Adolescents on Music Elizabeth Cassidy Parker, 2020 Many can attest to the importance of the self growth that occurs for young people through the arts and their accompanying communities of support understanding and caring Yet even professionals who work daily with adolescents and parents or guardians who raise adolescents sometimes have difficulty collectively articulating why musicking experiences are important for young people In *Adolescents on Music* author Elizabeth Cassidy Parker proves that this challenge stems from failing to ask adolescents to share their ideas richly and fully Accordingly Parker argues for deeper efforts to connect adolescent perspectives with established theories and philosophies in the social sciences and humanities Organized into three sections Who I Am My Social Self and Toward a Future Vision

Parker seeks new and diverse perspectives from the young people sharing their voices and experiences in each chapter. Chapters begin with a description from adolescents in their own words of the music they make, the meanings they ascribe to their music making and contributions to their development. The voices highlighted in these chapters come from adolescent solo musicians, autonomous and vernacular players, composers, school and community music makers and listeners between the ages of 12-20. By familiarizing readers with the multiplicity of adolescent music making experiences and perspectives, discussing relevant theories within and outside of music and music education that support adolescent musical and personal growth, promoting adolescent health and well-being and greater understanding of young people and providing a common language toward advocacy for adolescent music making, *Adolescents on Music* serves as an invaluable resource for individual and group music teachers and practitioners, parents of adolescents, music mentors and music education students.

Is creativity essentially mysterious? Is creativity essentially inspirational or rationalistic? What role does skill play in creativity? What are the criteria of creativity? Should we assign logical priority to creative persons, creative processes or creative products? How do forms of creativity relate to different domains of human activity? How does creativity relate to self-transformation? How does our knowledge of the circumstances of creativity affect our appreciation of its products? Can a recipient of a creative work also be a creator of it? Contributors include Margaret Boden, Larry Briskman, John M. Carvalho, David Davies, Berys Gaut, Rom Harré, Carl R. Hausman, Albert Hofstadter, Arthur Koestler, Michael Krausz, Peter Lamarque, Thomas Leddy, Paisley Livingston, Michael Polanyi, Dean Keith Simonton and Francis Sparshott.
