about Russia **Institutional Change in Transition Economies** Michael Cuddy,2019-01-15 This title was first published in 2002 The importance of institutions for transition economies has so far been overlooked Michael Cuddy and Ruvin Gekker bring together leading experts in the field to fill this crucial void in the literature The contributors concentrate on an ongoing tension between informal constraints and mechanisms and the new formal rules and mechanisms that have gradually evolved through the transition period Experiences are primarily drawn from Russia The book consists of three parts the first comprising an analysis synthesis and generalizations of the institutional adaptations as a market economy slowly emerges from a fog of shifting rules and varying interpretations This is followed by the study of business and taxation authorities behavior as they try to minimize or maximize the taxation take The volume also analyzes the challenges facing central and regional governments in delivering equitable levels of public services across regions of vastly different development levels while at the same time trying to stimulate regional economic growth **The Political Economy of Independent Ukraine** H. van Zon,2000-11-30 The Political Economy of Independent Ukraine analyses the reasons for the abysmal economic performance of Ukraine during the 1990s The main thesis is that economic development was blocked by a set of parasitic mechanisms at all levels of the economy that prevented the development of value added economic activities These parasitic mechanisms already developed under Soviet rule beating the system by redistributing goods and services while disregarding formal rules became a widespread practice Global Perspectives on Corporate Governance and CSR Güler Aras,2016-04-22 Good governance is good PR it is important in every sphere of society whether it be the corporate environment the political or wider society When resources are too limited to meet the minimum expectations of the people it is a good governance level that can help to promote the welfare of society Enlightened companies recognise that there is a clear link between governance and corporate social responsibility and make efforts to link the two Unfortunately this is too often no more than making a claim that good governance is a part of their CSR policy as well as a part of their relationship with shareholders Corporate Governance and CSR are significant issues in all parts of the world huge amounts of time and energy are devoted to its global interpretation Most analysis however is too simplistic to be helpful as it normally resolves itself into simple dualities rules based v principles based or Anglo Saxon v Continental The editors of this book argue that this is not helpful that the reality is far more complex They show that Corporate Governance and CSR cannot be understood without taking geographical cultural and historical factors into account It is necessary they say to understand the concerns of people in different parts of the world Therefore by using a wealth of case studies theoretical models and drawing on the knowledge and perspective of experts from around the world the editors have produced this valuable book Global Perspectives on Corporate Governance and CSR discusses issues such as regional and cultural similarities and differences the contexts of differing legal frameworks and governance codes differences between large companies and SMEs governance in new environments companies and economies versus stable environments and the changing environment affecting

corporate social responsibility around the world The editors then synthesise this in a way that will be helpful to business people as well as to academics

The Political Economy of Stalinism Paul R. Gregory,2004 This book uses the formerly secret Soviet state and Communist Party archives to describe the creation and operations of the Soviet administrative command system It concludes that the system failed not because of the jockey i e Stalin and later leaders but because of the horse the economic system Although Stalin was the system s prime architect the system was managed by thousands of Stalins in a nested dictatorship The core values of the Bolshevik Party dictated the choice of the administrative command system and the system dictated the political victory of a Stalin like figure This study pinpoints the reasons for the failure of the system poor planning unreliable supplies the preferential treatment of indigenous enterprises the lack of knowledge of planners etc but also focuses on the basic principal agent conflict between planners and producers which created a sixty year reform stalemate

Comparative Economics in a Transforming World Economy John Barkley Rosser,2004 The second edition of an innovative undergraduate textbook in Comparative Economic Systems that goes beyond the traditional dichotomies
