnational activists Based on ethnographic work inside the hydropower company as well as with Laotians affected by the dam he investigates how managers technicians and consultants grapple with unfamiliar environmental obligations through new infrastructural configurations locally inscribed ethical practices and forms of flexible experimentation informed by American management theory Far from the authoritative expertise that characterized classical modernist hydropower sustainable development in Laos has been characterized by a shift from the risk politics of the 1990s to an ontological politics in which the institutional conditions of infrastructure investment are pervasively undermined by sophisticated hactivism Whittington demonstrates how late industrial environments are infused with uncertainty inherent in the anthropogenic ecologies themselves Whereas anthropogenic usually describes human induced environmental change it can also show how new capacities for being human are generated when people live in ecologies shot through with uncertainty Implementing what Foucault called a historical ontology of ourselves Anthropogenic Rivers formulates a new materialist critique of the dirty ecologies of late industrialism by pinpointing the opportunistic ambitious and speculative ontology of capitalist natures

The Domestic Abroad Latha Varadarajan, 2010-10-08 In the past few decades and across disparate geographical contexts states have adopted policies and initiatives aimed at institutionalizing relationships with their diasporas These practices which range from creating new ministries to granting dual citizenship are aimed at integrating diasporas as part of a larger global nation that is connected to and has claims on the institutional structures of the home state Although links both formal and informal between diasporas and their presumptive homelands have existed in the past the recent developments constitute a far more widespread and qualitatively different phenomenon In this book Latha Varadarajan theorizes this novel and largely overlooked trend by introducing the concept of the domestic abroad Varadarajan demonstrates that the remapping of the imagined boundaries of the nation the visible surface of the phenomenon is intrinsically connected to the political economic transformation of the state that is typically characterized as neoliberalism The domestic abroad must therefore be understood as the product of two simultaneous on going processes the diasporic re imagining of the nation and the neoliberal restructuring of the state The argument unfolds through a historically nuanced study of the production of the domestic abroad in India The book traces

the complex history and explains the political logic of the remarkable transition from the Indian state's guarded indifference toward its diaspora in the period after independence to its current celebrations of the global Indian nation. In doing so, *The Domestic Abroad* reveals the manner in which the boundaries of the nation and the extent of the authority of the state in India and elsewhere are dynamically shaped by the development of capitalist social relations on both global and national scales.

Global Poverty, Injustice, and Resistance Gwilym David Blunt, 2020. Argues that the poor have the right to resist causes of poverty, examining illegal immigration, social movements, and political violence.

Another Production Is Possible Boaventura de Sousa Santos, 2020-05-05. This is the second volume after *Democratizing Democracy* of the collection *Reinventing Social Emancipation Towards New Manifestoes*. Here the author examines alternative models to capitalist development through case studies of collective land management cooperatives of garbage collectors and women's agricultural cooperatives. He also analyzes the changing capital-labor conflict of the past two decades and the way labor solidarity is reconstituting itself under new forms from Brazil to Mozambique and South Africa.

China and International Relations Zheng Yongnian, 2010-09-13. Focussing on one of the most influential scholars writing on international relations, Wang Gungwu, this book explores the limitations of Western international relations approaches to China and explains China's IR from a non-Western perspective and demonstrates how the study of Chinese experiences can enrich the IR field.

International Politics Scott P. Handler, Robert T. Person, 2020-12-23. Why do states do what they do? Who are the relevant nonstate actors in international politics and why do they do what they do? What causes conflict and cooperation in the international system? These are some of the most basic questions that the discipline of International Relations (IR) seeks to answer; they are also the questions that drive the objectives, organization, and content of this book. *International Politics: Classic and Contemporary Readings, Second Edition* seeks to help students engage critically with some of the world's most challenging questions through the use of leading classic and contemporary scholarship in the field of international relations. The first five chapters of the book explore the leading theoretical traditions in international relations, while subsequent chapters explore the themes of international security, international political economy, and contemporary challenges in international relations. This organization makes the book easy to use as a standalone text or alongside core text. Class-tested on over 10,000 students in the last decade, this text was built from the ground up to introduce students to the traditions and new foundations of international relations as well as the principles of intellectually rigorous thought.

Contentious Politics in the Middle East Fawaz A. Gerges, 2016-04-29. While the Arab people took center stage in the Arab Spring protests, academic studies have focused more on structural factors to understand the limitations of these popular uprisings. This book analyzes the role and complexities of popular agency in the Arab Spring through the framework of contentious politics and social movement theory.

Labour Internationalism in the Global South Robert

O'Brien,2019-01-03 An analysis of labour internationalism that explores in depth the experience of the Southern Initiative on Globalisation and Trade Union Rights SIGTUR This book will interest anyone concerned with the role of labour in the global economy economic justice global social movements and internationalism **Constitutional Violence** Antoni Abat i Ninet,2012-12-12 If constitutional legitimacy is based on violence what does this mean for democracy Almost every state in the world has a written constitution and for the great majority the constitution is the law that controls the organs of the state But is a constitution the best device to rule a country Western political systems tend to be constitutional democracies dividing the system into a domain of politics where the people rule and a domain of law set aside for a trained elite Legal political and constitutional practices demonstrate that constitutionalism and democracy seem to be irreconcilable Antoni Abat i Ninet strives to resolve these apparently exclusive public and legal sovereignties using their various avatars across the globe as case studies He challenges the American constitutional experience that has dominated western constitutional thought as a quasi religious doctrine And he argues that human rights and democracy must strive to deactivate the invisible but very real violence embedded in our seemingly sacrosanct constitutions The Handbook of Global Media and Communication Policy Robin Mansell,Marc Raboy,2014-03-03 The Handbook of Global Media and Communication Policy offers insights into the boundaries of this field of study assesses why it is important who is affected and with what political economic social and cultural consequences Provides the most up to date and comprehensive collection of essays from top scholars in the field Includes contributions from western and eastern Europe North and Central America Africa and Asia Offers new conceptual frameworks and new methodologies for mapping the contours of emergent global media and communication policy Draws on theory and empirical research to offer multiple perspectives on the local national regional and global forums in which policy debate occurs Global Activism Ruth Reitan,2007-01-24 This comprehensive study traces the transnationalization of activist networks analyzing their changing compositions and characters and examining the roles played by the World Social Forum in this process Comparing four of the largest global networks targeting the neoliberal triumvirate of the World Bank the IMF and the World Trade Organization the Jubilee anti debt campaigners Via Campesina peasant farmers Our World Is Not For Sale and the anarchistic Peoples Global Action Written by a scholar activist the book highlights that despite their diversity these collective actors follow a similar globalizing path and that networks in which solidarity is based on a shared identity perceived as threatened by neoliberal change are gaining strength Social forums are depicted as a fertile ground to strengthen networks and a common ground for cooperative action among them but also a battleground over the future of the forum process the global anti neoliberal struggle and other possible worlds in the making Global Activism will appeal to students and scholars interested in globalization international relations IPE and social movements **Women, Civil Society and the Geopolitics of Democratization** Denise M. Horn,2010-04-19 Over the past decade democratization and civil society promotion became key variables in preserving global security and the liberal

economic market This book examines the prevalence of democratization policies as a hegemonic geopolitical tool these policies represent a concerted political effort in which civil society organizations are manipulated through funding strategies Denise Horn offers a fresh innovative feminist constructivist perspective by arguing that Western gender norms i.e. those norms that determine degrees of participation within civil society inform the policies of hegemonic powers and transform the foundations of civil society in transitional states This powerful volume will be of interest to students and scholars in Gender and Women's Studies Political Science and International Relations

Making Corporate Social Responsibility a Global Concern Lisbeth Segerlund, 2016-05-06 In recent decades claims have increasingly been made on transnational corporations to take responsibility for the promotion and protection of human and labour rights in countries where they operate This behavioural obligation results from the persistent advocacy of non governmental organizations and is commonly known as corporate social responsibility CSR Driven by the theory of the norm life cycle model the book uses an interesting range of case studies including Nike and the anti apartheid movement to trace the development of CSR as an international norm The development is examined through five selected non governmental organizations Clean Clothes Campaign Fairtrade Labelling Organizations International Global Exchange International Business Leaders Forum and the International Labor Rights Fund The book makes a lucid contribution to an emerging scholarship and will interest researchers and practitioners involved in issues of global governance and global civil society
