Social and Physical Ecologies for Child Resilience: Wisdom from Asia and Africa Haibin Li, Guanglun

Michael Mu, Linda Theron, 2023-11-16 Since Emmy Werner and her team discovered on the Hawaiian island of Kauai the invincible children who fared well despite exposure to significant household risks there has been proliferating research on child resilience as a positive response to adverse conditions. The past five decades have seen significant advancements in and diverse approaches to understanding challenges, facilitative factors and positive outcomes in the resilience process that involve children. Despite existing and continuously emerging modelings and framings there appears a common understanding that child resilience unfolds through the interactions between individuals and the environments surrounding them. This Research Topic therefore takes an ecological approach to child resilience. While ecologies constitute social spaces that nurture child resilience they can also refer to the physical environments surrounding children. There has been robust empirical evidence suggesting resilience is a shared capacity of the individual and the social ecology e.g. families, schools and communities and more recently of the individual and the physical ecology e.g. the built or natural environment. **Theory and Practice in the Bioarchaeology of Care** Lorna Tilley, 2015-08-28 This book provides the first comprehensive introduction to and explanation of the theory and practice of the bioarchaeology of care, an original fully theorised and contextualised case study based approach designed to identify and interpret cases of care provision in prehistory. The applied methodology comprises four stages of analysis each building on the content of the preceding one(s) which provide the framework for this process. Theory and Practice in the Bioarchaeology of Care is the primary source of information on this new approach and serves as a manual for its implementation. It elaborates the foundations on which the bioarchaeology of care is constructed; it leads the reader through the methodology and it provides three detailed examples of prehistoric caregiving which illustrate how bioarchaeology of care analysis has the capacity to reveal aspects of past group and individual identity and lifeways which might otherwise have remained unknown. **Social Bioarchaeology** Sabrina C. Agarwal, Bonnie A. Glencross, 2011-03-21 Illustrates new methodological directions in analyzing human social and biological variation. Offers a wide array of research on past populations around the globe. Explains the central features of bioarchaeological research by key researchers and established experts around the world. **Bioarchaeology** Clark Spencer Larsen, 2015-03-30 A synthetic treatment of the study of human remains from archaeological contexts for current and future generations of bioarchaeologists. **BodySpace** Stephen Pheasant, Ph.D., 2002-05 This edition has been revised to bring fresh insights into the principles and practice of anthropometrics, workspace design, sitting and seating, hands and handles, ergonomics in the office, ergonomics in the home and health and safety at work. **Introduction to Physical Anthropology**, 2012 **Fieldiana**, 1995 **Buried Alive** Jack Cuozzo, 1998 Argues that Neanderthal skeletons are the remains of post flood, very old biblical patriarchs.
