Fiscal Determinants of Domestic Sovereign Bond Yields in Emerging Market and Developing Economies Manabu Nose, Jeta Menkulasi, 2025-03-28 Domestic sovereign bonds have become a growing source of government financing in Emerging Market and Developing Economies EMDEs This paper investigates the role of fiscal policies in determining domestic bond yields and how this relationship varies depending on the debt structure Specifically the analysis highlights the interaction of fiscal policy with banking sector leverage and foreign investor holdings for government debt A 1 percentage point increase in expected primary deficits results in a persistent increase in 10 year domestic bond yield by around 36 basis points over 2.5 years with larger effects observed during the COVID 19 pandemic This contrasts with external bond spreads which are more sensitive to external and global risk factors The greater the reliance on domestic banks for deficit financing the stronger the impact of loose fiscal policy on domestic bond yields The shift in domestic debt financing towards domestic banks after the pandemic implies that sovereign yields have been increasingly interlinked with domestic banks investment behavior implying

potential financial sector risks in major EMDEs
