Four different areas were defined and addressed at the workshop: namely a role model structure and construction of a UIMS, b dialogue specification tools, c interface of the UIMS to the application, d user's conceptual model. All participants prepared papers each in one of those problem areas. The papers have been rewritten in the light of the issues discussed during the workshop. Also a subgroup report was produced for each problem area summarizing the results of the discussions at the workshop.

Preface User Interface Management Systems UIMS are the mediators between the user and the application programs. As more and more interactive programs become widely available, methods and techniques of designing and implementing acceptable user interfaces have to be investigated. Since many years research on the design of user interface management systems is going on. This EUROGRAPHICS Workshop follows from the ACM SIGGRAPH Workshop on Graphical Input and Interaction Techniques of May 1982 in Seattle (see *Computer Graphics* 17:1 1983 and the IFIP WG 5).

TOSIYASU L KUNII Preface to the Second Edition. Computer graphics is growing very rapidly; only computer animation grows faster. The first edition of the book *Computer Animation: Theory and Practice* was released in 1985. Four years later, computer animation has exploded. Conferences on computer animation have appeared, and the topic is recognized in well-known journals as a leading theme. Computer-generated film festivals now exist in each country, and several thousands of films are produced each year. From a commercial point of view, the computer animation market has grown considerably. TV logos are computer-made, and more and more simulations use the technique of computer animation. What is the most fascinating is certainly the development of computer animation from a research point of view.
