Enhancing E-Learning with Media-Rich Content and Interactions Caladine, Richard,2008-04-30 Online learning is transcending from the text rich educational experience of the past to a video and audio rich learning transformation The greater levels of media rich content and media rich interaction that are currently prevalent in online leisure experiences will help to increase e learning s future efficiency and effectiveness Enhancing E Learning with Media Rich Content and Interactions presents instructional designers educators scholars and researchers with the necessary foundational elements theoretical underpinnings and practical guidance to aid in the technology selection and design of effective online learning experiences by integrating media rich interactions and content Training Methodology: Planning and administration National Communicable Disease Center (U.S.),1969 **Instructional Design: International Perspectives II** Sanne Dijkstra,Franz Schott,Norbert Seel,Robert D. Tennyson,Norbert M. Seel,2014-03-18 Instructional design theory and practice has evolved over the past 30 years from an initial narrow focus on programmed instruction to a multidimensional field of study integrating psychology technology evaluation measurement and management The growth of instructional design ID has occurred because of direct needs problems and goals from society Its application in planning instruction first developed in the United States with the Department of Defense during World War II with the purpose of meeting immediate concerns for effective training of larger numbers of military personnel From the beginning ID has rapidly expanded into applications in

industrial and executive training vocational training classroom learning and professional education Although ID has its roots in the U S applications and theoretical growth is an international activity However literature at the international level is still limited to either individual author contributions or collections primarily represented by single countries As a result there is no standard reference source that contains the rich variety of theories and applications to form the international foundation for the field The goal of this two volume set is to establish international foundations for ID theory research and practice within the framework of the two following objectives to identify and define the theoretical research and model foundations for ID and to bridge the gap between ID foundations and application Volume I includes chapters on philosophical and theoretical issues on learning theory and ID models Volume II provides an overview of the state of the art of solving ID problems The contributors offer contrasting points of view which provide a rare opportunity to see the diversity and complexity in the field The editorial committee has selected a wide range of internationally known authors to make presentations in the topic areas of the field
