Brighter than Scale, Swifter than Flame Neon Yang, 2025-05-06 With an armored oath bound hero reminiscent of The Mandalorian and the Asian inspired epic fantasy of She Who Became the Sun Neon Yang's Brighter than Scale Swifter than Flame is a stunning queer novella about a dragon hunter finding home with a dragon queen Few know the true identity of the masked guildknight of Mithrandon She barely remembers herself The masked guildknight Yeva was thirteen when she killed her first dragon With her gift revealed she was shipped away to the imperial capital to train in the rare art of dragon slaying Now a legendary dragon hunter she has never truly felt at home nor removed her armor in public since that fateful day all those years ago Yeva must now go to Quanbao a fiercely independent and reclusive kingdom It is rumored that there dragons are not feared as is right and proper but instead loved and worshipped It is rumored that there they harbor a dragon behind their borders While Yeva searches for the dreaded beast she is welcomed into the palace by Quanbao's monarch Lady Sookhee Though wary of each other Yeva is shocked to find herself slowly opening up to the beautiful mysterious queen As they grow closer Yeva longs to let Lady Sookhee see the person behind the armor but she knows she must fulfill her purpose and slay the dragon Ultimately she must decide who or what she is willing to betray her own heart or the sacred duty that she has called home for so long At the Publisher's request this title is being sold without Digital Rights Management Software DRM applied **Pathogen-Host Interactions: Antigenic Variation v. Somatic Adaptations** Ellen Hsu, Louis Du Pasquier, 2015-11-04 This volume provides in depth reviews of model systems that exemplify the arms race in host pathogen interactions Somatic adaptations are responsible for the individualization of biological responses to the environment and the continual struggle between host immune systems and invading pathogens has given rise to

corresponding processes that produce molecular variation Whether in mollusks or human beings various host somatic mechanisms have evolved independently providing responses to counter rapidly changing pathogens The pathways they utilize can include non heritable changes involving RNA and post translational modifications or changes that produce somatic DNA recombination and mutation For infectious organisms such as protozoans and flatworms antigenic variation is central to their survival strategy Evolving the ability to evade the host immune system not only increases their chances of survival but is also necessary for successful re infection within the host population
