## **Self Stabilizing Systems Proceedings:**

**Self-Stabilizing Systems** Sukumar Ghosh, Ted Herman, 1997-08-15 Self governing control is a defining characteristic of autonomous computing machinery. Autonomy implies some degree of independence and when a system's ability to achieve its mission is independent of how it is initialized, the system is self-stabilizing. Application of self-stabilization to system and network components is motivated by core concerns of fault tolerance in distributed systems. Self-stabilization is a solution to problems of transient memory faults and systems with dynamic reconfigurations. Research in self-stabilization explores many of the classic themes of distributed computing: distributed graph algorithms, mutual exclusion, distributed agreement. Recent papers combine self-stabilization with traditional forms of fault tolerance, consider methodological issues for the design of self-stabilizing systems, investigate randomized techniques, and apply stabilization to new networking models. The workshop brings together concerns from theory and practice of self-stabilization. *Self-Stabilizing Systems* Ajoy K. Datta, 2001-09-19 This book constitutes the refereed proceedings of the 5th International Workshop on Self-Stabilizing Systems WSS 2001 held in Lisbon, Portugal, in October 2001. The 14 revised full papers presented together with one invited paper were carefully reviewed and selected from 27 submissions. Self-stabilizing software offers a unique, non-traditional approach to the problem of transient fault tolerance. The papers presented explore self-stabilization issues for various different manners of systems and software, including communication protocols, cooperating mobile agents, routing in directed networks, crash-affected systems, security, and various other distributed systems and applications. **Self-stabilizing Systems**, 2003

Self-stabilization Shlomi Dolev, 2000 Shlomi Dolev presents the fundamentals of self-stabilization and demonstrates the process of designing self-stabilizing distributed systems. **Self-Stabilizing Systems** Shing-Tsaan Huang, Ted Herman, 2007-03-05 The refereed proceedings of the 6th International Symposium on Self-Stabilizing Systems SSS 2003 held in San Francisco, CA, USA, in June 2003. The 15 revised full papers presented were carefully reviewed and selected from 27 submissions. The papers address self-stabilization issues for various types of systems and software, including communication protocols, sensor networks, biological systems, and directed networks. Several new algorithms are presented.

*Self-Stabilizing Systems* Sébastien Tixeuil, Ted Herman, 2005-10-17 This book constitutes the refereed proceedings of the 7th International Symposium on Self-Stabilizing Systems SSS 2005 held in Barcelona, Spain, in October 2005. The 15 revised full papers presented were carefully reviewed and selected from 33 submissions. The papers address classical topics of self-stabilization, prevailing extensions to the field such as snap-stabilization, code-stabilization, self-stabilization with either dynamic faulty or Byzantine components, or deal with applications of self-stabilization either related to operating systems, security, or mobile and ad hoc networks. **Self-Stabilizing Systems** Shing-Tsaan Huang, Ted Herman, 2003-06-11 The refereed proceedings of the 6th International Symposium on Self-Stabilizing Systems SSS 2003 held in San Francisco, CA, USA, in June 2003.
