George A. Feldhamer, Bruce C. Thompson, Joseph A. Chapman, 2003-11-19 Table of contents **Asian Marine Biology** Brian Morton, W. F. Perrin, 1997-12-01 Asian Marine Biology 14 the most recent volume is a memorial volume for the late James Stephen Leatherwood with Guest Editors Brian D Smith and William F Perriu There are ten papers on Marine mammal survey techniques and various studies of dolphins Incidental catch of vulnerable species in Mediterranean and Black Sea fisheries – A review Carpentieri, P., Nastasi, A., Sessa, M., Srour, A. (eds.), 2021-06-28 Bycatch a term widely used to refer to part of the catch unintentionally caught during a fishing operation in addition to target species and consisting of the discards and incidental catch of vulnerable species is considered one of the most important threats to the profitability and sustainability of fisheries as well as to the conservation of the marine environment and ecosystems Understanding the bycatch issue and adopting effective measures in order to reduce bycatch rates are essential steps towards minimizing the impacts on vulnerable species and ensuring both a sustainable fisheries sector and healthy seas In the Mediterranean and the Black Sea the incidental catch of vulnerable species namely seabirds sea turtles elasmobranchs marine mammals and macrobenthic invertebrates represents one of several challenges for the industrial semi industrial and small scale fisheries that coexist in the region as well as for the diverse and sensitive ecosystems impacted Typically data on this issue have been collected in an opportunistic manner and in ways that make comparisons difficult The annual absolute values of incidental catch of vulnerable species are not available studies cover only a small portion of the total fishing activity and often present important knowledge gaps for many types of fishing gear countries and or subregions as well as on temporal scales for example to establish reliable baselines The result is that little is known of the scope of the problem despite incidental catch being a significant pressure on the populations of vulnerable species as well as a concern for fishers This regional review is an attempt to compile in one single document all available data and historical records on the incidental catch of vulnerable species in the Mediterranean and Black Sea fisheries obtained from existing literature databases and other grey sources and collated in a standardized and comparable way The main objective is to provide comprehensive baseline information earmark the main data gaps as well as identify the most impacting types of fishing gear by taxonomic group This work is a reminder of the importance of standardized data collection and the need to have baseline information in order to support decision making in the identification of appropriate bycatch mitigation techniques thus enabling analysis of their effectiveness and comparison over time and space as well as facilitating the implementation of relevant conservation and or management measures at the national subregional and regional levels **NOAA Technical Report NMFS SSRF. ,1984** **World Atlas of Seagrasses** Frederick T. Short, 2003 Seagrasses are a vital and widespread but often overlooked coastal marine habitat This volume provides a global survey of their distribution and conservation status **Ecology of the Southern California Bight** Murray D. Dailey, 2023-11-15 Here is a benchmark study of one significant stretch of the Pacific Ocean the Southern California Bight Extending from Point Conception to the Mexican border and out to the 200 mile limit these waters have

never before been investigated in such detail from so many points of view by such an eminent group of scientists The twenty five expert contributors summarize everything known about the physical chemical geological and biological characteristics of the area in individual chapters the volume concludes with a synthesis of the information presented In addition chapters are devoted to the influence of humans on the marine environment and to the various laws and governmental agencies concerned with protecting it Because Southern California is so heavily populated and because the ocean is a major recreational area for its people the information in this unique volume will be invaluable for the region s planners and decisionmakers as well as for all those who study the globe s marine resources and ecology Here is a benchmark study of one significant stretch of the Pacific Ocean the Southern California Bight Extending from Point Conception to the Mexican border and out to the 200 mile limit these waters have never before been investigated in such detail

Current Mammalogy H.H. Genoways,2013-06-29 When I first proposed a series entitled Current Mammalogy to the publishers they were reluctant to undertake such a project because they viewed the field of mammalogy as overly fragmented At first I found this idea to be difficult to accept however upon reflection I came near to agreeing with it Although many of us work on mammals we generally feel more allegiance to our specialties such as systematics genetics cytogenetics ecology behavior pest control paleontology wildlife management primatology and marine mammalogy than we do to the general field of mammalogy However rather than becoming discouraged from pursuing this project I became more certain than ever that a series such as Current Mammalogy was needed We hope to make this series a place where specialists can present their ideas not only to other members of their specialty but to those outside the area as well Hopefully this exchange of ideas will be a mutually beneficial exercise The Editorial Board of Current Mammalogy has decided to keep the range of subjects in each volume as broad as possible rather than concentrating on one or two topics in the hope that this will keep the series as useful as possible to the broadest range of readers
