Historical Dictionary of the Discovery and Exploration of the Northwest Coast of America Robin Inglis, 2008-04-02 The Northwest Coast of America ranging from northern California through Oregon Washington and British Columbia all the way up to Alaska was the last temperate coastline to be placed on the world map First visited by Russians in 1741 and thought to contain a navigable passage between the Pacific and the Atlantic it was systematically revealed during an intense period of exploratory and commercial activity from the 1770s to the 1790s Subsequently the imperial ambitions of Russia Spain and Britain and an assumption of manifest destiny by the United States led to further exploration and ensured that the region would become disputed territory before national boundaries were determined in the mid 19th century The Historical Dictionary of the Discovery and Exploration of the Northwest Coast of America tells of the heroic endeavors and remarkable achievements the endless speculation about a northwest passage and the fighting and manipulation for commercial advantage that surrounded this terrain This is done through an introductory essay a detailed chronology an extensive bibliography modern maps and selected historical maps and drawings and over 400 cross referenced dictionary entries Entries cover the native people encountered the scientists and artists who left an invaluable documentary and visual record of people places flora and fauna the numerous voyages taken by men such as Vitus Bering James Cook Juan Francisco de la Bodega y Quadra and George Vancouver overland expeditions like those of Alexander Mackenzie Simon Fraser Meriwether Lewis and William Clark and David Thompson and maritime fur traders including George Dixon Grigori Shelikhov Robert Gray and William Sturgis No other dictionary exists that is dedicated solely to the coverage of this region

Naturalists at Sea Glyn

Williams,2013-10-22 DIVDIVTales of the intrepid early naturalists who set sail on dangerous voyages of discovery in the vast unknown Pacific div div *At the Far Reaches of Empire* Freeman M. Tovell,2009-01-01 Capit n de Nav o Juan Francisco de la Bodega y Quadra was the most important Spanish naval officer on the Northwest Coast in the eighteenth century Serving from 1774 to 1794 he participated in the search for the Northwest Passage and with George Vancouver endeavoured to forge a diplomatic resolution to the Nootka Sound controversy between Spain and Britain Freeman Tovell s thorough and nuanced study presents this officer of Spain s Enlightened Navy as a key figure in the history of the region Intelligent observant and literate Bodega received high praise from the viceroys of New Spain under whom he served His enlightened policy toward the Nuuchahmuls and his close association with Chief Maquinna are a matter of record Bodega was not without his imperfections when his overarching ambition to make a name for himself exceeded his financial reach he incurred ruinous debts As a Peruvian creole he also struggled against the glass ceiling imposed by having been born outside Spain Despite constant efforts for promotions he never gained the full recognition from naval and political superiors that his achievements deserved Bodega s accomplishments place him in the company of Bering Cook Vancouver La Prouse and Malaspina those who advanced a better understanding of the geography ethnography and natural history of the area The most complete study of Bodega and his epoch yet written *At the Far Reaches of Empire* is an absorbing narrative of eighteenth century empire building

Explorers of the Maritime Pacific Northwest William L. Lang Ph.D.,James V. Walker,2016-05-09 Covering the adventures of coastal and ocean explorers who made key discoveries and landmark observations from northern California up the coastline to Alaska during the mid 1700s to the early 1800s this anthology of primary source journal entries book excerpts maps and drawings enables readers to discover the Northwest Coast for themselves More than 200 years ago explorers traveled from Central America Russia and even Europe to explore the coastline of the American Pacific Northwest with goals of developing new trade routes claiming territory for their home countries expanding their fur trade or exploring in the name of scientific discovery This book will take readers to the decks of the great ships and along for the adventures of legendary explorers such as James Cook Alejandro Malaspina and George Vancouver This book collects primary source materials such as journal entries book excerpts maps and drawings that document how explorers first experienced the unknown Pacific Northwest coast as seen through the eyes of non native people Readers will learn how explorers such as Vitus Bering and Robert Gray used the full extent of their powers of observation to record the landscape animals and plants they witnessed as well as their interactions with indigenous peoples during their search for the mythic Northwest Passage The book also explains how the maritime explorers of this period mapped the remote regions of the Northwest Coast working without the benefit of modern technology and relying instead on their knowledge of a range of sciences mathematics and seamanship in addition to their ability to endure harsh and dangerous conditions to produce exceptionally detailed maps

Alejandro Malaspina John Kendrick,1989-04-01 Malaspina arrived in Spain with a scientific background and an ardent

interest in the philosophy of the Enlightenment A skilled navigator the Pacific voyage on which he sailed in 1789 was the last and most important of his career a five year scientific and political examination of the Spanish colonies in the Americas and the Philippines He appraised the British colony at Sydney Cove and Tonga allowing him to compare life at a place almost untouched by European contact with the situation in the colonies Malaspina eventually returned to Spain where he was received by King Charles IV He was commissioned to produce a work covering all aspects of his studies that would establish Spain's reputation as a modern enlightened state Malaspina advised the King that this could be achieved only if he dismissed all of his ministers and replaced them with a slate of Malaspina's choosing who would back his visionary ideas This seemingly naive proposal resulted in a unanimous vote by the council that his plan was false seditious and injurious to the sovereignty of Their Majesties and he was sentenced to ten years imprisonment in the fortress of San Ant n At the urging of Napoleon he was released after eight years and exiled to Italy where he died in 1810 just as the revolts in the Americas were starting as he had predicted Using Malaspina's writings including the journal of his great voyage and his personal letters John Kendrick makes the life of this extraordinary man available for the first time in English *Islands of Truth* Daniel Clayton, 2011-11-01

In *Islands of Truth* Daniel Clayton examines a series of encounters with the Native peoples and territory of Vancouver Island in the late eighteenth and early nineteenth centuries Although he focuses on a particular region and period Clayton also meditates on how representations of land and people and studies of the past serve and shape specific interests and how the dawn of Native Western contact in this part of the world might be studied 200 years later in the light of ongoing struggles between Natives and non Natives over land and cultural status Between the 1770s and 1850s the Native people of Vancouver Island were engaged by three sets of forces that were of general importance in the history of Western overseas expansion the West's scientific exploration of the world in the Age of Enlightenment capitalist practices of exchange and the geopolitics of nation state rivalry *Islands of Truth* discusses these developments the geographies they worked through and the stories about land identity and empire stemming from this period that have shaped understanding of British Columbia's past and present Clayton questions premises underlying much of present B C historical writing arguing that international literature offers more fruitful ways of framing local historical experiences *Islands of Truth* is a timely provocative and vital contribution to post colonial studies

The Voyage of Alejandro Malaspina to the Pacific, 1789-1794 Andrew David, 2000 *From Maps to Metaphors* Robin Fisher, Hugh Johnston, 2011-11-01 During the summers of 1792-94 George Vancouver and the crew of the British naval ships *Discovery* and *Chatham* mapped the northwest coast of North America from Baja California to Alaska Vancouver's voyage was the last and longest of the great Pacific voyages of the late eighteenth century Taking the art and technique of distant voyaging to a new level Vancouver eliminated the possibility of a northwest passage and his remarkably precise surveys completed the outline of the Pacific But to map an area is to appropriate it to begin to bring it under control and Vancouver's charts of the northwest coast were part of a process of economic exploitation and cultural

disruption Although he and the other great navigators of his age exercised no control over the ideas and enterprises spawned by their voyages their names have come to symbolize the consequences of European expansion good or bad From Maps to Metaphors grew out of the Vancouver Conference on Exploration and Discovery held to observe the bicentennial of Vancouver's arrival on the Pacific northwest coast It brings to light much of the new research on the discovery of the Pacific and illuminates the European and Native experience The chapters are written from a variety of perspectives and provide new insights on many aspects of Vancouver's voyages from the technology employed to the complex political and power relationships among European explorers and the Native leadership While it is no longer possible to celebrate the arrival to the northwest coast of explorers such as Vancouver their achievements cannot be overlooked The charts log books journals and specimens from these voyages are important sources of information and essential for the reconstruction of an image of the Pacific region and its people in the eighteenth century Discovery of the Americas, 1492-1800 Facts On File, Incorporated, 2009 Describes the exploration of the Americas including the discoveries of Christopher Columbus Hern n Cort s Amerigo Vespucci Vasco N ez de Balboa Hernando de Soto and George Vancouver **Bibliotheca Americana Et Philippina** Maggs Bros, 1925 **Catalogue** Maggs Bros, 1925 *Bibliotheca Americana* Maggs Bros, 1928 Sessional Papers of the Dominion of Canada Canada. Parliament, 1915 Report of the Dominion fishery commission on the fisheries of the province of Ontario 1893 issued as vol 26 no 7 supplement Sessional Papers , 1918 Report of the Dominion fishery commission on the fisheries of the province of Ontario 1893 issued as vol 26 no 7 supplement **Report** Geographic Board of Canada, 1913 **Charting Northern Waters** Canadian Hydrographic Service, Canadian Nautical Research Society, 2004 Charting Northern Waters celebrates the achievements and history of the Canadian Hydrographic Service CHS and examines a wide range of topics relating to the origins of the CHS and to its subsequent development Topics include the colonial heritage of hydrography in Canadians waters the politics behind the creation of the service and the work of the agencies that were amalgamated with the Georgian Bay Survey to create the new national body *Rapport Annuel - Canada.
