**Embodied Aesthetics in Drama Education** Matthew DeCoursey, 2018-12-13 If it is a good thing to use drama for education there must be something specific about drama that makes it good for the purpose It has power of some kind it makes things meaningful that would otherwise be meaningless or things memorable that would otherwise be forgettable Or perhaps it enables independent thought in an area that would otherwise become mere rote learning Many practitioners believe that drama has the power to develop learner autonomy or even to give learners power over their lives In the last twenty years a widespread view has developed that this something that creates the benefit of drama is aesthetics There are many views of aesthetics but what unites them is the special significance that art has for our lives This book is about the relation between aesthetics and education in the use of drama Within it philosophy appears as the essential connecting discipline between the practice of arts based education and our advancing knowledge of the interrelations of cognition emotion and embodiment Matthew DeCoursey argues that the power of dramatic art is to be found in its bodily emotional nature Drawing on recent work in the aesthetics of theatre he shows that much of the power of theatre can be attributed to a

specific range of ideas and techniques notably including double meaning making aesthetic focus and dramatic tension Finally the author relates different forms of drama education to different educational results holding that the conventional improvised forms are neither superior nor inferior to scripted theatre but merely serve different purposes Among those educational results discussed are the emancipation sought both by Rancière and by many practitioners of applied theatre but also curricular areas including language education
