**Property Rights** Terry L. Anderson, Laura E. Huggins, 2013-09-01 Drawing on the thoughts of various philosophers, political thinkers, economists, and lawyers, Terry Anderson and Laura Huggins present a blueprint for the nonexpert expert on how societies can encourage or discourage freedom and prosperity through their property rights institutions. This Hoover Classic edition of *Property Rights* details step by step what property rights are, what they do, how they evolve, how they can be protected, and how they promote freedom and prosperity.

**Melville's Philosophies** Branka Arsic, K. L. Evans, 2017-05-18 *Melville's Philosophies* departs from a long tradition of critical assessments of Melville that dismissed his philosophical capacities as ingenious but muddled. Its contributors do not apply philosophy to Melville in order to detect just how much of it he knew or understood. To the contrary, they try to hear the philosophical arguments themselves, often very strange and quite radical, that Melville never stopped articulating and reformulating. What emerges is a Melville who is materialistically oriented in a radical way, a Melville who thinks about life forms not just in the context of contemporary sciences but also ontologically. *Melville's Philosophies* recovers a Melville who is a thinker of great caliber, which means obliquely but dramatically reversing the way the critical tradition has characterized his ideas. Finally, as a result of the readings collected here, Melville emerges as a very relevant thinker for contemporary philosophical concerns such as the materialist turn, climate change, and post-humanism.

*Fishing a Highland Stream* John Inglis Hall, 1994-02 A classic that captures Hall's enthusiasm for angling and love of angling waters.

*Intention and Wrongdoing* Joshua Stuchlik, 2021-12-09 A comprehensive defense of the principle of double effect and the importance of intentions for normative ethics.

**Dominance and Monopolization** Rosa Greaves, 2017-05-15 Antitrust and competition law is a fast-moving area of law and the subject of extensive academic research. The aim of this volume is to select articles as tools for understanding how antitrust and competition law is applied to unilateral conduct which is harmful to the consumer and to the competitiveness of the market. The articles examine the meaning of dominance and monopolisation and show that although legal and economic rules have been developed to establish whether undertakings hold such strong market positions, it is often difficult to determine with certainty that the undertaking being investigated meets the threshold. The various debates on pricing and non-pricing conduct are also represented, as are the conflicts that have arisen regarding the exercise of intellectual property rights by powerful undertakings, particularly in the context of the new economies. The volume includes scholarly articles published on both sides of the Atlantic and enables a greater understanding of the application of antitrust and competition
