**The Reflexive Initiative** Stanley Raffel, Barry Sandywell, 2016-03-31 The Reflexive Initiative is an authoritative intervention in the practice and tradition of reflexive social theory. It demonstrates the importance of the reflexive imperative not only in the investigation of everyday life but across a wide range of human sciences and philosophical perspectives. Forty years after the publication of *On the Beginning of Social Inquiry*, the chapters in this collection range from re-appraisals of earlier essays on topics such as reunions, rethinking art and ex-pats to contributions emphasising the opening of radical dialogues with other reflexive traditions and perspectives. These include psychoanalysis, Lacan, Hegel, Rene Girard, Daseinanalysis, dialectical method, critical feminism and the dialogical tradition. In this dialogical spirit, the book contributes to the continuing project of analytic theorizing associated with the work of Alan Blum and Peter McHugh and the recent turn to more existential topics and politically engaged forms of reflexive research. It will be of particular use to students working in interpretive traditions of sociology, Critical theory, Postmodern thought and debates associated with reflexivity and dialectics in other disciplines and research programmes.

**Reflexivity And The Crisis of Western Reason** Barry Sandywell, 2013-06-17 This ground-breaking work explores the genealogical analysis of the discourses of reflection. Barry Sandywell traces the differences between the traditional discourses of reflection and the experiences of reflexivity in everyday social and philosophical thought. Brilliantly organised and abounding with astonishing insights, *Reflexivity and the Crisis of Western Reason* offers a fundamental challenge to our normal ways of viewing social thought.

**The Art and Science of Personalising Care with Older People with Diabetes** Trisha Dunning, 2018-08-06 This unique book is intended for all health professionals caring for older people with diabetes, such as specialist and general nurses, doctors, primary care practitioners and dietiticians. Although there is an increasing body of work about personalised care, no publications were identified that encompass the focus and scope of the proposed book. The global population is ageing and increasing age is a key risk factor for diabetes. Older people with diabetes are often vulnerable, have complex care needs and often have cognitive changes which makes personalising care challenging for health professionals. Thus, this is an internationally relevant book filling a gap in the current literature. This is a practical and updated book that will use an engaging and easy-to-read narrative style. It challenges readers to reflect in and on their practice. It encompasses people with diabetes and authors' stories which are known to have a special interest to readers, making it easier to apply the information to practice, enhance learning and hence the relevance and value of the book. It is relevant to advocacy organisations as well as managers and service planners. Researchers and scientists may find relevant information on grant and ethics applications, research protocols, plain language statements for potential participants and operationalising research protocols.
