Ecological Jurisprudence Alessandro Pelizzon, 2025-01-11 This open access book explores the rise of ecological jurisprudence a transformative legal theory that challenges traditional legal boundaries Drawing on over 15 years of research and teaching the book offers a comprehensive theoretical exploration of this new approach to law via a comprehensive examination of a wide range of initiatives from around the world as well as a deep theoretical engagement with the implications of this novel legal theory Covering a breadth of topics never before brought together with such clear and wide ranging scope this book points to the emergence of an ecological jurisprudence not only as a profound transformation of legal norms but as a radical reimagination of law itself and serves as a vital resource for scholars and practitioners interested in the future of environmental law Along with Stone s Do Trees Have Standing 1972 Cullinan s Wild Law 2002 and the Ecuadorian Constitution 2008 we can now name Pelizzon s Ecological Jurisprudence as a key milestone in the field Herman F Greene JD DMin Thomas Berry Scholar in Residence The Earth Law Center An immense gift to the field and to generations of lawyers to come Ecological Jurisprudence contains teachings from which one could learn for a lifetime Katarina Hovden University of Copenhagen Alessandro Pelizzon s Ecological Jurisprudence is deeply rooted in how the law can best serve the natural world inspiring future lawyers with the kind of jurisprudence the natural world so urgently needs to exist Maria Mercedes S nchez Former Coordinator of the United Nations Harmony with Nature Programme Pelizzon coins the term ecological jurisprudence and mobilises it to create deep normative foundations for future environmental law developments Any serious environmental scholar will have to engage with him because of the breadth and depth of what he achieves in this book Professor Afshin Akhtar Khavari QUT *The Paradise of God* Norman Wirzba, 2003-09-11 And God said Let us make man in our image after our likeness and let them have dominion over the fish of the sea and over the fowl of the air and over the cattle and over all the earth and over every creeping thing that creepeth upon the earth Gen 1 26 It has become a commonplace that Biblical religion bears a heavy share of responsibility for our destruction of the environment and this passage from the King James version of the Bible exemplifies what is generally believed to be the Biblical attitude toward the earth In this provocative book however Norman Wirzba argues that the doctrine of creation when understood as a statement about the moral and spiritual meaning of the world actually holds the key to a true understanding of our place in

the environment and our responsibility toward it Wirzba contends that an adequate response to environmental destruction depends on a new formulation of ourselves as part of a created whole rather than as autonomous unencumbered individuals Drawing on the work of biblical scholars ecologists agrarians philosophers theologians and cultural critics Wirzba develops a comprehensive worldview that grows out of the idea that the world is God's creation While the text of Genesis has historically encouraged a vision of persons as masters of creation a more theologically and ecologically sensitive rendering he says would be to say that we are servants of creation Our present culture Wirzba believes results from a denial of creation that has caused modern problems as diverse as rootlessness individualism careerism boredom and consumerism The recovery of the meaning of creation can lead to a renewed sense of human identity and vocation and happier more peaceful lives He concludes by offering practical advice for individuals who wish to begin the work of transformation and renewal Moving beyond the usual political debates The Paradise of God presents a compelling vision of a new religious environmentalism

Burdon, 2014-09-19 The idea of human dominion over nature has become entrenched by the dominant rights based interpretation of private property Accordingly nature is not attributed any inherent value and becomes merely the matter of a human property relationship Earth Jurisprudence Private Property and the Environment explores how an alternative conception of property might be instead grounded in the ecocentric concept of an Earth community Recognising that human beings are deeply interconnected with and dependent on nature this concept is proposed as a standard and measure for human law This book argues that the anthropocentric institution of private property needs to be reconceived drawing on international case law indigenous views of property and the land use practices of agrarian communities Peter Burdon considers how private property can be reformulated in a way that fosters duties towards nature Using the theory of earth jurisprudence as a guide he outlines an alternative ecocentric description of private property as a relationship between and among members of the Earth community This book will appeal to those researching in law justice and ecology as well as anyone pursuing an interest more particularly in earth jurisprudence **Dark Green Religion** Bron Raymond Taylor, 2010 A love of green may be a human universal Deepening the palette of green scholarship Bron Taylor proves remarkably to be
