Neo-nationalism in Europe and Beyond Andre Gingrich, Marcus Banks, 2006-08-01 By the early twenty first century neo nationalist forces have established themselves in a number of the world s large regions and subcontinents From Australia to South Asia in Eastern and Western Europe comparable parties and movements have positioned themselves in national parliaments and governments with some considerable impact on state power In contrast to right wing extremist parties in the past these recent movements mostly operate within legal parliamentary channels using essentialized notions of local culture to mobilize against real and alleged threats to local identities of status gender religion nationhood and ethnicity Prompted by this near simultaneous rise to political influence of more than a dozen apparently similar parties across Western Europe this collection offers a range of European case studies with selected global examples such as the Front National the late Pim Fortuyn India and the BJP and Pauline Hanson and her One Nation Party in Australia It takes up the theoretical and methodological challenges posed by this phenomenon and asks what distinctive contributions anthropology might make to its study

Coming Home to Germany? David Rock, Stefan Wolff, 2002 The end of World War II led to one of the most significant forced population transfers in history the expulsion of over 12 million ethnic Germans from Central and Eastern Europe between 1945 and 1950 and the subsequent emigration of another four million in the second half of the twentieth century Although unprecedented in its magnitude conventional wisdom has it that the integration of refugees expellees and Aussiedler was a largely successful process in postwar Germany While the achievements of the integration process are acknowledged the volume also examines the difficulties encountered by ethnic Germans in the Federal Republic and analyses the shortcomings of dealing with this particular phenomenon of mass migration and its consequences

Multicultural Citizenship of the European Union Juan Delgado-Moreira, 2018-02-06 This title was first

published in 2000 This text deals with two intertwined dimensions of multicultural citizenship of the European Union It studies the theoretical debate over how best to reconcile multiculturalism citizenship and the need for collective identity at the European Union EU level by comparing EU citizenship with cultural citizenship and multicultural studies in the United States In addition to this through the study of EU documents the author contends that there exists such a thing as policies of multicultural citizenship at the European Union level He then goes on to analyze their key aspects such as the pursuit of symbolic forms of multiculturalism and the arguments to support affirmative action policies for women The text also examines the steps taken by certain EU institutions towards creating European identity and improving awareness of citizenship and cultural heritage while meeting the test of subsidiarity The author concludes that there are competing discourses in EU institutions concerning the best model for EU citizenship Among other concepts they construe multiculturalism and transnationalism as contested and sometimes opposing interpretations of citizenship The text goes on to reveal a lack of substantive connection between EU citizenship and identity in the European Union as well as the artificiality of EU attempts to build it anew It concludes that a plurality of cultural constructions of EU citizenship within the wider framework of liberal culturalism may be a viable model of EU citizenship

Nation-Building Jochen Hippler, 2005-06-20 The term nation building has experienced a remarkable renaissance since the early 1990s It has been used to describe and to justify the military interventions in Somalia Afghanistan and Iraq Linked to the idea of failed or failing states the concept is used to hide and legitimise a whole range of

diverse policies allowing foreign powers to control and reshape countries in areas of conflict. Currently the international debate on nation building is heavily dominated by US actors and authors especially by writers connected to the Bush administration or its policies. This book presents academic and political alternatives presenting a critical view from Old Europe. The book combines academic research and analysis with policy orientation with contributors from both fields. It clarifies the terminology distinguishing developmental peace related imperial and analytical approaches to nation building. Highlighting its connections to globalization, democracy, ethnic and religious minorities, the contributors consider case studies such as Somalia, the Balkans, Afghanistan, Iraq, and Nigeria. The Grecanici of Southern Italy Stavroula Pipyrou, 2016-07-28

The Grecanici are a Greek linguistic minority in the Calabria region of Italy, remnants of a population that has resided there since late antiquity. Their language represents a holdover from the Middle Ages at least and possibly even to the Greek colonies of the classical period. For decades the Grecanici passionately fought to be recognized by the Italian state as an official linguistic minority, finally achieving this goal in 1999. Violence, corruption, and mismanagement are inextricable parts of the social fabric, but Grecanici have crafted the means to invert hegemonic culture and participate in the power games of minority politics. The Grecanici of Southern Italy provides a comprehensive ethnography that examines the ways the minority developed and sustain enduring cultural forms of solidarity and relatedness. Stavroula Pipyrou proposes the concept of fearless governance to describe overlapping and sometimes contradictory systems of power, authority, and relational networks that enable the Grecanici to achieve political representation at the intersection of local, national, and global encounters. Refuting easy assumptions of top-down governmental influence, Pipyrou shows how the Grecanici find political representation through the European Union and UNESCO, state policy, civic associations, family networks, and illegal organizations, not being afraid to take risks, incur wrath, lose friends, or risk death in challenging the political status quo. **The Indo-Europeans**

Jean-Paul Demoule, 2023. The existence of an Indo-European linguistic family, allowing for the fact that several languages widely dispersed across Eurasia share numerous traits, has been demonstrated for several centuries now. But the underlying factors for this shared heritage have been fiercely debated by linguists, historians, archaeologists, and anthropologists. The leading theory of which countless variations exist argues that this similarity is best explained by the existence at one given point in time and space of a common language and corresponding population. This ancient prehistoric population would then have diffused across Eurasia, eventually leading to the variation observed in historical and modern times. The Indo-Europeans. Archaeology, Language, Race, and the Search for the Origins of the West argues that despite its acceptance and use by most researchers from different disciplines, such a model is inherently flawed. This book describes how, beginning in the late eighteenth century, Europeans began a quest for a supposed original homeland from which a small conquering people would one day spread out, bringing their language to Europe and parts of Asia, India, Iran, Afghanistan. This quest was often closely tied to ideological preoccupations, and it was in its name that the Nazi leadership, claiming for the Germans the status of the

purest Indo Europeans or Aryans waged genocide The last part of the book summarizes the current state of knowledge and current hypotheses in the fields of linguistics archaeology comparative mythology and genetics The culmination of three decades of research this book offers a sweeping survey of the historiography of the Indo European debate and poses a devastating challenge to the Indo European origin story at its roots The Han Agnieszka Joniak-Luthi,2015-06-24 This ethnography explores contemporary narratives of Han ness revealing the nuances of what Han identity means today in relation to that of the fifty five officially recognized minority ethnic groups in China as well as in relation to home place identities and the country s national identity Based on research she conducted among native and migrant Han in Shanghai and Beijing Aqsu in Xinjiang and the Sichuan Yunnan border area Agnieszka Joniak Luthi uncovers and discusses these identity topographies Bringing into focus the Han majority which has long acted as an unexamined backdrop to ethnic minorities Joniak Luthi contributes to the emerging field of critical Han studies as she considers how the Han describe themselves particularly what unites and divides them as well as the functions of Han identity and the processes through which it is maintained and reproduced The Han will appeal to scholars and students of contemporary China anthropology and ethnic and cultural studies **Debating Diversity** Jan Blommaert,Jef Verschueren,2002-03-11 Immigration racism and nationalism have become hotly debated issues in the Western world This highly original and controversial work focuses on the language used by the vast majority who regard themselves as being open to a multi cultural society Using Belgium as a case study and drawing parallels with the UK US Europe and the former Yugoslavia the authors analyse this language and reveal a remarkable consistency between these liberal voices such as in news reporting and the language used by radical racist and nationalist groups *International Security Studies Volume 4*Number 1Summer 2018 TAO Jian,2018-11-01
