Self-regulation of Learning and Performance Dale H. Schunk, Barry J. Zimmerman, 2009. In recent years, educators have become increasingly concerned with students' attempts to manage their own learning and achievement efforts through activities that influence the instigation, direction, and persistence of those efforts. In 1989, Zimmerman and Schunk edited the first book devoted to this topic. They assembled key theorists offering a range of perspectives on how students self-regulate their academic functioning. One purpose of that volume was to provide theoretical direction to ongoing as well as nascent efforts to explore academic self-regulatory processes. Since that date, there has been an exponential surge in research. This second volume on academic self-regulation offers the fruits of the first generation of research. It also addresses a number of key issues that have arisen since then, such as how self-regulation differs from such related constructs as motivation and metacognition, and whether students can be taught self-regulatory skills. The contributors reveal an interesting, uplifting, and at times disturbing picture of how students grapple with the day-to-day problems of achieving in circumstances with inherent limitations and obstacles. This volume provides insight into the source of students' capabilities to surmount adversities, the origins of their self-initiated processes designed to improve learning, motivation, and achievement. The text is organized on the basis of a conceptual framework that analyzes academic self-regulation into four major dimensions. That model is presented in the first chapter, and key processes that influence each of these dimensions are discussed by prominent researchers in the chapters that follow. Because each chapter is written to follow a common format, this work provides a level of continuity and parsimony normally found only in authored textbooks.

Handbook of Self-Regulation of Learning and Performance Dale H. Schunk, Barry J. Zimmerman, 2011-05-15. Self-regulated learning or self-regulation refers to the process whereby learners personally activate and sustain cognitions, affects, and behaviours that are systematically oriented toward the attainment of learning goals. This is the first volume to integrate into a single volume all aspects of the field of self-regulation of learning and performance: basic domains, applications to content areas, instructional issues, methodological issues, and individual differences. It draws on research from such diverse areas as cognitive, educational, clinical, social, and organizational psychology. Distinguishing features include: Chapter Structure. To ensure uniformity and coherence across chapters, each chapter author addresses the theoretical ideas underlying their topic, research evidence bearing on these ideas, future research directions, and implications for educational practice. International. Because research on self-regulation is increasingly global, a significant number of international contributors are included (see table of contents). Readable. In order to make the book accessible to students, chapters have been carefully edited for clarity, conciseness, and organizational consistency. Expertise. All chapters are written by leading researchers from around the world who are highly regarded experts on their particular topics and are active contributors to the field.

psychology This book pulls together theory research and applications in the self regulation domain and provides broad coverage of conceptual methodological and treatment issues In view of the burgeoning interest and massive research on various aspects of self regulation the time seems ripe for this Handbook aimed at reflecting the current state of the field The goal is to provide researchers students and clinicians in the field with substantial state of the art overviews reviews and reflections on the conceptual and methodological issues and complexities particular to self regulation research Coverage of state of the art in self regulation research from different perspectives Application of self regulation research to health clinical organizational and educational psychology Brings together in one volume research on self regulation in different subdisciplines Most comprehensive and penetrating compendium of information on self regulation from multi disciplinary perspectives

Social and Emotional Aspects of Learning Sanna Jarvela, 2011-01-07 Social and emotional aspects of schooling and the learning environment can dramatically affect one's attention understanding and memory for learning This topic has been of increasing interest in both psychology and education leading to an entire section being devoted to it in the third edition of the International Encyclopedia of Education Thirty three articles from the Encyclopedia form this concise reference which focuses on such topics as social and emotional development anxiety in schools effects of mood on motivation peer learning and friendship and social networks Saves researchers time in summarizing in one place what is otherwise an interdisciplinary field in cognitive psychology personality sociology and education Level of presentation focuses on critical research leaving out the extraneous and focusing on need to know information Contains contributions from top international researchers in the field Makes MRW content affordable to individual researchers

The Pursuit of Excellence Through Education Michel Ferrari, 2001-12 Although specific definitions may change over time few goals are considered more important to education than the pursuit of academic excellence There are many different viewpoints on this issue today among educational psychologists and other social scientists One particularly glaring fault line in the debate divides those who emphasize developing individual learning and those who focus on promoting cultural and institutional reform These two perspectives are rarely addressed in a single volume In this book well known theorists and researchers present a range of perspectives on how to promote excellence in education This allows those who stress transformation of educational practice and those who emphasize individual abilities to speak to each and invites readers to jointly consider the arguments for both positions or for some synthesis of the two The point is to consider how these two divergent viewpoints can be reconciled or simply coordinated in an effort to benefit both students and society at large The main thesis is that excellence can be fostered without sacrificing equity both of which are fundamental tenets of a democratic education The issues addressed in this book have implications and relevance for school reform efforts and across the fields of educational psychology curriculum and instruction philosophy of education and educational leadership The volume provides a unique source for students and teachers in various disciplines who want to gain a broader and more integrated view of the nature and development of

excellence through education **Self-regulated Learning** Dale H. Schunk,Barry J. Zimmerman,1998-03-20 This text provides a framework for teaching students how to be students and offers practical guidance on how academic learning at its best can be brought about **The SAGE Encyclopedia of Educational Technology** J. Michael Spector,2015-01-29 The SAGE Encyclopedia of Educational Technology examines information on leveraging the power of technology to support teaching and learning While using innovative technology to educate individuals is certainly not a new topic how it is approached adapted and used toward the services of achieving real gains in student performance is extremely pertinent This two volume encyclopedia explores such issues focusing on core topics and issues that will retain relevance in the face of perpetually evolving devices services and specific techniques As technology evolves and becomes even more low cost easy to use and more accessible the education sector will evolve alongside it For instance issues surrounding reasoning behind how one study has shown students retain information better in traditional print formats are a topic explored within the pages of this new encyclopedia Features A collection of 300 350 entries are organized in A to Z fashion in 2 volumes available in a choice of print or electronic formats Entries authored by key figures in the field conclude with cross references and further readings A detailed index the Reader s Guide themes and cross references combine for search and browse in the electronic version This reference encyclopedia is a reliable and precise source on educational technology and a must have reference for all academic libraries [The Factors Effecting Student Achievement](#) Engin Karadağ,2017-05-14 This book focuses on the effect of psychological social and demographic variables on student achievement and summarizes the current research findings in the field It addresses the need for inclusive and interpretive studies in the field in order to interpret student achievement literature and suggests new pathways for further studies Appropriately a meta analysis approach is used by the contributors to show the big picture to the researchers by analyzing and combining the findings from different independent studies In particular the authors compile various studies examining the relationship between student achievement and 21 psychological social and demographic variables separately The philosophy behind this book is to direct future research and practices rather than addressing the limits of current studies **Handbook of Academic Learning** Gary D. Phye,1997-01-08 The Handbook of Academic Learning provides a comprehensive resource for educational and cognitive psychologists as well as educators themselves on the mechanisms and processes of academic learning Beginning with general themes that cross subject and age level the book discusses what motivates students to learn and how knowledge can be made personal for better learning and remembering Individual chapters identify proven effective teaching methods for the specific domains of math reading writing science and critical problem solving how students learn within those domains and how learning can be accurately assessed for given domains and age levels The Handbook takes a constructivist perspective to academic learning emphasizing the construction of personal knowledge of an academic nature Constructivism within the context of learning theory is viewed as involving an active learner that constructs an academic knowledge base through the

development of cognitive strategies and metacognition The book discusses the development of basic literacy skills that provide the foundation for higher order thinking and problem solving Constructivism recognizes the social dimension of classroom learning and emphasizes the motivational elements of self regulation and volition as essential learner characteristics Written by authors who have first hand experience with both theory development and the development of authentic classroom instructional techniques the Handbook empowers educators to develop implement and field test authentic instructional practices at their school site The book provides a review of the literature theory research and skill techniques for effective teaching and learning Identifies effective teaching with specific techniques Covers elementary school through high school Discusses teaching methods for all main subject areas reading writing math science and critical thinking Identifies how students learn to learn Reviews theory research techniques and assessment Contains field tested examples for the educational professional at the school site Provides a resource for staff development
