Model Perspectives: Structure, Architecture and Culture Mark R. Cruvellier, Bjorn N.

Sandaker, Luben Dimcheff, 2017-09-25 This book contains a unique collection of various perspectives on the relationship between structures and the forms and spaces of architecture As such it provides students and professionals alike with an essential sourcebook that can be mined for visual inspiration as well as for textually rich and authoritative insight into the links between structure architecture and cultural context The chapters address fundamental structural elements and systems columns walls beams trusses frames tensile structures arches domes and shells Each chapter is subdivided into two parts The essays introduce the chapters with the reprinting of a curated set of essays and excerpts by various authors that uniquely address how particular structural elements or systems relate in essential fashion to architectural design concepts The model studies physical models of the overall structural systems of several notable contemporary buildings from Europe North and South America Africa and Asia are illustrated with large photographs detail close ups and views of their external forms and internal spaces that establish the exceptional qualities of these projects in connecting structural form to architectural design objectives Mosaic layouts complete the chapters with a collection of photographs of yet more models whose particular details and unique features serve to extend the visual repertoire of the structural type being considered The combination juxtaposition and mutual positive reinforcement of these two collections one largely textual and the other image

based provides the reader with unique and multifaceted insights into how structural forms and systems can be related to architectural design intentions Conveyed by a strong and deliberate graphical design format this assembly of materials gets to the very essence of structures within the context of architecture and will inspire students and practitioners alike to make strategic design decisions for their own projects Modernity and the Architecture of Mexico Edward R. Burian, 2010-06-28 Since the mid 1970s there has been an extraordinary renewal of interest in early modern architecture both as a way of gaining insight into contemporary architectural culture and as a reaction to neoconservative postmodernism This book undertakes a critical reappraisal of the notion of modernity in Mexican architecture and its influence on a generation of Mexican architects whose works spanned the 1920s through the 1960s Nine essays by noted architects and architectural historians cover a range of topics from broad based critical commentaries to discussions of individual architects and buildings Among the latter are the architects Enrique del Moral Juan O Gorman Carlos Obregón Santacilia Juan Segura Mario Pani and the campus and stadium of the Ciudad Universitaria in Mexico City Relatively little has been published in English regarding this era in Mexican architecture Thus *Modernity and the Architecture of Mexico* will play a groundbreaking role in making the underlying assumptions ideological and political constructs and specific architect's agendas known to a wide audience in the humanities Likewise it should inspire greater appreciation for this undervalued body of works as an important contribution to the modern movement **Luis Barragán** Keith Eggner, 1991 **Architectural Graphics** Manuel A. Ródenas-López, José Calvo-López, Macarena Salcedo-Galera, 2022-05-03 This book reports on several advances in architectural graphics with a special emphasis on education training and research It gathers a selection of contributions to the 19th International Conference on Graphic Design in Architecture EGA 2022 held on June 2-4 2022 in Cartagena Spain with the motto Beyond drawings The use of architectural graphics **Luis Barragán: the Quiet Revolution** Federica Zanco, 2001 Luis Barragán was one of the most extraordinary figures in international architecture between the 1930s and the 1970s His work offers a unique interpretation of international modern architecture from the perspective of the Mexican landscape **El proceso creativo** Alberto Dallal, 2006 Papers presented during the 26th edition of the International Colloquium of Art History an event focused on the study of the creative activity in architecture and art from the creator's point of view analyzing the artists their influences and development the external elements that intervene in the creation of art and ultimately in the understanding of the creative process *El contenido expresivo en la obra de Enrique Triana* Rafael Vega, 2007 The present study explores the serious and consistent architecture of Enrique Triana b Colombia 1929 The author uses the residential project Casa Triana House Triana to identify in it the formal and persistent elements that characterize all his projects and that reflect the strong influence of famous American architect Frank Lloyd Wright Barragán - Space and Shadow, Walls and Colour Danièle Pauly, 2008-06-06 In this monograph Danièle Pauly provides an overview of Barragán's life and his architectural oeuvre his Mexican roots the Mediterranean influences his Functionalist period
