readers      **Felines of the World** Giovanni G. Bellani, 2019-09-19 *Felines of the World Discoveries in Taxonomic Classification and History* provides the most recent taxonomic paleontological phylogenetic and DNA advances of wild felid and domestic cat species following guidelines dictated by the IUCN SSC Cat Specialist Group. It highlights the importance of felines and their role as predators in maintaining the ecological biome balance in which they have evolved. The book delves into the anatomical evolutionary and zoogeographic features of fossil and current felid species. Each species is described in detail detailing its classification, habitat, and biological habits. This book also presents the most updated threat and conservation status of each species. This book is an ideal resource for zoologists and paleontologists, primarily those interested in the evolution and features of extinct and extant felines. Details the lineage, features, and habits of over 40 felid species. Covers all species within the Felidae family, including lions, lynxes, pumas, and domestic cats. Features detailed and colorful illustrations, diagrams, and species location maps. Informs readers on endangered species, current threats, and conservation efforts.

*Mammal Species of the World* Don E. Wilson, DeeAnn M. Reeder, 2005. This indispensable reference work belongs in public and academic libraries throughout the world and on the shelf of every biologist who works with mammals.

*Wild Cats of the World* Luke Hunter, 2015-10-22. *Wild Cats of the World* provides detailed accounts for all 38 species of wild cat, accompanied by magnificent artwork and stunning photography. From the rabbit-sized Black-footed Cat of southern Africa to bear-killing Amur tigers of the Russian Far East, the 38 members of the Cat Family include some of the world's most fascinating and magnificent species on earth. Supremely adapted for the kill, all cats are obligate carnivores; they survive only by preying upon other animals, and they have become one of evolution's most successful predatory lineages of mammals. *Wild Cats of the World* explores the spectacular Cat Family in unprecedented depth. Drawing on thousands of scientific papers and direct observations in the field, each species is profiled at length, covering all aspects of felid behaviour and ecology. The book is profusely illustrated with colour plates, black and white sketches showing important aspects of cat life, and accurate images of every species' skull. Over 400 spectacular photographs are included, many of them showing extremely rare and little-known cats published here for the first time. Each profile includes an up-to-date range map and explains the most current science on how cats are classified and related to each other, including some very recent surprising discoveries. Despite their great evolutionary success, the challenges facing felids in the modern world are profound. Only one, the ubiquitous domestic cat, does not require dedicated conservation action to ensure survival for the next century. The book also explores the current conservation issues facing wild cats, the increasingly perilous status of many species, and how they can be saved.

*Meet the Cat Family!* B. J. Deming, 2020-03-10. Africa is famous for its big game and big cats. But if it didn't also have small cats, this great continent would soon be awash in rodents and other small animals. African wildcats are widespread and were domesticated thousands of years ago to become house cats. As part of an international lineage, they are described in another book in this series. But what about that spotted cat with the super long legs? And the one with crazy ears?

In this book meet those two remarkable members of the cat family serval and caracal respectively along with three other uniquely African cats Each chapter contains statistics pictures Red List status and information about the cat s lifestyle and wild prey There are also links to conservation sites online for you to learn even more as well as an extensive reference section in the back of the book Buy this book today and spend hours relaxing with Africa s OTHER cats      **The Biology and Conservation of Wild Felids** David Whyte Macdonald, Andrew J.
