## **Rethinking Development Putting An End To Poverty:**

Rethinking Development Henri Bartoli, 2000 If major prospects of progress are to be opened up for human beings and if the struggle against multidimensional poverty is to be successfully waged throughout the world the current programs of action are not sufficient nor is a reliance on globalization As the United Nations Development Programme points out globalization which is subject to the pitiless markets threatens solidarity which is the invisible heart of human development Rather according to Henri Bartoli in his hard hitting new book a new paradigm must be defined and new strategies must be proposed Rules institutions and procedures must be invented which will strengthen the governance and governability of the economy at global regional and local levels a radical renewal of economic thinking on which all efforts to rationalize are based Henri Bartoli is emeritus professor of economics at University of Paris I Panth on Sorbonne and international vice president of the European Society for Culture Copublished with UNESCO **Rethinking Development** Henri Bartoli, 2000

Drori,John W. Meyer,Hokyu Hwang,2006-05-18 All around the world societies are experiencing an explosion of organizations and organizing community clubs religious groups social movements as well as schools hospitals businesses and government agencies increasingly take the form of complex and formal organization Why Why is global society recast in this format and why so fiercely This book explores various dimensions of the trends of expansion formalization and standardization of organizing worldwide by exploring such organizational legacies as accounting business management corporate social responsibility and performance benchmarks Featuring contributions from prominent academics the book argues that these processes can be attributed to globalization and to its specific tendencies of universalism rationalization and rise of the modern notion of the strongly bounded and purposive social actor An application of institutional arguments to global issues the book will be of interest to academics and researchers of Organization Studies Sociology Political Science and Geography     *Language and Politics in Africa* John Obiero Ogone,Daniel Ochieng Orwenjo,2020-05-15 Language and Politics in Africa is a fine collection of both empirically and theoretically based articles from across the African continent and beyond but all focusing on the twin issues of Language and Politics in post colonial African countries The authors offer critical perspectives on contemporary theoretical empirical and policy issues related to language and how such issues manifest themselves at the inevitable interface with politics in a number of African countries Coming at a time when most African countries are still grappling with language policy and

planning issues while others are increasingly having to contend with the political outcomes of linguistically and ethnically heterogeneous nation states the present volume is a must read for scholars and students who are interested on the twin issues of language and politics since it represents one of the first attempts at documenting how language and politics affect each other in a number of African countries The volume is divided into two sections dealing with the politics of language and the language of politics in African countries

**Business, Globalization and the Common Good** Henri Claude de Bettignies, François Lépineux, 2009 Globalization and information technology are driving the world into a new era Is it the responsibility of business to pursue the common good and more precisely to participate in the construction of the global common good This book brings together contributions from various disciplines written by scholars who are at the forefront of this debate It provides multiple insights into a tripartite relationship business globalization and the common good It helps explain why the business sphere will probably not be in a position to ignore the common good much longer and why this latter concept widely ignored in today's management realm is likely to become part of tomorrow's corporate policies and practices in the global context Finally this work opens up a plethora of avenues for future research calling for the development of transdisciplinary approaches and for the elaboration of a research program embracing theoretical empirical and spiritual perspectives to tackle this complex issue
