MALLORY'S ORACLE

Carol O'Connell

MALLORY'S ORACLE

"Sgt. Kathleen Mallory is one of the most original and intriguing detectives you'll ever meet. In fact, Mallory's Oracle is stocked with characters who are richly unforgettable, even by New York standards. This novel is wild, sly and breathless—all the things that a good thriller ought to be."

—Carl Hiaasen

Every once in a rare while, a suspense writer appears whose work is so strikingly original it transcends the genre. Such is the case with Carol O'Connell and Mallory's Oracle, a book that has already created worldwide excitement.

At the center of the story is Kathleen Mallory, an extraordinary wild child turned New York City policewoman. Adopted off the streets as a little girl and still not altogether civilized now that she is grown, Mallory operates by her own inner compass of right and wrong. She is a thing apart. And when her adoptive father is murdered, she is a thing possessed.

Filled with deep, seductive atmosphere and grace that cuts like a knife, Mallory's Oracle is gripping, momentous suspense of jaw-dropping complexity—a truly stunning debut.

Carol O'Connell lives in New York City.

Digital Watermarking Ton Kalker, Yong M. Ro, Ingemar J. Cox, 2004-02-12 We are happy to present to you the proceedings of the 2nd International Workshop on Digital Watermarking IWDW 2003 Since its modern re appearance in the academic community in the early 1990s great progress has been made in understanding both the capabilities and the weaknesses of digital watermarking On the theoretical side we all are now well aware of the fact that digital waterma ing is best viewed as a form of communication using side information In the case of digital watermarking the side information in question is the document to be wat marked This insight has led to a better understanding of the limits of the capacity and robustness of digital watermarking algorithms It has also led to new and improved watermarking algorithms both in terms of capacity and imperceptibility Similarly the role of human perception and models thereof has been greatly enhanced in the study and design of digital watermarking algorithms and systems On the practical side applications of watermarking are not yet abundant The original euphoria on the role of digital watermarking in copy protection and copyright prot tion has not resulted in widespread usage in practical systems With hindsight a n ber of reasons can be given for this lack of practical applications

Paterson, 2003-11-19 The ninth in the series of IMA Conferences on Cryptography and Coding was held as ever at the Royal Agricultural College Cirencester from 16-18 December 2003. The conference's varied programme of 4 invited and 25 contributed papers is represented in this volume. The contributed papers were selected from the 49 submissions using a refereeing process. The contributed and invited papers are grouped into 5 topics: coding and applications, applications of coding in cryptography, cryptography, cryptanalysis and network security and protocols. These topic headings represent the breadth of activity in the areas of coding, cryptography and communications and the rich interplay between these areas. Assembling the conference programme and these proceedings required the help of many individuals. I would like to record my appreciation of them here. Firstly I would like to thank the programme committee who aided me immensely by evaluating the submissions, providing detailed written feedback for the authors of many of the papers and advising me at many critical points during the process. Their help and cooperation was essential, especially in view of the short amount of time available to conduct the reviewing task. The committee this year consisted of Mike Darnell, Mick Ganley, Bahram Honary, Chris Mitchell, Matthew Parker, Nigel Smart and Mike Walker. **Proceedings**, 2000 *Privacy Enhancing Technologies* George Danezis, 2006-12-14 This book constitutes the thoroughly refereed post-proceedings of the 6th International Workshop on Privacy Enhancing Technologies PET 2006 held in Cambridge UK in June 2006, co-located with WEIS 2006 the Workshop on the Economics of Information Security and WOTE 2006 the IAVoSS Workshop On Trustworthy Elections.
