American Home Life, 1880-1930 Jessica H. Foy, 2024-07-31 In the pivotal decades around the turn of the century American domestic life underwent dramatic alteration From backstairs to front stairs spaces and the activities within them were radically affected by shifts in the larger social and material environments This volume while taking account of architecture and decoration moves us beyond the study of buildings to the study of behaviors particularly the behaviors of those who peopled the middle class single family detached American home between 1880 and 1930 The book s contributors study transformations in services such as home utilities of power heat light water and waste removal in servicing for example the impact of home

appliances such as gas and electric ranges washing machines and refrigerators and in serving changes in domestic servants duties hours of work racial and ethnic backgrounds In blending intellectual and home history these essays both examine and exemplify the perennial American enthusiasm for as well as anxiety about the meaning of modernity *The Preservationist's Guide to Technological Change and the American Home 1600-1900* Lee Perry,2000-08-11 Book Description This work is an exploration of American building technologies as they evolved during the period between colonial times and nineteen hundred The manuscript consists of six chapters and an historical glossary of building construction related terms The chapters cover technological developments in house framing masonry materials and techniques plumbing heating lighting and architectural details and finishes The glossary of terms follows the meanings of building terminology as it developed over the course of three centuries The intent of this work is to create a detailed if not utterly comprehensive body of information tracing the way in which our homes changed as they mirrored the impact of technological change on all aspects of the American condition We are and have been from the start a nation of ardent techno junkies The technological evolution of our homes offers a useful and clear metaphor through which to trace the evolution of our technological development and related national character through primary focus on the concrete and practical aspects of the technologies of residential architecture Author Bio Lee comes from a New England background and has both a lifetime of building experience with historic structures and a formal advanced education in the field of historic preservation For the past ten years he has worked as a project manager on a variety of high profile museum projects

American Home Cooking Tim Miller,2017-07-01 American Home Cooking provides an answer to the question of why in the face of all the modern technology we have for saving time Americans still spend time in their kitchens cooking Americans eat four to five meals per week in a restaurant and buy millions of dollars worth of convenience foods Cooking especially from scratch is clearly on its way out However if this is true why do we spend so much money on kitchen appliances both large and small Why are so many cooking shows and cookbooks published each year if so few people actually cook In American Home Cooking Timothy Miller argues that there are historical reasons behind the reality of American cooking There are some factors that over the past two hundred years have kept us close to our kitchens while there are other factors that have worked to push us away from our kitchens At one end of the cooking and eating continuum is preparing meals from scratch all ingredients are raw and unprocessed and in extreme cases grown at the home On the other end of the spectrum is dining out at a restaurant where no cooking is done but the family is still fed All dining experiences exist along this continuum and Miller considers how American dining has moved along the continuum He looks at a number of different groups and trends that have affected the state of the American kitchen stretching back to the early 1800s These include food

and appliance companies the restaurant industry the home economics movement of the early 20th century and reform movements such as the counterculture of the 1960s and the religious reform movements of the 1800s And yet the kitchen is still most often the center of the home and the place where most people expect to cook and eat even if they don't

Subcommittee on Housing and Community Opportunity, 1998 *Rough Writing* Aviva F. Taubenfeld, 2008-11-01 As the United States struggled to absorb a massive influx of ethnically diverse immigrants at the turn of the twentieth century the question of who and what an American is took on urgent intensity It seemed more critical than ever to establish a definition by which Americanness could be established transmitted maintained and judged Americans of all stripes sought to articulate and enforce their visions of the nation's past present and future central to these attempts was President Theodore Roosevelt Roosevelt fully recognized the narrative component of American identity and he called upon authors of diverse European backgrounds including Israel Zangwill Jacob Riis Elizabeth Stern and Finley Peter Dunne to promote the nation in popular written form With the swell and shift in immigration he realized that a more encompassing national literature was needed to express and guide the soul of the nation *Rough Writing* examines the surprising place and implications of the immigrant and of ethnic writing in Roosevelt's America and American literature
