Parenting and Substance Abuse Nancy E. Suchman, Marjukka Pajulo, Linda C. Mayes, 2013-02-15 Historically there has been little integration of theoretical or applied research on addiction treatment and parenting intervention development Rather the fields of addiction and developmental research have progressed on largely separate trajectories even though their focus powerfully and often tragically intersects each time a parent is diagnosed with a substance use disorder Parenting and Substance Abuse is the first book to report on

pioneering efforts to move the treatment of substance abusing parents forward by embracing their roles and experiences as mothers and fathers directly and continually across the course of treatment The chapters in this volume represent important new strides among researchers and clinicians to address and close the increasingly recognizable gap between addiction and developmental science Chapters focus on current state of the art treatment models for parents primarily pregnant and parenting women including descriptions of innovative treatments currently being developed and evaluated that focus on parental addiction and the parent child relationship within a developmental framework Part I covers the theoretical understandings of how addiction impacts the developmental processes of parenting Part II discusses risk assessment evaluation and a variety of interventions and therapies This unique volume will be of importance to clinicians researchers students and trainees in the health professions who develop implement and evaluate interventions for parental addiction including in well baby clinics primary care settings pediatric clinics and residential and outpatient drug treatment programs

Ships without a Shore Anne Pierce, 2017-09-08 Childhood in America has changed and not for the better From day care for babies to the exhausting array of activities for children to the storm of lurid and violent shows now deemed appropriate for the young to the expectation that teenagers build resumes childhood has been thoroughly redefined Anne R Pierce argues that this radical re definition has been embraced with remarkably little discussion about what children by nature need Pierce submits that we have latched onto opinions about childrearing that are potentially harmful to children If traditions are choices to be embraced or abandoned at our discretion and adult self fulfillment is a primary determinant in those choices the fundamentals of the well wrought childhood are easily forgotten Steeped in intellectual permissiveness we have convinced ourselves that parental substitutes are as good as parents themselves at caring for children that the concepts of nurture and of the maternal are archaic and irrelevant that more lessons and sports are better than less and that the earlier one embarks upon them the better and that innocence and knowledge are less important than worldly attitudes and competitive skills Understanding and challenging the theories and agendas behind childrearing trends is a pressing need and the subject of this book Pierce takes an honest look at the evidence on the effects of daycare and of hyper structuring children She gives voice to the many intelligent and estimable educators child development experts researchers and social commentators who are ignored because their conclusions are hard to bear Equally important Pierce says is attention to that inner tug of love and conscience which many of us have been programmed to ignore Modern American children are expected to adjust and to understand as adults would the complexities and vicissitudes of public as opposed to private life For them childhood is fast becoming a distant memory Could it be that America s thrust forward leaves children without a solid foundation upon which to grow This is the sobering question asked and answered in this challenging book **Supportive Therapy** Lawrence H. Rockland, H Rockland, 2003-04-17 The main goal of the therapy described here is to improve ego functions and adaptations rather than to explore unconscious conflicts Thus the emphasis is on strengthening reality testing

discouraging impulsivity and clarifying confused thinking while minimizing the regression and negative transference characteristic of exploratory therapy In chapters richly illustrated with clinical material the author details the strategies and rationales of this practice covering such topics as transference and countertransference resistance working through and the relationship between supportive therapy and psychopharmacology Clinically sophisticated yet immensely practical this valuable resource will enhance the skill and understanding of every therapist student clinician or teacher who practices supportive psychotherapy

Haskett, Staci Perlman, Beryl Ann Cowan, 2013-11-08 Homelessness among families with children in the U S is rising rapidly due to the economic downturn Supporting Homeless Families Current Practices and Future Directions aims to raise the standard of services provided to families without homes through practices that are strengths based and culturally competent This book provides a contextual overview of family homelessness An ecological and developmental framework for understanding the implications of homelessness from infancy through adulthood are presented with reference to existing research The book also addresses innovative designs for providing collaboration between and among diverse services that interface with families experiencing homelessness In doing so the importance of providing families with culturally competent services that support them during episodes of homelessness as well as the period of re housing are addressed Examples of empirically proven interventions and best practices are showcased and roadblocks to success and sustainability are discussed

Understanding Adoption Kathleen Hushion, Susan B. Sherman, Diana Siskind, 2006 Adoption is a transformational process bringing parenthood to those who long for but cannot bear children and giving stranded children home family and their place in the world But every adoption is preceded and followed by its story and when these stories are told in the offices of psychotherapists we begin to understand the impact of adoption in all its complexity We learn from parents how their quest to have and raise a child has played out in real life and what shadows might have fallen between the dream and the

reality And we learn from the children the many ways that being adopted shaped their development their sense of identity what went wrong along the way and how we may help Clinical work with parents and children as well as with adults who were adopted is the focus of Understanding Adoption Because adoption has become widely practiced accepted and accessible and because it has greatly changed the composition of families it is a timely subject for study The authors of this book undertake exploration of this important terrain of loss and connection and of the fragility and resilience of human bonds

Donald Campbell, Ronny Jaffe, 2021-11-14 This book is based on the work done by a group of British and Italian psychoanalysts who have been meeting twice yearly since 2003 to study clinically the relationship between the mind and the body of their patients. The analytical dyad became the focus of a dialectical movement between body and mind and between subject and object. Containing contributions from a range of distinguished British and Italian analysts, this book covers such key topics as somatic symptoms, the embodied unconscious, bodily expressions of affect, sexuality, violence, self-harm, suicide, attempts, hypochondria, hysteria, anorexia, and bulimia, and splits and fragmentation associated with the body. The theoretical understanding is inspired by various psychoanalytic theoreticians including Freud, M. Klein, Winnicott, and Bion and their theories on sexuality, infantile sexuality, libido, aggressiveness, death instinct, Oedipus complex, and mother-child relationship. Offering new advances in theoretical thinking and practical applications for clinical work, this book will be essential for all psychoanalysts and mental health clinicians interested in understanding serious mental disturbance that is represented in the body.

Handbook of Parenting Marc H. Bornstein, 2019-02-01 This highly anticipated third edition of the Handbook of Parenting brings together an array of field-leading experts who have worked in different ways toward understanding the many diverse aspects of parenting. Contributors to the Handbook look to the most recent research and thinking to shed light on topics every parent, professional, and policymaker wonders about. Parenting is a perennially hot topic. After all, everyone who has ever lived has been parented, and the vast majority of people become parents themselves. No wonder bookstores, house shelves, and shelves of how-to parenting books and magazine racks in pharmacies and airports overflow with periodicals that feature parenting advice. However, almost none of these is evidence-based. The Handbook of Parenting is Period. Each chapter has been written to be read and absorbed in a single sitting and includes historical considerations of the topic, a discussion of central issues and theory, a review of classical and modern research, and forecasts of future directions of theory and research. Together, the five volumes in the Handbook cover: Children and Parenting, the Biology and Ecology of Parenting, Being and Becoming a Parent, Social Conditions and Applied Parenting, and the Practice of Parenting. Volume 3, Being and Becoming a Parent, considers a large cast of characters responsible for parenting, each with her or his own customs and agenda, and examines what the psychological characteristics and social interests of those individuals reveal about what parenting is. Chapters in Part I on The Parent show just how rich and multifaceted is the constellation of children's caregivers. Considered first are family systems, and then successively mothers and fathers, coparenting and gatekeeping between parents, adolescent parenting, grandparenting, and single parenthood, divorced and remarried parenting, lesbian and gay parents, and finally sibling caregivers and nonparental caregiving. Parenting also draws on transient and enduring physical, personality, and intellectual characteristics of the individual. The chapters in Part II on Becoming and Being a Parent consider the intergenerational transmission of parenting, parenting and contemporary reproductive technologies, the transition to parenthood, and stages of parental development, and then chapters turn to parents' well-being, emotions, self-efficacy,

cognitions and attributions as well as socialization personality in parenting and psychoanalytic theory These features of parents serve many functions they generate and shape parental practices mediate the effectiveness of parenting and help to organize parenting

Fragments of Trauma and the Social Production of Suffering , Marilyn Charles, Michael O'Loughlin, 2014-11-05

Fragments of Trauma and the Social Production of Suffering Trauma History and Memory offers a kaleidoscope of perspectives that highlight the problem of traumatic memory Because trauma fragments memory storytelling is impeded by what is unknowable and what is unspeakable Each of the contributors tackles the problem of narrativizing memory that is constructed from fragments that have been passed along the generations When trauma is cultural as well as personal it becomes even more invisible as each generation s attempts at coping push the pain further below the surface Consequently that pain becomes increasingly ineffable haunting succeeding generations In each story the contributors offer there emerges the theme of difference a difference that turns back on itself and makes an accusation Themes of knowing and unknowing show the terrible toll that trauma takes when there is no one with whom the trauma can be acknowledged and worked through In the face of utter lack of recognition what might be known together becomes hidden Our failure to speak to these unaspirated truths becomes a betrayal of self and also of others In the case of intergenerational and cultural trauma we betray not only our ancestors but also the future generations to come In the face of unacknowledged trauma this book reveals that we are confronted with the perennial choice of speaking or becoming complicit in our silence
