whether they are indicative of true reform greater citizen participation and empowerment It assesses whether these regions are really representing something new or whether they are a reconfiguration of traditional power relationships It provides a timely critical analysis of region building and the extent to which national processes of decentralization and sub national processes of regionalism can enhance the effectiveness and responsiveness of governance Constructing Capitalisms Roderick Martin,2013-03-28 This book provides an analysis of the changes in business systems of four Central and Eastern European countries Poland Hungary the Czech Republic and Romania since the fall of Communism in 1989 drawing on the Varieties of Capitalism debate De-coding New Regionalism James W. Scott,2016-05-13 Bringing together comparative case studies from Central Europe and South America this book focuses on new regions regions created as political projects of modernization and re scaling Through this approach it de codes New Regionalism in terms of its contributions to institutional change while acknowledging its contested nature and contradictions It questions whether these regions are merely a strategy of neo liberal adjustment to changing political and economic conditions or whether they are indicative of true reform greater citizen participation and empowerment It assesses whether these regions are really representing something new or whether they are a reconfiguration of traditional power relationships It provides a timely critical analysis of region building and the extent to which national processes of decentralization and sub national processes of regionalism can enhance the effectiveness and responsiveness of governance **Reconstructing the Regional Economy** Adrian Smith,1998-06-25 The book focuses on regional and economic change in Eastern and Central Europe using Slovakia as a case study It explains the relationship between industrial change and regional development and discusses fragmentation within the context of the legacy of the state socialist industrialization model **Dependent Growth: Foreign Investment and the Development of the Automotive Industry in East-Central Europe** Petr Pavlínek,2017-04-07 This book offers a critical analysis of recent developments in the automotive industry of East Central Europe ECE Economists industry specialists and national governments have considered the rapid development of the automotive industry in ECE in the past twenty years an unqualified success This rapid growth has been based on large inflows of foreign direct investment FDI from Western Europe North America Japan and South Korea and it significantly contributed to GDP growth created thousands of new jobs and completely transformed the previously existing automotive industry in the region This volume offers an analysis that goes beyond uncritical celebratory accounts of this rapid growth It is based on original detailed firm level research conducted by the author in Czechia and Slovakia between 2009 and 2015 that covered assembly firms and the networks of component suppliers Theoretically and conceptually the analysis will draw on the global production networks and global value chains perspectives Drawing on the original empirical data and on additional available information this volume concentrates on several important questions related to the development of the automotive industry in ECE in the 2000s The role of FDI in the rapid development of the automotive industry after 1990 and particularly in the 2000s The upgrading of the automotive

industry in East Central Europe through FDI The position of ECE in the automotive industry research and development R D The effects of the 2008 2009 economic crisis in the automotive industry of ECE The role of state in the rapid development of the automotive industry in ECE in the 1990s and 2000s The effects of FDI on domestic firms in the form of linkages between foreign owned and domestic firms and spillovers from foreign owned to domestic firms **Work, Employment and Transition** Al Rainnie, Adrian Smith, Adam Swain, 2005-07-28 Since the late 1980s the experiences of work and employment in the former communist world have been profoundly transformed Work Employment and Transition brings together a series of essays by leading international scholars which highlights the varied and complex forms that work and employment restructuring are taking in the post soviet world and makes important theoretical contributions to our understanding of these transformations From Iron Rice Bowl to Informalization Sarosh Kuruvilla, Ching Kwan Lee, Mary E. Gallagher, 2011-08-15 In the thirty years since the opening of China s economy China s economic growth has been nothing short of phenomenal At the same time however its employment relations system has undergone a gradual but fundamental transformation from stable and permanent employment with good benefits often called the iron rice bowl to a system characterized by highly precarious employment with no benefits for about 40 percent of the population Similar transitions have occurred in other countries such as Korea although perhaps not at such a rapid pace as in China This shift echoes the move from breadwinning careers to contingent employment in the postindustrial United States In From Iron Rice Bowl to Informalization an interdisciplinary group of authors examines the nature causes and consequences of informal employment in China at a time of major changes in Chinese society This book provides a guide to the evolving dynamics among workers unions NGOs employers and the state as they deal with the new landscape of insecure employment *Europe* Bettina Van Hoven, Tim Unwin, 2016-04-15 First published in 2003 *Europe lives in transition* gives a voice to people living through transition opening a door for outsiders to understand how such people have lived an opportunity for one to speak and another to listen The book has been deliberately written in an accessible engaging and first hand manner Original quotes from various projects are woven together throughout the text This book focuses explicitly on the experiences of respondents and functions largely to introduce themes and speakers The principal themes are identities relationships production consumption and power Except for selected crucial theoretical and methodological discussions any academic commentary which might overshadow the words of the respondents is kept to a minimum A key aim is to engage the readers with the text by confronting them with their own preconceptions and geographical imaginations Each chapter opens with two activity sections to help readers think about the themes in broader terms for example by doing some research themselves Each chapter closes with two further activity sections for review and discussion *Region, Regional Identity and Regionalism in Southeastern Europe* Klaus Roth, 2008 Southeastern Europe is often portrayed as an area plagued by endemic nationalisms a view that seems to be confirmed by the break up of Yugoslavia However a closer look shows that the nation is not the only territorial unit of

identification Regions play an important role as well especially those that look back on traditions that differ from those of the national state Thus the end of socialism also brought forward regional movements which articulated opposition to the dominance of the centralized state These developments are furthered by the integration into the European Union whose policy of a Europe of the Regions demands strong regional centres for the administration of structural funds and for the empowerment of the regions The contributions to this volume address the dynamics of regions regionalism and regional identities in present Southeast Europe but also look into the history of individual regions They provide ample material for understanding the complex nature of territorial identification in this rapidly changing part of Europe
