Blanche Wiesen Cook author of The Declassified Eisenhower Eleanor Roosevelt vols I II III forthcoming **Military Recruiting in High Schools** Brian W. Lagotte, 2016-07-08 This book focuses exclusively on specific education policy instead of general military recruiting in high schools When the George W Bush administration passed its landmark education legislation in 2001 dubbed the No Child Left Behind Act legislators included a small section containing strict military recruiting mandates for public high schools The law had two main provisions First a data sharing provision requires high schools to distribute the personal directory information of every student to all local armed forces recruiting stations on an annual basis Second the equal access provision requires high schools to provide military recruiters access to school grounds equal to university recruiters or career recruiters For accountability if these provisions are not fulfilled the school will lose all federal education funds Students or parents may opt out of the data collection through a bureaucratic process but no such opt out option exists for the soldiers visiting schools When President Barack Obama renewed the omnibus education law in 2015 the name changed to the Every Student Succeeds Act but the military mandates remained the provisions were strengthened by including a passage prohibiting any local school board from instituting an opt in bureaucratic structure for parents and students This book focuses on how the two provisions have been met by parents school staff soldiers and other individuals influenced by high school education policy and military recruiting The central question is do military recruiting methods utilized in public high schools work to promote the best interests of the students or should policy makers rethink the freedom adult soldiers have when interacting with children within schools Children, Young People and Critical Geopolitics Matthew C. Benwell, Peter Hopkins, 2017-05-15 Young people and in particular children have typically been marginalised in geopolitical research positioned as too young to understand or relate to the adult dominated world of international relations Integrating current debates in critical geopolitics and political geography with research in children's geographies childhood studies and youth research this book sets out an agenda for the field of children's and young people's

critical geopolitics It considers diverse practices such as play activism media consumption and diplomacy to show how children s and young people s lives relate to wider regional and global geopolitical processes Engaging with contemporary concepts in human geography including ludic geopolitics affect emotional geographies intergenerationality creative diplomacy popular geopolitics and citizenship the authors draw on geopolitical research with children and young people from Europe Asia Australasia Africa and the Americas The chapters highlight the ways in which young people can be enrolled ignored dismissed empowered and represented by the state for geopolitical ends Notwithstanding this state power the research presented also shows how young people have agency and make decisions about their lives which are influenced by wider geopolitical processes The focus on the lives of children and young people problematises and extends what it is we think of when considering the geopolitical which enriches as well as advances critical geopolitical enquiry and deserves to be taken seriously by political geographies more broadly
