Retirement Guide For Canadians Planning Makes The Difference:

The Canadian Retirement Guide Jill O'Donnell, Graham McWaters, John A. Page, 2007 People over 65 years old constitute the fastest growing segment of the Canadian population By 2011 as the first baby boomers turn 65 seven million Canadians will be senior citizens And by 2041 it is estimated nearly one in four Canadians will be over 65 The aging population will radically change society as individuals face the challenges of growing older caring for parents and often times for children still at home As our life spans increase so do our options for how we will spend our later years However this large group of elders is facing a crisis Many have made few if any plans for retirement Without clear goals plans to support dependants and means of paying for financial commitments in addition to increasing health risks retirement could be a time of misery and uncertainty The Canadian Retirement Guide solves that problem It sets up a process by which we can plan for retirement as a family taking into consideration the retiree the spouse and those who depend on them Topics covered include estate planning wills taxation how to choose financial professionals your role as a caregiver physical and mental health issues and the different challenges facing us as we enter our golden years **The Essential Retirement Guide** Frederick

Vettese, 2015-11-12 Retirement planning is difficult enough without having to contend with misinformation Unfortunately much of the advice that is dispensed is either unsubstantiated or betrays a strong vested interest In The Essential Retirement Guide Frederick Vettese analyses the most fundamental questions of retirement planning and offers some startling insights The book finds for example that Saving 10 percent a year is not a bad rule of thumb if you could follow it but there will be times when you cannot do so and it might not even be advisable to try Most people never spend more than 50 percent of their gross income on themselves before retirement hence their retirement income target is usually much less than 70 percent Interest rates will almost certainly stay low for the next 20 years which will affect how much you need to save Even in this low interest environment you can withdraw 5 percent or more of your retirement savings each year in retirement without running out of money Your spending in retirement will almost certainly decline at a certain age so you may not need to save quite as much as you think As people reach the later stages of retirement they become less capable of managing their finances even though they grow more confident of their ability to do so Plan for this before it is too late Annuities have become very expensive but they still make sense for a host of reasons In addition The Essential Retirement Guide shows how you can estimate your own lifespan and helps you to understand the financial implications of long term care Most importantly it reveals how you can calculate your personal wealth target the amount of money you will need by the time you retire to live comfortably The author uses his actuarial expertise to substantiate his findings but does so in a jargon free way *Recent Transportation Literature for Planning and Engineering Librarians* University of California, Berkeley. Institute of
