Psychology L.S. Hearnshaw, 2019-11-28 Originally published in 1987 The Shaping of Modern Psychology presents a
systematic survey of the development of psychology from the dawn of civilization to the late 1980s Psychology as we find it
today has been shaped by many influences philosophical theological scientific medical and sociological It has deep roots in
the whole history of human thought and its significance cannot be properly appreciated without an understanding of the way
it has developed This book covers the history of modern psychology from its animistic beginnings through the Greek
philosophers and the Christian theologians and developments such as the Scientific Revolution to the time of first publication

The author drew on many years teaching experience in the subject and on a lifetime's interest in psychology. The growth of psychology had been particularly impressive during the twentieth century and Professor Hearnshaw also looked to the future of the discipline. He showed that the new vistas opening out in fields such as neuropsychology, information theory and artificial intelligence for example were hopeful indications for the future provided the lessons of the past were not forgotten. With the benefit of hindsight we now know that he was right.
