Journal of the National Cancer Institute, 2003

Clinical Nutrition for Oncology Patients Mary

Marian, Susan Roberts, 2010-10-25 Clinical Nutrition for Oncology Patients provides clinicians who interact with cancer survivors the information they need to help patients make informed choices and improve long term outcomes This comprehensive resource outlines nutritional management recommendations for care prior to during and after treatment and addresses specific nutritional needs and complementary therapies that may be of help to a patient This book is written by a variety of clinicians who not only care for cancer survivors and their caregivers but are also experts in the field of nutritional oncology Important Notice The digital edition of this book is missing some of the images or content found in the physical edition

Contemporary Issues in Lung Cancer Marilyn Haas, 2010-10-25 In the United States lung cancer is the second

most commonly diagnosed cancer and the leading cause of cancer death Even more devastating is its five year survival rate of only 15.8% Despite these dismal facts lung cancer receives little national attention and research and funding for lung cancer lags behind other cancers The intent of Contemporary Issues in Lung Cancer A Nursing Perspective Second Edition is to provide oncology nurses and healthcare professionals with in depth information on the issues that surround this disease so that they might impact both education and research and provide better care for their patients

Evidence-Based Oncology

Christopher B. Williams, 2008-04-15 This is a book about using the best evidence to inform treatment decisions for people with cancer. It is written by oncologists for oncologists using examples throughout to illustrate key points. The book starts off with a toolbox section written in a way which will help those relatively new to the principles of evidence based oncology to understand the key issues and equip them with the basics of how to tell a good study from a bad one. The majority of the book then deals with an evidence based summary of the common and important cancers in a structured and easy to read format around common patient scenarios and frequently asked questions. Whilst most of the evidence is based on randomised controlled trials other studies are cited where appropriate eg when discussing adverse events. The unique accompanying book website will contain updates of new chapters and studies as they become available. Written by leading world figures in the evidence based movement. Includes free CD ROM with PC eBook and sample PDA chapter. Methodology of reviewing and appraising evidence discussed in the context of cancer management. Clinical sections covering prevention and screening. Chapters on treatment of the individual major cancers review the current best available evidence to most frequently asked questions. Rigorously structured explicit searches evidence of efficacy and harms plus comment around clinical scenarios. Free access update website keeping the text current and live www.evidbasedoncology.com Nunn's Applied Respiratory Physiology E-Book Andrew B. Lumb, 2012-09-25 Nunn's Applied Respiratory Physiology Seventh Edition covers all aspects of respiratory physiology in health, disease and altered conditions and environments from basic science to clinical applications. Includes functional anatomy, mechanics, control of breathing, ventilation, circulation, ventilation/perfusion matching, diffusion, carbon dioxide and oxygen and non respiratory functions of the lung. Discusses the effects of pregnancy, exercise, sleep, altitude, pressure, drowning, smoking, anaesthesia, hypocapnia, hypercarbia, hypoxia, hyperoxia and anaemia on respiratory physiology. Explores specific clinical disorders such as ventilatory failure, airways disease, pulmonary vascular disease, parenchymal lung disease and acute lung injury as well as the physiological basis of current therapies including artificial ventilation, extrapulmonary gas exchange and lung transplantation. Chapter on Parenchymal Lung Disease has been specifically expanded to include the physiology and pathology of the pleural space and lung cancer. Contains a new chapter on Pulmonary Surgery covering a wide range of surgical interventions from bronchoscopy to lung resection. Includes almost 500 new references to the literature. The result is an invaluable source for those preparing for examinations in anaesthesia and intensive care as well as an essential purchase for practitioners who want quick reference to current knowledge. Describes respiration in health and disease and in normal and abnormal situations to help readers manage all conditions they see in their practices. Examines the respiratory effects of exercise, sleep, smoking, anaesthesia, drowning, anaemia, pregnancy and other events as well as environmental factors such as altitude, flying high, pressure, closed environments and air pollution on respiration. Maintains the clarity of style and single author approach of previous editions through the close collaboration of Andrew Lumb and John Nunn. Makes difficult concepts easy to understand and apply with nearly 300 illustrations. A new

chapter on the History of Respiratory Physiology More coverage of pathophysiology and even more applications of respiratory physiology to clinical practice A more consistent organization a revised page design that aids readability and an art program featuring new and newly redrawn illustrations

Drug Resistance in Oncology S. Bernal,1997-08-21 This timely new reference integrates the latest clinical results and laboratory studies on the resistance of specific cancers to chemotherapeutic drugs covering drug resistance in lung breast ovary and colon cancer as well as hematological malignancies
