Semantics, Culture, and Cognition Anna Wierzbicka,2023 This study ranges across a wide variety of languages and cultures in an attempt to identify concepts which are truly universal and to explore whether certain words are culture specific **Frontiers of Language and Teaching: Proceedings of the 2010 International Online Language**

Conference (IOLC 2010) Azadeh Shafaei,2010-12-27 This collection is comprised of papers submitted to the 3rd International Online Language Conference IOLC held in September 2010 IOLC 2010 was a two day conference which aimed to provide a forum for academics practitioners experts and students to debate current international issues and challenges in the broad area of language learning and teaching This annual world renowned conference takes place over the internet allowing participants to save accommodation and flight expenses and at the same time helping to save our planet by reducing CO2 emissions All submitted papers went through a double blind review process before a decision was made This was to ensure the quality level of the conference is kept high Semantics : Primes and Universals Anna Wierzbicka,1996-03-28

This book provides a synthesis of Wierzbicka s theory of meaning which is based on conceptual primitives and semantic universals using empirical findings from a wide range of languages While addressed primarily to linguists the book deals with highly topical and controversial issues of central importance to several disciplines including anthropology psychology and philosophy Conceptual primitives and semantic universals are the cornerstones of a semantic theory which Anna Wierzbicka has been developing for many years **Semantics Primes and Universals** is a major synthesis of her work presenting a full and systematic exposition of that theory in a non technical and readable way It delineates a full set of universal concepts as they have emerged from large scale investigations across a wide range of languages undertaken by the author and her colleagues On the basis of empirical cross linguistic studies it vindicates the old notion of the psychic unity of mankind while at the same time offering a framework for the rigorous description of different languages and cultures A major synthesis of Anna Wierzbicka s work **Relative Points of View** Magda Stroinska,2001 The relationship between language and various kinds

of non linguistic behavior has been of great fascination for many of those working in the fields of cultural anthropology linguistics and philosophy or broadly understood cultural studies The authors in this volume explore this relationship in a number of cultures and social contexts and discuss the problem of linguistic relativism and its application to several areas of social interaction across cultures The authors deal with such questions as how language and culture intersect resulting in different points of view on reality that are all equally authentic and rooted in experience The question of the influence of language and culture on our perceptino of physical and social reality is re examined for such domains as politics commerce

working with people religion and gender relations **Keyness in Texts** Marina Bondi, Mike Scott, 2010-11-11 This is corpus linguistics with a text linguistic focus The volume concerns lexical inequality the fact that some words and phrases share the quality of being key and thereby reflect or promote important themes in some textual contexts while others do not The patterning of words which differ in their centrality to text meaning is of increasing interest to corpus linguistics At the same time software resources are yielding increasingly more detailed ways of identifying and studying the linkages between key words and phrases in text databases This volume brings together work from some of the leading researchers in this field It presents thirteen studies organized in three sections the first containing a series of studies exploring the nature of keyness itself then a set of five studies looking at keyness in specific discourse contexts and then three studies with an educational focus *The Semantics of Nouns* Zhengdao Ye, 2017 This volume brings together the latest research on the semantics of nouns in a variety of familiar and less well documented languages It offers detailed analyses of individual nouns across a range of conceptual domains including people places and living things with each analysis fully grounded in a unified methodological framework **Meaning, Life and Culture** Helen Bromhead, Zhengdao Ye, 2020-12-17 This book is dedicated to Anna Wierzbicka one of the most influential and innovative linguists of her generation Her work spans a number of disciplines including anthropology cultural psychology cognitive science philosophy and religious studies as well as her home base of linguistics She is best known for the Natural Semantic Metalanguage NSM approach to meaning a versatile tool for exploring big questions concerning the diversity and universals of people's experience in the world In this volume Anna Wierzbicka's former students old and current colleagues kindred spirits and sparring partners engage with her ideas and diverse body of work These authors cover topics from the grammar of action verbs to cross cultural pragmatics and over 30 languages from around the world are represented The chapters in Part 1 focus on the NSM approach and cover four themes lexico grammatical semantics cultural keywords semantics of nouns and emotion In Part 2 the contributors connect with a meaning based approach from their own intellectual perspectives including syntax anthropology cognitive linguistics and sociolinguistics The deep humanistic perspective wide ranging themes and interdisciplinary nature of Wierzbicka's research are reflected in the contributions The common thread running through all chapters is the primacy of meaning to the understanding of language and culture The Palgrave Handbook of Chinese Language Studies Zhengdao Ye, 2022-07-30 This new major reference work provides a comprehensive overview of linguistic phenomena in a variety of Sinitic languages in a global context highlighting the dynamic interaction between these languages and English This living reference work offers a window into the linguistic sphere in China and beyond and showcases the latest research into diverse and evolving linguistic phenomena that have resulted from intensified interactions between the Sinophone world and other lingua spheres The Handbook is divided into five sections The chapters in Section I New Research Trends in Chinese Linguistic Research present fast growing research areas in Chinese linguistics particularly those undertaken by scholars based in China Section

II Interactions of Sinitic Languages focuses on language contact situations inside and outside China The chapters in Section III Meaning Culture Translation explore the meanings of key cultural concepts and how ideas move between Chinese and English through translation across various genres Section IV New Trends in Teaching Chinese as a Foreign Language covers new ideas and practices relating to teaching the Chinese language and culture The final section Section V Transference from Chinese to English explores dynamic interactions between varieties of Chinese and varieties of English as they play out in multilingual sites and settings

Metaphor Networks R. Trim, 2007-09-19 *Metaphor Networks* focuses on the historical evolution of metaphor and proposes new theories on language change based on substantial empirical data It explores how the metaphors of today are very often linked to images existing in the past and traces metaphor paths back to the Middle Ages and Antiquity The findings reveal that regular patterns of evolution emerge and the aims of the book are to find out what lies behind these patterns

Speaking of Emotions Angeliki Athanasiadou, Elzbieta Tabakowska, 2010-11-22 No detailed description available for *Speaking of Emotions*

Heart- and Soul-Like Constructs across Languages, Cultures, and Epochs Bert Peeters, 2019-01-14 All languages and cultures appear to have one or more mind like constructs that supplement the human body Linguistic evidence suggests they all have a word for someone and another word for body but that doesn't mean that whatever else makes up a human being i.e. someone apart from the body is the same everywhere Nonetheless the Anglo mind is often reified and thought of in universal terms This volume adds to the literature that denounces such reification It looks at Japanese Longgu an Oceanic language Thai and Old Norse Icelandic spelling out in a culturally neutral Natural Semantic Metalanguage NSM how the mind like constructs in these languages differ from the Anglo mind

Cross-linguistic Semantics Cliff Goddard, 2008 *Cross linguistic semantics* investigating how languages package and express meanings differently is central to the linguistic quest to understand the nature of human language This set of studies explores and demonstrates cross linguistic semantics as practised in the natural semantic metalanguage NSM framework originated by Anna Wierzbicka The opening chapters give a state of the art overview of the NSM model propose several theoretical innovations and advance a number of original analyses in connection with names and naming clefts and other specificational sentences and discourse anaphora Subsequent chapters describe and analyse diverse phenomena in ten languages from multiple families geographical locations and cultural settings around the globe Three substantial studies document how the metalanguage of NSM semantic primes can be realised in languages of widely differing types Amharic Ethiopia Korean and East Cree Each constitutes a lexicogrammatical portrait in miniature of the language concerned Other chapters probe topics such as inalienable possession in Koromu Papua New Guinea epistemic verbs in Swedish hyperpolysemy in Bunuba Australia the expression of momentariness in Berber ethnogeometry in Makasai East Timor value concepts in Russian and virtuous emotions in Japanese This book will be valuable for linguists working on language description lexical semantics or the semantics of grammar for advanced students of linguistics and for others interested in

language universals and language diversity Semantic Intelligence Sarika Jain,Sven Groppe,Bharat K. Bhargava,2023-03-31 This book constitutes refereed proceedings of the 2nd International Semantic Intelligence Conference ISIC 2022 This book covers a wide range of topics including semantic web engineering ontology based data access multimodal and multilingual access machine to machine communications and interoperability knowledge extraction and ontology learning from the web computational paradigms and computational intelligence distributed and mobile systems and many others This book includes novel contributions and the latest developments from researchers across industry and academia This book serves as a valuable reference resource for academics and researchers across the globe Culture, Body, and Language Farzad Sharifian,René Dirven,Ning Yu,Susanne Niemeier,2008-11-03 One of the central themes in cognitive linguistics is the uniquely human development of some higher potential called the mind and more particularly the intertwining of body and mind which has come to be known as embodiment Several books and volumes have explored this theme in length However the interaction between culture body and language has not received the due attention that it deserves Naturally any serious exploration of the interface between body language and culture would require an analytical tool that would capture the ways in which different cultural groups conceptualize their feelings thinking and other experiences in relation to body and language A well established notion that appears to be promising in this direction is that of cultural models constituting the building blocks of a group s cultural cognition The volume results from an attempt to bring together a group of scholars from various language backgrounds to make a collective attempt to explore the relationship between body language and culture by focusing on conceptualizations of the heart and other internal body organs across a number of languages The general aim of this venture is to explore a the ways in which internal body organs have been employed in different languages to conceptualize human experiences such as emotions and or workings of the mind and b the cultural models that appear to account for the observed similarities as well as differences of the various conceptualizations of internal body organs The volume as a whole engages not only with linguistic analyses of terms that refer to internal body organs across different languages but also with the origin of the cultural models that are associated with internal body organs in different cultural systems such as ethnomedical and religious traditions Some contributions also discuss their findings in relations to some philosophical doctrines that have addressed the relationship between mind body and language such as that of Descartes *The Life of the Mind in Old English Poetry* Antonina Harbus,2021-11-15 Ideas about the human mind are culturally specific and over time vary in form and prominence The Life of the Mind in Old English Poetry presents the first extensive exploration of Anglo Saxon beliefs about the mind and how these views informed Old English poetry It identifies in this poetry a particular cultural focus on the mental world and formulates a multivalent model of the mind behind it as the seat of emotions the site of temptation the container of knowledge and a heroic weapon The Life of the Mind in Old English Poetry treats a wide range of Old English literary genres in the context of their Latin sources and

analogues where applicable in order to discover how ideas about the mind shape the narrative didactic and linguistic design of poetic discourse Particular attention is paid to the rich and slippery vernacular vocabulary for the mind which suggests a special interest in the subject in Old English poetry The book argues that Anglo Saxon poets were acutely conscious of mental functions and perceived the psychological basis not only of the cognitive world but also of the emotions and of the spiritual life

Working at the Interface of Cultures Michael Harris Bond, 2015-07-30 Behind the mask of objective science lie the dynamics of what happens to scientists who go to live and work in another culture Those who work and study in an alien culture often find themselves changed in ways that affect their scientific work How does this challenge stimulate provoke suggest and inspire advances and novelty in their theories methods and instruments Originally published in 1997 each of the essays in this title explores these issues through the experiences of a distinguished practitioner describing the process of intellectual growth and development Chosen for their extensive experience with people holding a different worldview the authors have all achieved renown for their contributions to the social science of culture

Advances in Cultural Linguistics Farzad Sharifian, 2017-05-02 This groundbreaking collection represents the broad scope of cutting edge research in Cultural Linguistics a burgeoning field of interdisciplinary inquiry into the relationships between language and cultural cognition The materials surveyed in its chapters demonstrate how cultural conceptualisations encoded in language relate to all aspects of human life from emotion and embodiment to kinship religion marriage and politics even the understanding of life and death Cultural Linguistics draws on cognitive science complexity science and distributed cognition among other disciplines to strengthen its theoretical and analytical base The tools it has developed have worked toward insightful investigations into the cultural grounding of language in numerous applied domains including World Englishes cross cultural intercultural pragmatics intercultural communication Teaching English as an International Language TEIL and political discourse analysis
