Conventional Choices? Ian Stewart, David Stewart, 2011-11-01 Selecting a leader is a momentous and defining choice for a political party Leaders symbolize their party and are a primary factor in election outcomes While much is known about the selection of national party leaders less is known about the provincial selection process particularly in the Maritimes Breaking

new ground Conventional Choices examines twenty five different leadership elections in three maritime provinces The analysis draws on an extraordinarily rich data set spanning thirty two years to explore the backgrounds attitudes and motivations of those who select party leaders It is an impressive study that offers fresh insights into leadership selection and Maritime party politics *Leadership Selection in Six Western Democracies* James W. Davis, 1998-08-20 A comparative survey which discusses how national leaders in six Western democracies Australia Canada France Germany Great Britain and the United States are nominated for the highest office in their country The combinations of methods each country utilizes to nominate their leaders are described The text emphasizes that most national leaders have served a long apprenticeship in various public offices sometimes having made several attempts before actually being nominated to the nation's highest public office Increasingly the text shows that opinion polls television and professional campaign management are playing a greater role in the leadership selection process in all six countries This book will be of interest to upper level college and graduate students and faculty in comparative government political parties and public affairs and academic as well as public libraries

A Matter of Quality? Candidates in Canadian General Elections David Coletto, **Leaders' Personalities and the Outcomes of Democratic Elections** Anthony King, 2002-03-21 The conventional wisdom purveyed by the press and television and accepted as true by most politicians is that elections throughout the democratic world are personal clashes between individual presidential candidates and party leaders Almost everyone assumes that election outcomes are frequently determined by the major candidates personal characteristics In the United States Al Gore in 2000 came over as aloof and arrogant and failed to win his expected victory In Great Britain Tony Blair in 2001 came across as dynamic and personable and won a second term So personal charisma appears to yield electoral success This study by eminent scholars on both sides of the Atlantic suggests that the conventional wisdom is wrong Survey research conducted in recent decades indicates that relatively few voters are swayed by candidates' personal characteristics Far more important are voters' longstanding party loyalties their views on issues and their judgments of how well or badly presidents and parties have performed or will perform in office The votes of even the few electors who are swayed by candidates' personalities usually cancel each other out As a result election outcomes are seldom decided by individual candidates' personal images Occasionally but not often Ronald Reagan and Bill Clinton owed their election victories more to economics than to charm At the end of World War II the charismatic Winston Churchill lost the 1945 British general election the colorless Clement Attlee won Chancellor Helmut Kohl remained in power in Germany for a generation but was never personally popular Russian voters reckoned that Boris Yeltsin could not hold his drink but nevertheless elected him The implications of the authors' analyses are profound They suggest that modern democratic politics is not nearly as candidate centered and personality oriented as is often supposed They also suggest that parties' policies and their performance in office usually count for far more than the men and women they choose as their leaders Not least the authors suggest that the efforts of political consultants advertising agencies and

spin doctors are often misdirected *Democracy within Parties* Reuven Y. Hazan, Gideon Rahat, 2010-07-01 Can too much participation harm democracy Democratic theory places great importance upon the conduct of elections but it is not often recognized that the electoral game takes place in two arenas not only between parties but also within them This pioneering book presents a new approach to understanding political parties It sheds light on the inner dynamics of party politics and offers the first comprehensive analysis of one of the most important processes any party undertakes its process of candidate selection Candidate selection methods are the mechanisms by which a party chooses its candidates for the general elections It may be the function that separates parties from other organizations For such an important function this field has certainly faced a dearth of serious investigation Hazan and Rahat the leading scholars on this topic conduct an in depth analysis of the consequences of different candidate selection methods on democracy This book is a culmination of almost two decades of research and defines the field of candidate selection Part I of the book delineates candidate selection methods based on four major dimensions candidacy the selectorate decentralization and voting versus appointment systems Part II analyses the political consequences of using different candidate selection methods according to four important aspects of democracy participation representation competition and responsiveness The book ends with a proposed candidate selection method that optimally balances all four of the democratic aspects concurrently and answers the question Is the most participatory candidate selection method necessarily the best one for democracy Comparative Politics is a series for students teachers and researchers of political science that deals with contemporary government and politics Global in scope books in the series are characterised by a stress on comparative analysis and strong methodological rigour The series is published in association with the European Consortium for Political Research For more information visit www.essex.ac.uk/ecpr The General Editor is Professor David M Farrell School of Politics and International Relations University College Dublin **The United States and Canada** Paul J. Quirk, 2019 The United States and Canada share the longest border in the world maintain one of the closest alliances and are notably similar in many ways Yet the two countries also have important differences including sharply contrasting political institutions In *The United States and Canada* Paul J Quirk has gathered a distinguished cast of contributors to present an integrated comparative examination of the political systems of the United States and Canada with special attention to the effects of political institutions and their interaction with political values geographic and demographic factors and other influences The volume explores the differences between the American presidential or separation of powers system and the Canadian parliamentary system focusing on electoral and party systems executive leadership and the legislative process bureaucratic influence and federalism It proceeds to examine patterns of governance in a wide range of issue areas economic policy climate change policy healthcare policy civil rights integration and immigration and abortion and gay rights A sweeping comparative account this volume serves as an authoritative guide for anyone interested in why the two countries differ and where they might be headed *Dynasties and Interludes* Lawrence LeDuc, Jon H.
