Karl Marx and Frederick Engels Karl Marx, 1949 **An Index to the Collected Works of J.V. Stalin** Jack F. Matlock, 1955 **Selected Works of Yakov Borisovich Zeldovich, Volume I** Yakov Borisovich Zeldovich, 2014-07-14 *Selected Works of Ya B Zeldovich* is a two-volume collection of over 100 articles spanning half a century of work by the late Soviet scientist Yakov Borisovich Zeldovich. The breadth and depth of Zeldovich's work is staggering. Author of over twenty books and more than 500 scientific articles, he made fundamental contributions in chemical catalysis and kinetics, combustion and the hydrodynamics of explosive phenomena, nuclear chain reactions and nuclear energy, the physics of elementary particles and the large-scale structure of the universe and cosmology. The importance of this collection lies not only in its documentary value as a collection of key scientific works by a man whose genius was characterized by the Soviet physicist Andrei Sakharov as probably unique. Zeldovich himself considered his most valuable role to be that of a teacher to convey to young scientists the how of science. The author of several excellent textbooks on topics ranging from elementary mathematics to advanced methods of mathematical physics, he saw this collection of works enlarged from the original Russian edition as a contribution to that end. Here one can see the scientific method at work and all the enthusiasm, the breakthroughs and the mistakes associated with real scientific endeavor. Commentaries by the author and the editors are included with each paper serving to enhance both the historical and the pedagogical value of this edition. Mainlining Marx John Stanley, In recent years a host of Western Marxists have tried to emancipate Marx from responsibility for various unsavory doctrines Political theorists have argued that Marx can avoid the weight of Stalinism and also the various theories such as positivism naturalism Darwinism technological determinism and the dialectics of nature that support Marxism In the course of building up their defense of Marx these modern critics have developed an elaborate but often confusing rationale whose premise consists of attributing many of the nefarious tendencies of Marxism to Engels particularly the latter s philosophy of nature In *Mainlining Marx* John L Stanley sets Marx s view of nature back in its proper perspective Stanley challenges the new orthodoxy of prominent Marxist scholars who see a fundamental dichotomy between Marx and Engels with the latter believing in cosmic superlaws and the former adhering to historically grounded ones Stanley argues both Marx and Engels used historical and transhistorical laws at various times He is highly critical of those who abstract theoretical principles out of texts Marx wrote with specific and historical political goals in mind He takes issue as well with critics who posit a Marxian belief in communist as against natural needs and further challenges the new orthodoxy in his analysis of Marx s dissertation showing that from the beginning Marx s thought was grounded in materialist determinism Supplementing the chapters on Marx and his critics the volume concludes with an essay on Georges Sorel s approach to textual analysis and interpretation showing how Sorel far in advance of his time realized the impossibility of completely objective analysis and the inevitable distortion of the subject under study Throughout this volume Stanley s critical approach utilizes Sorel s illuminating insights to point out the distortions in modern Marxian analysis Challenging and original *Mainlining Marx* is a major contribution to the study of Marxism It will be read by economists political scientists and intellectual historians John L Stanley 1937 1998 was professor of political science at the University of California at Riverside He was the author of *The Sociology of Virtue The Political and Social Theories of Georges Sorel* and the translator and editor of *The Illusions of Progress* by Georges Sorel and *From Georges Sorel Essays in Socialism and Philosophy* Select Works Edmund Burke, 1883
