Selected Petrogenic Relationships of Plagioclase Richard Conrad Emmons, 2011-08-01 **Geological Survey Professional Paper**, 1982 U.S. Geological Survey Professional Paper, 1984 *Geological Survey Professional Paper* Geological Survey (U.S.), 1963 **Geology of the Funeral Peak Quadrangle, California, on the East Flank of Death Valley** Harald Drewes, 1963 A description of the structural development of part of a large block including contributions on megabreccias turtlebacks and chaotic structure overlying the Amargosa thrust fault *Feldspar Minerals* J.V. Smith, 2013-06-29 During the past two centuries crystallography mineralogy and petrology have evolved from simple compilations of data to powerful disciplines based on interlocking networks of laws hypotheses and rules of thumb While many data still consist of isolated facts which defy synthesis a gratifying portion can be organized according to physical and chemical principles Unfortunately the separation of physical sciences into sub divisions especially at the teaching level makes it difficult to integrate the different approaches to minerals This separation is worsened by the increasing technical demands of chemical and physical theories by the number and complexity of experimental methods by the sheer mass of facts in an observational discipline such as mineralogy or petrology and by the explosion of papers This book concentrates on those aspects of the genesis and properties of feldspar minerals which can be related to physical and chemical principles My main aim is frankly pedagogic I wish to show how chemical and physical principles can be combined with geologic observation to produce an enhanced level of understanding of the genesis of minerals The feldspars which demonstrate almost all of the general principles provide the most suitable example **Geological Survey Bulletin**, 1966 Feldspar Minerals Joseph V. Smith, William L. Brown, 2012-12-06 Remarks by JVS Volumes 1 and 2 of Feldspar Minerals were published in 1974 but Volume 3 was not completed because I was forced to devote 3 years to the resolution of unforeseen problems in the construction of an ion probe By 1977 the incomplete draft for Volume 3 had become obsolete because of the enormous advances in knowledge of feldspars particularly those in lunar rocks and meteorites and in both deep seated and ancient terrestrial rocks Furthermore it soon became obvious that a completely new version of Feldspar Minerals was needed because of the important new results on the physical and chemical properties I had kept up with the interesting but tedious chore of weekly reading of the incoming literature and maintenance of the files By 1980 the intense day to day pressure had gone from my research programs on lunar rocks and on the development of the ion microprobe as a quantitative geochemical instrument and I began preparation of a second edition of Feldspar Minerals **Geology of the Thomas Range Fluorspar District, Juab County, Utah** Mortimer Hay Staatz, Frank W. Osterwald, 1959 This report concerns work done on behalf of the U S Atomic Energy Commission and is published with the permission of the Commission *TEI*, 1958 **Changes in**
