Rethinking An Ngo Development Donors And Civil Society In Jordan:

Rethinking an NGO, 2004 *Rethinking an NGO* Basma bint Talal, 2003-11-21 Jordan's development must be considered in three broad contexts which have profoundly shaped the process: the country's limited internal resources, the political instability of the Middle East region, and international policies largely based on Western agendas that have meant a continual need to mediate between aid donors and the cultural values and traditions of an Arab society. Drawing on a careful blend of qualitative and quantitative research techniques, the author provides not only a rare people-centred account of a development organization and its practices from grass roots to the national level, but also an insider's critical reflections on a venture with which she has been involved since its inception. The Jordanian Hashemite Fund for Human Development (JOHUD) formerly known as the Queen Alia Jordanian Social Welfare Fund (QAF). For almost three decades, the Fund has attempted to improve the quality of life in local communities. Islam, Civil Society and Social Work Egbert Harmsen, 2008 The thesis analyses the role of Muslim voluntary welfare associations in Jordan from the perspective of their religious discourse and the related social activities to assess whether they contribute to empowerment or reinforce dependency. Historical Dictionary of Women in the Middle East and North Africa Ghada Talhami, 2013 The overriding theme of this work is that women's struggles, human rights, myths, and literary expression are indispensable to an understanding of the modern culture and socio-political development of the Middle East region. The work demonstrates that no aspect of Middle Eastern history and modern evolution was shaped in isolation of women's lives and contributions to society. The dictionary covers the biographies and written work of prominent historical female figures in the Middle East and North Africa, as well as 20th-century feminists, both male and female, who advanced women's rights over many years. The *Historical Dictionary of Women in the Middle East and North Africa* includes a chronology, an introductory essay, an extensive bibliography, and a dictionary section that has over 400 cross-referenced entries on various aspects of Middle Eastern feminism and culture, touching upon religious themes such as Sharia laws, Islamic marriage, divorce, and inheritance practices. This book is an excellent access point for students, researchers, and anyone wanting to know more about the culture and history of women in the Middle East and North Africa.

The Vortex of Power Airlangga Priyadi Kusman, 2018-07-17 This book explores the role of intellectuals and governance processes in post-authoritarian Indonesia. Focusing on East Java, the author argues that intellectuals have played an increasingly direct and practical role in the exercise of governance at the local level of Indonesian politics. The book provides insights into how the collaboration between intellectuals and local politico-business elites has shaped good governance and democratic institution building, validating power structures that continue to obstruct political participation in the country. In addition, the book also delves into the contribution of local intellectuals in resolving the contradictions between technocratic ideas and governance practices in the interest of local elites. Empirical studies included in the book add to the broader literature on the social role of intellectuals, highlighting their role as not just defined by their capacity to produce and

circulate knowledge but also by their particular position in concrete social and political struggle The author also explores the manner in which relationships between intellectuals business and political elites and NGOs in local political and economic practices intersect with national level contests over power and resources

Neoliberalism and the Political Economy of Tourism Jan Mosedale,2016-03-10 Tourism has become increasingly shaped by neoliberal policies yet the consequences of this neoliberalisation are relatively under explored This book provides a wide ranging inquiry into the particular manifestations of different variants of neoliberalism highlighting its uneven geographical development and the changing dynamics of neoliberal policies in order to explain and evaluate the effects of neoliberal processes on tourism Covering a variety of different aspects of neoliberalism and tourism the chapters investigate how different types of tourism are used as part of more general neoliberalisation agendas how neoliberalism differs according to the geographic context the importance of discourse in shaping neoliberal practices and the different approaches of putting the neoliberal ideology into practice Aiming to initiate debates about the connections between neoliberalism and tourism and advance further research avenues this book makes a timely contribution which discusses the relationships between markets nation states and societies from a social science perspective Neoliberalism is considered as a political economic ideology as variants of the global neoliberal project as discourse and practices through which neoliberalism is enacted

US Assistance, Development, and Hierarchy in the Middle East Anne Mariel Zimmermann,2016-12-21 What does US aid buy in the Middle East Drawing on extensive primary source research this book examines the role and consequences of US aid to three countries in the Middle East The author argues that the political survival strategies of incumbent leaders in Egypt Israel and Jordan shaped not only the type of aid that these countries received from the US but also its developmental and geopolitical impact Leaders who relied heavily on distributing selective benefits to their ruling coalitions were more likely to receive forms of US aid that complemented their distributive political economies and undermined the state s developmental capacity which simultaneously rendered them more dependent on US resources and more likely to cede fragments of their sovereignty to their major donor Non distributive leaders however could reap the full benefits of highly discretionary and technologically sophisticated aid incorporating it into developmental policies that rendered them progressively less dependent on Washington and better able to say no when it was in their best interest

Ideas for Development Robert Chambers,2013-06-17 The many ideas and opportunities include narrowing the gaps between words and actions reducing demands on administrative capacity using minimum rules non negotiables and downward accountability to transform power relations finding new potentials for participation improving scaling up critical reflection and experiential learning complementing rights based with obligations based approaches pro poor realism and responsible well being

Harnessing Cultural Capital for Sustainability Mawere, Munyaradzi,Awuah-Nyamekye, Samuel,2015-06-20 This book argues that the basic component of any society s social security and sustainability is cultural capital and its ability to fully recognise diversity

in knowledge production and advancement However with regard to African societies since the dawn of racial slavery and colonialism cultural capital indigenous knowledge in particular has iniquitously and acrimoniously suffered marginalisation and pejorative ragtags Increasingly since the 1990s cultural capital informed by African knowledge systems has taken central stage in discussions of sustainability and development This is not unrelated with the recognition by America and Europe in particular of the central role that cultural capital could and should assume in the logic of development and sustainability at a global level Unfortunately action has often failed to match words with regard to the situation in Africa The current book seeks to make a difference by exploring the role that African cultural capital could and should assume to guarantee development and sustainability on the continent and globally It argues that lofty pan African ideals of collective self reliance self sustaining development and economic growth would come to naught unless determined and decisive steps are taken towards full recognition of indigenous cultural capital on the continent
