Self Imagery Creating Your Own Good Health:

You Are Not Your Illness Linda Topf, 1995-05-08 The author who has lived with multiple sclerosis most of her adult life delves deeply into her own experience to reveal the keys to regaining emotional and spiritual wholeness when a serious illness or injury threatens to destroy one's sense of self While serious illness injury or disability can physically alter the course of your life it can also cause great emotional upheaval It is not uncommon to feel anger frustration grief fear and denial as you try to accept a new way of living As you lose your ability to do things you once considered routine you may even feel that you are losing your self worth that your physical condition is threatening your identity Through a step by step process designed to show that real healing has little to do with the state of the physical body Noble Topf offers a compassionate and inspirational message to anyone whose sense of self is threatened by physical limitations Deep Healing Emmett E. Miller, M.D., 1996-12-01 Deep Healing brings new hope to every reader It awakens even the most skeptical among us to the miraculous inborn self healing capacities of our mind body Emmett Miller M D practicing as a traditional family doctor for 20 years discovered that when a part of your body is sick the whole body system is out of balance He saw that how his patients thought about and saw life affected and seemed to create whatever their current state of health was He has stated that it is not enough to heal the particular illness without understanding the emotional and psychological basis for the ailment or problem We must heal the entire person not just a specific part Dr Miller has had great success with guided imagery to promote physical health and emotional well being He has even been successful using guided imagery to do minor surgery without any anesthetic again proving the mind body connection and the control of our bodies by our thoughts Through the presentation of stories reflections and case studies Dr Miller presents his wonderful deep healing theories that will instill a new sense of hope and optimism into all who read this book **Practical Stress Management** John A. Developing Self Without Sight William F. Cavitt, 2006-06-23 A child sighted or blind is born into this world with all the building blocks for what they can become This physical material is impacted by the child's environment over a life time while the self evolves The self is the same in blind children as it is in the sighted only the developmental process is different Both children have the same starting materials mind body and spirit With these parts the child develops a process of thinking feeling and behaving toward other people objects and situations and they recognize that others also think feel and behave in their environment It is with their thoughts emotions and actions that children relate to their world using physical emotional cognitive social and moralistic attributes and through this interrelationship the self evolves The self is everything that exists in a person's unique world and it exists because of their self concept and self esteem Aspects of self concept are the elements of well being that assist our survival in our environment They consist of all the physical things our personality feelings toward life our knowledge and problem solving techniques how we successfully interface with others and our social and spiritual values in life If our self concept contains the important things and issues in life and there is a high regard for them then our self will evolve in a manner conducive to peace and harmony If not the opposite will occur The blind child must build a self with a missing part Granted self will evolve for a blind child but it must be augmented by all other senses of the body in order to enhance the mind and spirit A blind child's thoughts feelings and behaviors serve the same purpose as they do for a sighted child but will evolve differently The physical emotional cognitive social and moral concepts are necessary but are obtained without the benefit of the automatic process of seeing The self evolves but the conduit for inputting their environment is different for a blind child This is the story of a four year blind boy named Cavitt and how his self is evolving His adventures can be used to assist other blind children develop their self The book vividly illustrates psychology of a blind child as he lives this psychology It is the development of a self that is Cavitt
