Self Interest And Public Interest In Western Politics:

Self-interest and Public Interest in Western Politics Leif Lewin,1991 Although Professor Lewin is not testing existing views that for people in politics egoism rules on deep theoretical grounds he strongly argues that empirical facts do not support such views and thus opens a new chapter in the debate on individuals rationality

Self-Interest and Public Interest in Western Politics Leif Lewin,1991-04-11 Is it self interest or public interest that dominates Western politics This question has been debated in many fields and through the 1980s a consensus developed supported by extensive research that in their political decisions and actions people are largely motivated by self interest not by common good In this book combining in a novel way insights from different fields including rational choice theory political philosophy and electoral research Leif Lewin examines more than two hundred studies of democracy in action from seventeen countries He looks at the behaviour and attitudes of voters bureaucrats and politicians in turn and challenges the accepted wisdom In his wide ranging review of the literature he shows that people are in fact actuated by broader considerations than their own short sighted interests that they act politically in the shadow of the future that they find there are overwhelming reasons to try to contribute to the long term common good Professor Lewin shows in short that the plausible and prevalent theory that egoism rules simply don t match the facts

serve the needs of scholars researchers students and professionals alike **Rational Lives** Dennis Chong,2011-03-15 Those who study value conflicts have resisted rational choice approaches in the social sciences contending that political conflict over cultural values is best explained by group loyalties symbolic motives and other nonrational factors However Chong shows that a single model can explain how people make decisions across both social and economic realms He argues that our preferences result from a combination of psychological dispositions which are shaped by social influences and developed over the life span Chong s book yields insights about the circumstances under which preferences beliefs values norms and group identifications are formed It offers a provocative explanation of how ingrained social norms and values can change over time despite the forces maintaining the status quo Going beyond the tired polemics on both sides Chong constructs a new interpretation of human behavior in which culture and individual rationality both matter The synthesis is a more comprehensive and powerful explanatory framework than either side could have produced and Chong s creativity should influence subsequent interpretations of our social life in fundamental ways Christopher H Achen University of Michigan

Just Institutions Matter Bo Rothstein, 1998-02-13 In this book Bo Rothstein seeks to defend the universal welfare state against a number of important criticisms which it has faced in recent years He combines genuine philosophical analysis of normative issues concerning what the state ought to do with empirical political scientific research in public policy examining what the state can do Issues discussed include the relationship between welfare state and civil society the privatization of social services and changing values within society His analysis centres around the importance of political institutions as both normative and empirical entities and Rothstein argues that the choice of such institutions at certain formative moments in a country's history is what determines the political support for different types of social policy He thus explains the great variation among contemporary welfare states in terms of differing moral and political logics which have been set in motion by the deliberate choices of political institutions The book is an important contribution to both philosophical and political debates about the future of the welfare state Rationality, Democracy, and Justice Claudio López-Guerra, Julia

Maskivker, 2015-02-05 This volume advances the research agenda of one of the most remarkable political thinkers of our time Jon Elster With an impressive list of contributors it features studies in five topics in political and social theory rationality and collective action political and social norms democracy and constitution making transitional justice and the explanation of social behavior Additionally this volume includes chapters on the development of Elster's thinking over the past decades Like Elster's own writings the essays in this collection are problem driven non ideal inquiries of practical relevance This volume closes with lucid comments by Jon Elster **The Social Licence for Financial Markets** David Rouch, 2020-07-13 This

book is about what Mark Carney has called the social licence for financial markets and how it can point us towards a more sustainable future Author David Rouch argues that what it reveals contrasts sharply with the usual portrayals of markets as places of unrestrained financial self interest Drawing attention to a more complex reality and the presence of justice focused aspirations in finance can positively impact individual institutional and systemic behaviour change not imposed by regulators but emerging from the very substance of market relationships The finance sector should have a key role in addressing humanity's increasingly pressing sustainability challenges Yet the relationship between finance and society has not recovered from the 2008 crisis and the scandals and austerity that followed The Covid 19 pandemic and its economic fallout is sharpening some of the issues and creating new ones Recognising that financial markets operate subject to a social licence has the potential to galvanise market participants in tackling these challenges strengthening social solidarity on which markets also depend and to provide coordinates for navigating a way through the post pandemic social political and economic landscape *Welfare Trends in the Scandinavian Countries* Robert Erikson, Erik Jorgen Hansen, Stein

Ringen, Hannu Uusitalo, 2019-07-26 Discusses important aspects of the development of the welfare state in the Scandinavian countries and Iceland since the mid 1970s It focuses on societal changes during a period of modest economic growth Topics

include labour market benefits education and social mobility class and inequality income distribution and trajectories and health

Power without Knowledge Jeffrey Friedman, 2019-12-16 Technocrats claim to know how to solve the social and economic problems of complex modern societies But as Jeffrey Friedman argues in *Power without Knowledge* there is a fundamental flaw with technocracy it requires an ability to predict how the people whom technocrats attempt to control will act in response to technocratic policies However the mass public's ideas the ideas that drive their actions are far too varied and diverse to be reliably predicted But that is not the only problem Friedman reminds us that a large part of contemporary mass politics even populist mass politics is essentially technocratic too Members of the general public often assume that they are competent to decide which policies or politicians will be able to solve social and economic problems Yet these ordinary citizen technocrats typically regard the solutions to social problems as self evident such that politics becomes a matter of vetting public officials for their good intentions and strong wills not their technocratic expertise Finally Friedman argues that technocratic experts themselves drastically oversimplify technocratic realities Economists for example theorize that people respond rationally to the incentives they face This theory is simplistic but it gives the appearance of being able to predict people's behavior in response to technocratic policy initiatives If stripped of such gross oversimplifications though technocrats themselves would be forced to admit that a rational technocracy is nothing more than an impossible dream Ranging widely over the philosophy of social science rational choice theory and empirical political science *Power without Knowledge* is a pathbreaking work that upends traditional assumptions about technocracy and politics forcing us to rethink our assumptions about the legitimacy of modern governance

Making and Implementing Public Policy Catherine Bochel, Hugh Bochel, 2017-10-11 This brand new text examines power and inequalities and how these are central to our understanding of how policies are made and implemented It introduces the concepts and theoretical approaches that underpin the study of the policy process reflects upon key developments and applies these the practice of policy formulation and implementation

Regulation Anthony I Ogus, 2004-10-15 This is a reprint of Anthony Ogus classic study of regulation first published in the 1990s It examines how since the last decades of the twentieth century there have been fundamental changes in the relationship between the state and industry With the aid of economic theory Anthony Ogus critically examines the ways in which public law has been adapted to the task of regulating industrial activity and provides a systematic overview of the theory and forms of social and economic regulation In particular he explores the reasons why governments regulate for which broadly speaking two theoretical frameworks exist First public interest theories determine that regulation should aim to improve social and economic welfare Second economic theories suggest that regulation should aim to satisfy the demands of private interests The book also looks at the evolution of the forms of regulation in Britain extending to the policies of privatization and deregulation which were so characteristic of the period The author skilfully evaluates the advantages and disadvantages of the different forms of regulation particularly in the light of the two theoretical frameworks but also by

involving an analysis of how firms respond to the various kinds of incentives and controls offered by government A significant feature of the book is its analysis of the choices made by governments between the different forms of regulation and the influence exerted by interest groups including bureaucrats and EC law
