Lysimeters for Evapotranspiration and Environmental Measurements Rick G. Allen, 1991 Proceedings of the International Symposium on Lysimetry held in Honolulu Hawaii July 23 25 1991 This collection contains 49 papers on lysimeters instruments used extensively to provide baseline information for development calibration and validation of evapotranspiration methods Topics include the history and background of lysimetry the design and operation of various types of electronic mechanical and hydraulic weighing lysimeters drainage lysimeters lysimeters for environmental studies data acquisition systems environmental requirements necessary for accurate measurement of evapotranspiration and the development of evapotranspiration equations and cropping factors *Lysimeters for Evapotranspiration and Environmental Measurements*, 1991 History and development of lysimetry Lysimeter design construction and use I Transfer of lysimeter measurements to regional applications Lysimeter design construction and use II Challenges in lysimeter design operation and application I Development and calibration of evapotranspiration equations and methods measurement of evapotranspiration by native plants Challenges in lysimeter design operation and application II Water quality and environmental studies Poster session papers for lysimeter symposium **Laboratory and Field Testing of Unsaturated Soils** Alessandro Tarantino, Enrique Romero, Yu-Jin Cui, 2008-12-28 This volume details recent global advances in laboratory and field testing of unsaturated soils Coverage includes mechanical hydraulic and geo environmental testing and applications of unsaturated soil monitoring to engineering behavior of geo structures **Evaluating Evapotranspiration for Grasslands on the Arid Lands Ecology Reserve, Benton County, and Turnbull National Wildlife Refuge, Spokane, County, Washington, May 1990 to September 1991** Stewart A. Estimation of Evapotranspiration Rates in Irrigated Lands of the Fergana Valley using Stable Isotopes Gulomjon Umirzakov,2016-03-30 Agriculture in Uzbekistan critically depends on water resources availability therefore crop production especially of cotton and winter wheat is restricted mainly to irrigated areas As a result of water shortage under climate change land degradation issues in the region worsened and water use efficiency has considerably decreased over the decades Hence it is essential to investigate water balance parameters in irrigated lands Environmental isotopes have been widely applied in hydrological investigations particularly estimation of evapotranspiration rate one of the main components of the water balance in irrigated lands This study aims to estimate evapotranspiration rates in cotton fields by applying water stable isotopes $2H$ and $18O$ The study is based on the field experiments conducted during the vegetation periods 2010 and 2011 in the Fergana Region of Uzbekistan Soil for isotope analysis were sampled in a sandy field sandy loam 1 field rich with

gypsum and sandy loam 2 field without gypsum The soil water from the samples was extracted by the cryogenic extraction method $2H$ and $18O$ ratios of extracted water were determined using the laser spectroscopy method Evapotranspiration rates were estimated with the isotope mass balance model Besides evapotranspiration estimation this study examines the variability and characteristics of stable isotope signatures of different water sources in the study region and analyzes water extraction processes from different soil types and temporal changes of isotope signatures through the depth in irrigated cotton fields *Nuclear Techniques in Integrated Plant Nutrient, Water and Soil Management* ,2002 **Handbook of Engineering Hydrology (Three-Volume Set)** Saeid Eslamian,2018-10-03 While most books examine only the classical aspects of hydrology this three volume set covers multiple aspects of hydrology and includes contributions from experts from more than 30 countries It examines new approaches addresses growing concerns about hydrological and ecological connectivity and considers the worldwide impact of climate change
