limits of our belief and ultimately compassion when it comes to disease These are the questions approached in this book which draws upon patients experiences and situates them among a diverse set of literatures from the history and philosophy of medicine to the sociology of health and disease The question of a patient s identity and their understanding of disease is often assumed to emerge from their relationship with healthcare but the case is made here that other inter personal factors are more salient What a patient with a contested illness comes up against is not simply a medical categorisation it is a prevailing notion of disease across society and one they struggle to assimilate themselves into Contested Illness in Context will appeal to students and researchers interested in fields such as the history and philosophy of medicine the sociology of health and illness medical anthropology or disease and illness generally It may also interest patients and doctors who struggle with difficult medical cases
