The Narcissist Discard Michael Persico, 2023-03-29 If a majority of people were to be asked what a narcissist is most would not describe it correctly There are many different types of narcissism and many different degrees of this disorder Covert narcissism or a co narc is a type of narcissism that as the name implies is hidden or not seen And because of its stealthy traits it can be very dangerous and damaging to those who interact or become romantically involved with a person suffering with this disease It is a condition unfortunately that is misunderstood many times or not realized until it is too late and the number of people suffering from this are on the rise Many of the victims or receivers of the abuse do not even know they are being abused nor have any idea how to deal or protect themselves from this condition The feelings of uncertainty and confusion often will result in a victim or receiver of this abuse not only undergoing much pain and suffering but the victim will also often become a person they do not want to be In this book I will identify the different stages of covert narcissism what each stage means and why a discard is not only part of the plan from the beginning of the relationship but is inevitable I will name and explain different characteristics and actions of the co narc and when the co narc will apply these No matter what the victim did or said dealing with a co narc was a near impossible task and in no way was the discard the fault of the victim The victim is not alone nor uncommon There are many who have suffered from the hands of the co narc These victims now understand the pain and suffering and now speak and understand a unique language Now the victim can heal and most importantly identify avoiding further misery

Zimring,2017-03-15 Tracing the benefits and limitations of repurposing aluminum Besides being the right thing to do for Mother Earth recycling can also make money particularly when it comes to upcycling a zero waste practice where discarded materials are fashioned into goods of greater economic or cultural value In Upcycling Aluminum Carl A Zimring explores how the metal s abundance after World War II coupled with the significant economic and environmental costs of smelting it from bauxite ore led to the industrial production of valuable durable goods from salvaged aluminum Beginning in 1886 with the discovery of how to mass produce aluminum the book examines the essential part the metal played in early aviation and the world wars as well as the troubling expansion of aluminum as a material of mass disposal Recognizing that scrap aluminum was as good as virgin material and much more affordable than newly engineered metal designers in the postwar era used aluminum to manufacture highly prized artifacts Zimring takes us on a tour of post 1940s design examining the use of aluminum in cars trucks airplanes furniture and musical instruments from 1945 to 2015 By viewing upcycling through the lens of one material Zimring deepens our understanding of the history of recycling in industrial society He also provides a historical perspective on contemporary sustainable design practices Along the way he challenges common assumptions about upcycling s merits and adds a new dimension to recycling as a form of environmental absolution for the waste related sins of the modern world Raising fascinating questions of consumption environment and desire Upcycling Aluminum is for anyone interested in industrial and environmental history discard studies engineering product design music history or antiques **The OCD Workbook** Bruce Hyman,Bruce M. something negative within us also which keep us unhappy Happy living through positive and good thoughts is nothing more than that of living a normal life free from undue pressures problems and tensions If we want to live a good and happy life then we need to get rid of the negativity within us which makes us unhappy Negative approach always complicates the problems and increases unhappiness Most of us do the fatal mistake of looking outwards for happiness rather than looking inwards Be positive be strong be bold and be courageous you are sure to find the feeling of happiness within you Even if we are having a bad day think of some good things that may come our way either later that day tomorrow next week or next moment When everything seems to be beyond our control it s almost too easy for us to slip into the grasp of negativity and unhappiness To avoid sadness we must strive to abolish this sort of thinking through the power of thinking positively and generate the feeling of happiness within us The art of sweet living is not a complicated kind of art difficult to learn rather a simple art of happy living feeling well eating well and thinking well What we need to do is just to tune up our mind to enjoy every moment of life and let the sweet happiness follow us This is something that needs to be looked into thoroughly We need to focus on the positive aspects of lives rather than on the negative setbacks and enjoy every moment of life happily and merrily Enjoy your life with cheerful talks Be happy and cheerful We must remember that happy living is the reward of sweet and positive thinking We ought to remember only the positive thinking can bring happiness in our lives If we cannot think positively you cannot live happily Be our own teacher or adviser we ought to look everything with a positive angle Let us find something good even in most critical moments of our life and let us make positive thinking the basis of our happy living It s a matter of thought that fools worry about the circumstances on which they have no control The wise live on positive good and happy thoughts A sound and positive happiness is all around It s not far away from us If we do not want to live happy it s up to us It s our own choice We must not blame others nor should we blame our fate or external circumstances Another thing is that feeling confident affects the way we perceive our situations and how we decide to manage them Think that by being more optimistic we alter our approaches to situations and take on them in a healthier manner we think of alternatives and act according to better outcomes All our efforts lead us to good and happy living If we think we are positive and happy it will be positive It does not say to stick our heads in the soil rather it says to think positive Interestingly it does not say feel positive it says think positive and that is the real meaning to remain happy Positive thinking good and happy thoughts make us to live happily Happiness does not come alone it adds our minds body and soul to remain in constant touch with each other We have to remove negative thoughts and create an atmosphere to be happy in our lives There are many fear factors that are reasoning us to be unhappy and the main reason being that our heart and our feelings which are more susceptible to fear and worry than the mind We do the worrying in our minds but it is our emotions that make us more worried not our brains

Discard Studies Max Liboiron, Josh Lepawsky, 2022-05-24 An argument that social political and economic systems maintain power by discarding certain people places and things Discard studies is an emerging field that looks at waste and wasting broadly construed Rather than focusing on waste and trash as the primary objects of study discard studies looks at wider systems of waste and wasting to explore how some materials practices regions and people are valued or devalued becoming dominant or disposable In this book Max Liboiron and Josh Lepawsky argue that social political and economic systems maintain power by discarding certain people places and things They show how the theories and methods of discard studies can be applied in a variety of cases many of which do not involve waste trash or pollution Liboiron and Lepawsky consider the partiality of knowledge and offer a theory of scale exploring the myth that most waste is municipal solid waste produced by consumers discuss peripheries centers and power using content moderation as an example of how dominant systems find ways to discard and use theories of difference to show that universalism stereotypes and inclusion all have politics of discard and even purification as exemplified in inclusive efforts to broaden the Black Lives Matter movement Finally they develop a theory of change by considering wasting well outlining techniques methods and propositions for a justice oriented discard studies that keeps power in view

Discarded Lucas Humphrey, 2014-04-04 Discarded is a horror thriller novel set in modern day Sacramento CA From the night I came up with this story it was something I wanted to set apart from what has become the norm in the horror genre You know the gore fests with a shallow moral if any that could easily be forgotten I wanted to take horror to a level where it could be read and enjoyed on the surface but also have complex undertones for those who are intrigued to look deeper after The story involves a beautiful Asian woman who is plucked from life by a group of men and returns from the dead for revenge During her supernatural vendetta a decorated detective and a heart driven rookie sift their way into the case Along the way there are scares there is mystery and there is definitely blood
