militarism or excess nationalism      *Environmental Radiation Effects on Mammals* Olga A. Smirnova, 2010-12-17

The monograph is devoted to the theoretical studies of radiation effects on mammals. It summarizes the results obtained by the author over the past 30 years, most of them being of high priority. In the course of these studies, a single approach to the modeling of radiation effects on mammals has been elaborated. Specifically, in the framework of the developed deterministic mathematical models, the effects of both acute and chronic irradiation in a wide range of doses and dose rates on vital body systems (hematopoiesis, small intestine, and humoral immunity) as well as on the development of autoimmune diseases are investigated. The radiation effects on the mortality dynamics in homogeneous and nonhomogeneous in radiosensitivity mammalian populations are also studied by making use of the developed stochastic models. The most appealing feature of these mortality models consists of the fact that they account for the intrinsic properties of the exposed organism. Namely, within these models, the stochastic biometrical functions are calculated proceeding from statistical characteristics and dynamics of the respective critical body system (hematopoiesis or small intestine). The performed theoretical investigations contribute to the development of the system and quantitative approaches in radiation biology and ecology. These studies elucidate the major regulatory mechanisms of the damage and recovery processes running in the vital body systems of exposed mammals and reveal the key parameters characterizing the processes.

*Russian Nationalism, Foreign Policy and Identity Debates in Putin's Russia* Marlene, 2014-04-15. The contributors to this book discuss the new conjunctions that have emerged between foreign policy events and politicized expressions of Russian nationalism since 2005. The 2008 war with Georgia as well as conflicts with Ukraine and other East European countries over the memory of the Soviet Union and the Russian interpretation of the 2005 French riots have all contributed to reinforcing narratives of Russia as a fortress surrounded by aggressive forces in the West and CIS. This narrative has found support not only in state structures but also within the larger public. It has been especially salient for some nationalist youth movements including both pro-Kremlin organizations such as Nashi and extra-systemic groups such as those of the skinheads. These various actors each have their own specific agendas; they employ different modes of public action and receive unequal recognition from other segments of society. Yet many of them expose a reading of certain foreign policy events which is roughly similar to that of various state structures. These and related phenomena are analyzed, interpreted, and contextualized in papers by Luke March, Igor Torbakov, Jussi Lassila, Marlène Laruelle, and Lukasz Jurczyszyn.
