extraordinary amateur mathematician When Marjorie Rice was a little girl in Roseburg Oregon in the 1930s she saw patterns everywhere Swimming in the river her body was a shape in the water the water a shape in the hills the hills a shape in the sky Some shapes fitted into a rectangle or floor tilings were so beautiful they made her long to be an artist Marjorie dreamed of studying art and geometry perhaps even solving the age old problem of five why pentagons don't fit together the way shapes with three four or six sides do But when college wasn't possible she pondered and explored all through secretarial school marriage and parenting five children until one day while reading her son's copy of Scientific American she learned that a subscriber had discovered a pentagon never seen before If a reader could do it couldn't she Marjorie studied all the known pentagons drew a little five sided house and kept pondering She'd done it And she'd go on to discover more pentagonal tilings and whole new classes of tessellations In this visually wondrous tribute Anna Brons intricate art teems with patterns including nods to M C Escher and radiates the thrill of one woman's discovery playfully inviting readers to approach geometry through art and art through geometry Back matter offers more on the story of five and suggestions on how to discover a shape
