**Karl Marx** Kevin B.

Anderson, 2017-05-15 Marx's approach to analyzing society and especially his critique of capitalist society continues to influence the work of a large number of scholars world wide Unfortunately there are relatively few clear accounts of what this approach is and how to put it to use And despite the many attempts to use Marx's method to study a variety of subjects there are relatively few that can serve as useful models In the present volume the internationally renowned Marxist scholar

Bertell Ollman and the social theorist Kevin B Anderson have brought together a sampling of the best writings of the past hundred years that illustrate and critique Marx's method as well as explain what it is and how to put it to work. Anyone wishing to understand better Marx's dialectical method along of course with the theories created with its help or to revise this method or to criticize it or to use it in their own work will find this collection invaluable.

**The Routledge Handbook of the Politics of the #MeToo Movement** Giti Chandra, Irma Erlingsdóttir, 2020-11-26 Since the MeToo hashtag went viral in 2017 the movement has burgeoned across social media moving beyond Twitter and into living rooms and courtrooms. It has spread unevenly across the globe with some countries and societies more impacted than others and interacted with existing feminist movements, struggles and resistances. This interdisciplinary handbook identifies thematic and theoretical areas that require attention and interrogation, inviting the reader to make connections between the ways in which the MeToo movement has panned out in different parts of the world, seeing it in the context of the many feminist and gendered struggles already in place as well as the solidarities with similar movements across countries and cultures. With contributions from gender experts spanning a wide range of disciplines including political science, history, sociology, law, literature and philosophy, this groundbreaking book will have contemporary relevance for scholars, feminists, gender researchers and policy makers across the globe.

**Living with the Land** Liesbeth van de Grift, Dietmar Müller, Corinna R. Unger, 2022-11-07 For a long time agriculture and rural life were dismissed by many contemporaries as irrelevant or old-fashioned. Contrasted with cities as centers of intellectual debate and political decision making, the countryside seemed to be becoming increasingly irrelevant. Today politicians in many European countries are starting to understand that the neglect of the countryside has created grave problems. Similarly, historians are remembering that European history in the twentieth century was strongly influenced by problems connected to the production of food, access to natural resources, land rights and the political representation and activism of rural populations. Hence the handbook offers an overview of historical knowledge on a variety of topics related to the land. It does so through a distinctly activity-centric and genuinely European perspective. Rather than comparing different national approaches to living with the land, the different chapters focus on particular activities from measuring to settling the land from producing and selling food to improving agronomic knowledge from organizing rural life to challenging political structures in the countryside. Furthermore, the handbook overcomes the traditional division between East and West, North and South by embracing a transregional approach that allows readers to gain an understanding of similarities and differences across national and ideological borders in twentieth-century Europe.

**Money and Totality** Fred Moseley, 2015-09-29 This ambitious book presents a comprehensive new macro-monetary interpretation of Marx's logical method in *Capital* based on substantial textual evidence which emphasises two main points: 1. Marx's theory is primarily a macroeconomic theory of the total surplus value produced in the economy as a whole and 2. Marx's theory is a monetary theory from beginning to end and the circuit of money capital M-C-M is the logical framework of Marx's theory. It follows

from this macro monetary interpretation that contrary to the prevailing view there is no transformation problem in Marx's theory i.e. Marx did not fail to transform the inputs of constant capital and variable capital in his theory of prices of production in Part 2 of Volume III

**Why Syria Goes to War** Fred H. Lawson, 2018-09-05 Rejecting conventional explanations for Syrian foreign policy which emphasize the personalities and attitudes of leaders cultural factors peculiar to Arab societies or the machinations of the great powers Fred H. Lawson describes key shifts in Damascus's response to regional adversaries in terms of changes in the intensity of political struggles at home Periodic eruptions of domestic conflict have inspired Syria's ruling coalition to adopt a wide range of programs designed to buy off domestic rivals and perpetuate the predominance of individual coalition members These programs have undermined the unity of the Ba'ath regime increasing the chances that opponents will overturn the established order Challenges to the Ba'ath regime become most threatening whenever crises of accumulation shake the domestic political economy Lawson contends Opposition forces gain strength when the state cannot sustain new investment or when competition increases between public and private enterprises Political and economic trends inside Syria have determined why Damascus has since 1963 alternately escalated tensions with regional rivals and adopted more accommodating postures Lawson traces this dynamic through five major episodes the 1967 war with Israel limited intervention in Jordan in 1970 the widening conflict in Lebanon in 1976 the defusing of conflict with Iraq in 1982 and the rapprochement with Turkey over Kurdish separatism in 1994 These patterns Lawson suggests may be characteristic of nations changing from one domestic economic system to a radically different one as Syria has in the transition from state socialism to a privatized political economy

**Henri Lefebvre** Chris Adrian Butler, 2012 Henri Lefebvre *Spatial Politics Everyday Life and the Right to the City* provides the first detailed analysis of the relevance and importance of the social theory of Henri Lefebvre for the study of law and the administrative state

**The Reification of Desire** Kevin Floyd, 2009 Floyd brings queer critique to bear on the Marxian categories of reification and totality and considers the dialectic that frames the work of Georg Lukács as Herbert Marcuse and Frederic Jameson

Fanaticism Alberto Toscano, 2017-08-29 A genealogy of fanaticism unearthing its long history before it became a tool in the Clash of Civilizations It is commonplace to hear fanaticism described as a deviant or extreme variant of an already irrational set of religious beliefs an assertion that helps to demonize convictions outside political orthodoxy Alberto Toscano's compelling and erudite counter history explodes this accepted convention by exploring the critical role fanaticism played in the formation of modern politics and the liberal state Showing how fanaticism results from a failure to formulate an adequate emancipatory politics this illuminating history sheds new light on an idea that continues to dominate debates about faith and secularism This expanded edition includes new material that revisits the idea of fanaticism as it operates at the limits of the liberal political imaginary highlighting its relation to fraternal violence political purity and the refusal of compromise as well as its centrality to times of social crisis and international conflict

*China's Modernization II* Gerhard Preyer, 2015-09-09

The idea of only one way leading to a modern society seems to be hardly tenable. But even if we agree to this, our theories and terms describing modernization are gained on our own Western history. So social science has to reconsider its basic terms to describe China's modernization and maybe even the understanding of modernization itself. The second of two volumes on China's modernization collects articles by leading Chinese and Western scientists focusing on the main conflicts and differences this process involves. In the first section, On Contemporary Theory of Modernization, Manoussos Marangudakis represents Shmuel N. Eisenstadt's concept of Multiple Modernities and the Theory of Indeterminacy, one of the best elaborated perspectives on modernity. Changing China: Dealing with Diversity, the second section, examines how China copes with dissent and discusses the significance of law and a civil society. Merle Goldman begins with Dissent of China's Public Intellectuals in the Post Mao Era. The Modernization of Law in China: its Meaning, Achievements, Obstacles and Prospect is the subject of Qingbo Zhang. Scott Wilson presents a Gramscian analysis of civil society in China's State in the Trenches. And Francis Schortgen and Shalendra Sharma study how China is Manufacturing Dissent: Domestic and International Ramifications of China's Summer of Labor Unrest. Neoliberalism and the Changes in East Asian Welfare and Education is the focus of the third section. Beatriz Carrillo Garcia investigates the Business Opportunities and Philanthropic Initiatives in China. Time, Politics and Homelessness in Contemporary Japan is the subject of Ritu Vij. Different school books show the Educational Modernisation Across the Taiwan Straits by David C. Schak. And Ho-fung Hung discusses the role of China in globalization following the question: Is China Saving Global Capitalism from the Global Crisis? The additional rubric On Contemporary Philosophy involves three articles about International Development Paradox and Phronesis by Robert Kowalski. The World in the Head by Robert Cummins and Communication, Cooperation and Conflict by Steffen Borge. Content and abstracts: [www.protosociology.de](http://www.protosociology.de)

**Beyond Tragedy and Eternal Peace** Jean-François Drolet, 2021-02-15. As a German philosopher, cultural critic, composer, poet, philologist and scholar of Latin and Greek, Friedrich Wilhelm Nietzsche has exerted a profound influence on modern intellectual history. *Beyond Tragedy and Eternal Peace* provides an overview of his legacy, highlighting the synergy between his critique of metaphysics and his reflections on the politics and international relations of the late nineteenth century. Jean-François Drolet exposes and analyzes Nietzsche's account of the political processes, institutions and dominant ideologies shaping public life in Germany and Europe during the 1870s and 1880s. Nietzsche anticipated a new kind of politics borne out of such events as the Franco-Prussian War, the unification of Germany under Bismarck, the advent of mass democracy and the rise and transformation of European nationalism. Focusing on conflict and political violence, Drolet expertly reconstructs Nietzsche's fierce and continued critique of the nationalist, liberal and socialist ideologies of his age, which the philosopher believed failed to grapple with the death of God and the crisis of European nihilism it engendered. As this reconstructive interpretation reveals, Nietzsche's philosophy offers a powerful and still greatly underappreciated reckoning with the changing political practices, norms and agencies that led to the momentous collapse of

the European society of states during the early twentieth century
