Self The Object World:

Object Relations in Psychoanalytic Theory Jay R. Greenberg, Stephen A. Mitchell, 1983-11-23 Object Relations in Psychoanalytic Theory provides a masterful overview of the central issue concerning psychoanalysts today finding a way to deal in theoretical terms with the importance of the patient's relationships with other people. Just as disturbed and distorted relationships lie at the core of the patient's distress, so too does the relation between analyst and patient play a key role in the analytic process. All psychoanalytic theories recognize the clinical centrality of object relations, but much else about the concept is in dispute. In their ground-breaking exercise in comparative psychoanalysis, the authors offer a new way to understand the dramatic and confusing proliferation of approaches to object relations. The result is major clarification of the history of psychoanalysis and a reliable guide to the fundamental issues that unite and divide the field. Greenberg and Mitchell, both psychoanalysts in private practice in New York, locate much of the variation in the concept of object relations between two deeply divergent models of psychoanalysis: Freud's model in which relations with others are determined by the individual's need to satisfy primary instinctual drives, and an alternative model in which relationships are taken as primary. The authors then diagnose the history of disagreement about object relations as a product of competition between these disparate paradigms. Within this framework, Sullivan's interpersonal psychiatry and the British tradition of object relations theory, led by Klein, Fairbairn, Winnicott, and Guntrip, are shown to be united by their rejection of significant aspects of Freud's drive theory. In contrast, the American ego psychology of Hartmann, Jacobson, and Kernberg appears as an effort to enlarge the classical drive theory to accommodate information derived from the study of object relations. Object Relations in Psychoanalytic Theory offers a conceptual map of the most difficult terrain in psychoanalysis and a history of its most complex disputes. In exploring the counterpoint between different psychoanalytic schools and traditions, it provides a synthetic perspective that is a major contribution to the advance of psychoanalytic thought.

Understanding Mental Objects Meir Perlow, 1995 In this definitive guide, Meir Perlow looks in detail at how the various psychoanalytic schools of thought have conceptualised mental objects. A welcome clarification of a complex but central area.

Narcissistic States and the Therapeutic Process Sheldon Bach, 1985 Dr. Bach composes diverse clinical experiences into a coherent portrait of the narcissistic patients.

The Dilemma of Modernity Lawrence E. Cahoon, 1988-01-01 The development of modern culture along subjectivist lines has led to an analogue of psychological narcissism to philosophical narcissism in the culture. The intrinsic value of human cultural activity has been lost, and the intellectual foundation of the modern world view has been destroyed. Cahoon carefully develops the idea of subjectivity and narcissism using psychological theory, the dialectical theory of the Frankfurt school, and historians. The core of his interpretive argument is developed through careful analysis of Descartes and Kant, as well as of Husserl and Heidegger. Cahoon maintains a carefully controlled continuity between the analysis of philosophic positions and what they reveal about culture. In the conclusion, he moves toward a recreation of

culture in non subjectivist naturalism Insights are drawn from Freud Fairbairne Winnicott Kohut Sennett Lasch Horkheimer Adorno Dewey Cassirer Kundera and Buchler

Rorschach Assessment of the Personality Disorders Steven K. Huprich, 2006-04-21 For decades The Rorschach Inkblot Method RIM the most popular of the projective tests has been routinely employed for personality assessment and treatment planning But in recent years it has not been free from controversy Criticisms of its validity and empirical support are catalyzing new efforts to strengthen its foundations and document its broad utility Among the most common yet also most confusing and challenging categories of clinical disorders is the personality disorders However minimal data have been available on the RIM evaluation of most of those found in DSM IV This welcomed book constitutes the first research grounded comprehensive guide to the use of the RIM in assessing personality disorders The first section offers a theoretical overview of personality disorders and constructs a framework and compelling rationale for the legitimate role of the RIM in their assessment The second third and fourth sections present Cluster A disorders paranoid schizoid and schizotypal Cluster B disorders antisocial and psychopathic borderline histrionic and narcissistic and Cluster C disorders avoidant dependent and obsessive compulsive The fifth section presents passive aggressive and depressive personality disorders currently being proposed for DSM inclusion Each chapter in these four sections includes an extensive description of the disorder a review of empirical studies of the use of the RIM to assess it an analysis of the Rorschach variables that may characterize patients diagnosed with it and a depiction of a real case and discussion of the ways in which the RIM contributed to its formulation The sixth and final section explores the relationship between psychoanalytic theory and the RIM Rorschach Assessment of the Personality Disorders brings practical help for clinicians and clinicians in training and suggests new paths for researchers seeking to advance our understanding of the complexities of these disorders

Before the Face of God Hanneke Schaap-Jonker, 2008 All over the world millions of people attend services every week and most of them will hear sermons What happens between the sermon and the listener Does the sermon become meaningful to listeners The present study in the fields of practical theology homiletics and psychology of religion combines quantitative and qualitative methods to offer an empirically based approach to the study of preaching Highlighting the psychological factors influencing how a sermon is heard this study draws theoretical insight from the works of D W Winnicott A M Rizzuto and D Bonhoeffer in its examination of the relationship between the meaning of the sermon and the hearer's God image personality and affective state

Airless Worlds and the Restoration of Psychic Breathing Steven Stern, 2025-08-11 This book focuses on the recognition and psychoanalytic treatment of a debilitating form of early relational trauma poignantly described by Steven

Stern as airless world syndrome A patient can be said to be living in an airless world when one or both parents have failed to recognize or worse actively negated their child's subjective experience and needs instead imposing their subjective reality on the child such that the child had no choice but to adopt the parents reality as their own When a child's mind is captured in this way what Stern calls identification with negation the result is an unconscious bondage to the internalized negating other which can be disabling to the senses of self personal agency and realness With extended clinical examples in every chapter Stern brings the reader into the depths of each patient's airless world and the co created needed relationship that ultimately fitfully transforms it Written in a detailed yet accessible style this book is invaluable to psychoanalysts and psychotherapists in practice and in training

Dependency Needs and Schizophrenia Richard J. Koscijew, 2012-12-06 In recent decades an increasing number of psych analytic investigators have tried to fathom the nature and origin of schizophrenia from within Unlike other psychiatric methods psycho analytic investigation of these seriously disturbed patients imposes intense stresses on the investigator there are the primitive emotions released the painfully slow process in which anxiety laden changes can be attempted by the patient and there is the constant struggle for the analyst to elucidate a pattern of significance within the at times baffling phenomena For the pioneer these endeavours are heroic and it is little wonder that few psychiatrists have ventured into these realms

Psychology in Nietzsche's Criticism of Religion Jan-Olav Henriksen, 2022-11-14 Friedrich Nietzsche claimed to be a psychologist This claim is substantiated in his criticism of religion In this book Jan Olav Henriksen provides new perspectives on Nietzsche's contribution to such criticism by applying elements from attachment theory and self psychology The result is that Nietzsche's insights into the problematic elements in religion point beyond what he was able to articulate based on the psychological resources available to him Henriksen sheds new light on the psychological dimensions in Nietzsche's individualism his understanding of God morality metaphysics and emotions and demonstrates how Nietzsche's criticism of religion is rooted in both psychological splitting and a profound loss of the orientational resources religion provided in his childhood

Sister Souls Amber R. Godey, 2011-10-26 This book focuses on the autobiographical poetry of early twentieth century author Antonia Pozzi and her lifelong friend and fellow poet Vittorio Sereni Antonia Pozzi an author whose popularity in Italy has increased dramatically in the past few years was a young girl during the First World War She was born into a wealthy and influential family and after the rise of Fascism her father was a prominent state official In 1938 Pozzi committed suicide at the age of twenty six Her major collection of poems *Parole* was published posthumously Pozzi's best friend brother and most devoted confidant Vittorio Sereni is a more recognizable figure in Italian literary history Born in 1913 a year after Pozzi he served in the Italian Army during World War II and was held in an allied prison camp in Algeria during the last years of the war While Sereni is by far the better known author his response to the war experience and particularly to imprisonment recalls Pozzi's work on a number of levels In the diaries of both authors autobiography functions as a means of constantly reasserting the self as a unique and separate individual against the totalizing forces of

Fascist propaganda **Identification and Character** Howard Kamler,1994-10-28 This book tells the reader all about psychological identification the single most important process for becoming maintaining or changing who we are as characters The book s emphasis though is decidedly on identification s role in our becoming who we are It is one thing for people to have an image of who they are or of who they would like to be it is quite another for them to actually become that image Through genuinely identifying with these sorts of things we turn what otherwise would be mere mental pictures of traits into character traits that we psychologically own Readable to laypersons as well as to academicians this book offers a new perspective for understanding the formation and nature of human character Kamler also discusses some important issues in psychoanalysis and philosophy He clarifies the current psychoanalytic debate about identification s place among the primitive processes of self development offers new ways of looking at the relationship between the infant self and the adult character and addresses topics such as personal identity and identity crisis In addition the book speaks to a current philosophical debate about the fundamental nature of self offering the author s own thesis and showing how all the protagonists in the discussion share a basically flawed position about the role that having values plays in our being persons

advanced candidates at The Chicago Institute for Psychoanalysis in 1974-75. The Chicago Institute Lectures reveal a Kohut in transition, wrestling with the creative tension in psychoanalysis between tradition and innovation, between continuity and change, even as he worked toward the psychology of the self in the broad sense that marked his decisive break from traditional psychoanalytic thought. Lightly edited by the Tolpines to preserve their authenticity, these lectures preserve the voice, the intellectual style, and the pedagogical bearing of a gifted creator in the very midst of creation. We find here a casual Kohut thinking through, in a relaxed and conversational way, the assumptions that would become foundational to mature self psychology: the developmental trajectory of self-object relationships, the role of self-object failures in different types of psychopathology, the complex relationship between givens and the psychological environment in pathogenesis, the role of conflict in normal development and in psychopathology. These are among the recurrent themes taken up in these lectures. And there are, as well, Kohut's provocative asides on the child-rearing practices of his day, including the contrast between over- and understimulation, the impact of healthy parental sexuality on child development, and the difference between the normal oedipal phase of the self and the Oedipus complex. The clinical viewpoint of mature self psychology is anticipated in many ways, perhaps no more clearly than in Kohut's powerful reassessment of the perversions. The Chicago Institute Lectures are more than a key historical document in the evolution of psychoanalytic self psychology; they preserve the voice, the intellectual style, and the pedagogical bearing of a gifted creator in the very midst of creation.
