Self-Motioned Atomic Dialectical Materialist Logic H. Dallalbashi, 1979-07 Self-Motioned Atomic Dialectical Materialist Logic Hossein Dallalbashi, 2017-08-04 The Vantage Press which published this book in 1979 wrote this review on the book Most people think of science and philosophy as two separate and unrelated subjects The author of this book Hossein Dallalbashi shows how this need not be so and offers a through analysis of the relation between natural sciences and scientific materialistic philosophy He begins by showing how Karl Marx and Fredrick Engels took the mechanical materialist philosophy of their time and applied the idea of evolution to it thereby developing dialectical materialist logic The author points out how in order to be relevant philosophy must constantly assimilate the discoveries of natural sciences Lenin said such changes did not constitute revisionism a deviation from dialectical materialist logic but in fact were essential in Marxism The author believes the gap between science and philosophy is caused by scientists who are ignorant of scientific materialistic philosophy and philosophers who think they can continue philosophizing making sense and relating to people without having to acquire a comprehensive understanding of natural sciences and un interruptedly incorporate the new scientific discoveries into philosophy Mr Dallalbashi points out how the separation has been harmful to both Einstein claimed that his best students in atomic physics were those with having strong interest in scientific philosophy The author discusses the atomic structure as the building blocks of the Universe and how motion is inherent in all atoms He then promotes the notion of self motioned atomic dialectical materialist logic Throughout the book appropriate quotations are utilized from different famous philosophers and natural scientists supporting the author s thesis This book is scholarly and yet written in a vivid style with much original thinking by the author Books Out-of-print ,1986 **Books in Print** ,1982 Bulletin of the Atomic Scientists ,1954-05 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world **The Power of Negativity** Raya Dunayevskaya, 2002-01-01 Raya Dunayevskaya is hailed as the founder of Marxist Humanism in the United States In this new collection of her essays co editors Peter Hudis and Kevin B Anderson have crafted a work in which the true power and originality of Dunayevskaya s ideas are displayed This extensive collection of writings on Hegel Marx and dialectics captures Dunayevskaya s central dictum that contrary to the established views of Hegelians and Marxists Hegel was of signal importance to the theory and practice of Marxism The Power of Negativity sheds light not only on Marxist Humanism and the rooting of Dunayevskaya s Marxist Humanist theories in Hegel but also on the life of one of America s most penetrating and provocative critical thinkers

The Human Eros Thomas M. Alexander, 2013-07-01 In these philosophical essays a leading John Dewey scholar presents a new conceptual framework for exploring human experience as it relates to nature The Human Eros explores themes in classical American philosophy primarily the thought of John Dewey but also that of Ralph Waldo Emerson George Santayana

and Native American traditions Using these works as a critical base Thomas M Alexander suggests that human beings have an inherent need to experience meaning and value what he calls a Human Eros Our various cultures are symbolic environments or spiritual ecologies within which the Human Eros seeks to thrive This is how we inhabit the earth Encircling and sustaining our cultural existence is nature yet Western philosophy has not provided adequate conceptual models for thinking ecologically Alexander introduces the idea of eco ontology to explore ways in which this might be done beginning with the primacy of Nature over Being but also including the recognition of possibility and potentiality as inherent aspects of existence He argues for the centrality of Dewey s thought to an effective ecological philosophy Both pragmatism and naturalism he shows need to be contextualized within an emergentist relational nonreductive view of nature and an aesthetic imaginative nonreductive view of intelligence
