Library Systems Branch,1974 **Beautiful China: 70 Years Since 1949 and 70 People's Views on Eco-civilization Construction** Jiahua Pan,Shiji Gao,Qingrui Li,Jinnan Wang,Dekai Wu,Chengliang Huang,2021-03-01 This book discusses and studies the basic course of ecological civilization construction in the 70 years since the founding of the People s Republic of China and summarizes the experience and lessons It contains 75 articles from 75 top experts and government officials in the field of ecological civilization policy making and basic theory research in China including Xi Jinping Thought on Ecological Civilization ecological culture green industry economy environmental quality legal system ecological security and so on so as to provide reference for understanding and studying the progress of ecological environment protection since the founding of China Marx and the Earth John Bellamy Foster,Paul Burkett,2016-01-12 A decade and a half ago John Bellamy Foster and Paul Burkett introduced a new revolutionary understanding of the ecological foundations of Marx s thought demonstrating that Marx s concepts of the universal metabolism of nature social metabolism and metabolic rift prefigured much of modern systems ecology Ecological relations were shown to be central to Marx s critique of capitalism including his value analysis Now in *Marx and the Earth* Foster and Burkett expand on this analysis in the process of responding to recent ecosocialist criticisms of Marx The result is a full fledged anti critique pointing to the crucial roles that dialectics open system thermodynamics intrinsic value and aesthetic understandings played in the original Marxian critique holding out the possibility of a new red green synthesis U.S. Environmental Protection Agency Library System Book Catalog United States. Environmental Protection Agency. Library Systems Branch,1975 **The Bloomsbury Handbook of Religion and Nature** Laura Hobgood,Whitney A. Bauman,2018-05-17 Divided into four parts Earth Air Fire and Water this book takes an elemental approach to the study of religion and ecology It reflects recent theoretical and methodological developments in this field which seek to understand the ways that ideas and matter minds and bodies exist together within an immanent frame of reference The Bloomsbury Handbook of Religion and Nature focuses on how these matters materialize in the world around us thereby addressing key topics in this area of study The editors provide an

extensive introduction to the book as well as useful introductions to each of its parts The volume s international contributors are drawn from the USA South Africa Netherlands Norway Indonesia and South Korea and offer a variety of perspectives voices cultural settings and geographical locales This handbook shows that human concern and engagement with material existence is present in all sectors of the global community regardless of religious tradition It challenges the traditional methodological approach of comparative religion and argues that globalization renders a comparative religious approach to the environment insufficient

Religion and Ecological Crisis Todd LeVasseur, Anna Peterson, 2016-07-01 In 1967 Lynn White Jr s seminal article *The Historical Roots of Our Ecologic Crisis* was published essentially establishing the academic study of religion and nature White argues that religions particularly Western Christianity are a major cause of worldwide ecological crises He then asserts that if we are to halt let alone revert anthropogenic damages to the environment we need to radically transform religious cosmologies White s hugely influential thesis has been cited thousands of times in a variety of disciplines including but not limited to religious studies environmental ethics history ecological science philosophy psychology and anthropology In practical terms the ecological crisis to which White was responding has only worsened in the decades since the article was published This collection of original essays by leading scholars in a variety of interdisciplinary settings including religion and nature environmental ethics animal studies ecofeminism restoration ecology and ecotheology considers the impact of White s arguments offering constructive criticism as well as reflections on the ongoing ever changing scholarly debate about the way religion and culture contribute to both environmental crises and to their possible solutions *Religion and Ecological Crisis* addresses a wide range of topics related to White s thesis including its significance for environmental ethics and philosophy the response from conservative Christians and evangelicals its importance for Asian religious traditions ecofeminist interpretations of the article and which perspectives might have ultimately been left out of his analysis This book is a timely reflection on the legacy and continuing challenge of White s influential article

A New Stage of Civilization Shixiong Cao, 2025-08-11 Cao interprets the culture politics economics and the environmental problems that society faces from the perspective of a scholar exploring potential solutions to the current global political dilemmas and providing intellectual support for a smooth transition of society to the next stage of civilisation

The Ecological Crisis and the Logic of Capital Xueming Chen, 2017-09-11 The worsening environmental crisis has become a serious threat to mankind The search for a solution to this crisis must begin by understanding its causes Taking an eco socialist perspective *The Ecological Crisis and the Logic of Capital* explores the logic of capitalism as a fundamental cause of today s environmental crisis in particular the thirst for profit and the capitalist mode of production By demonstrating the inherent antagonism between capital and ecology this book argues that proposals to resolve the crisis within the capitalist system are utopian that proposed remedies relying on scientific progress alternative energies low carbon technologies or the introduction of ecological ethics and new attitudes toward Nature into market mechanisms are doomed to failure without a

radical overhaul of the principles that govern capitalism *Environmental Policy, Governance and Politics* Prakash Chand Kandpal, 2024-07-26 This book traces the development environment discourse in India and examines the multi layered interaction between society and nature in the light of the role of the state judiciary and the civil society Through an array of perspectives the volume challenges the conventional approach to understanding the environmental politics in South Asia without considering the role of the civil society and other informal actors which has radically altered the conventional articulation of the phenomenon The volume underlines distinct structural characteristics of developmental politics in India and the social concerns and challenges which come in the way of environmental policy and governance in India It is a meaningful intervention in unearthing significant socio political and economic processes which are critical to the environmental governance in India The book will not only be helpful in studying the state of policy administration and politics of environmental discourse in India but also guide the policymakers to explore the sustainable ways of environmental governance in South Asia Insightful and lucid this book will be useful to the students researchers and faculty working in the field of political science public administration public policy political sociology political economy and governance studies It will also be an invaluable and interesting reading for those interested in South Asian studies **Green History** Derek Wall, 2003-09-02 Green History traces the development of ecological writing through history and forms a broad critical review of green ideas and movements reinforcing the importance of environmental concern and action in our own time Animal rights ecology as science feminism green fascism socialism anarchism land reform peaceful protest industrialization ancient ecology evolution grassroots activism philosophical holism recycling Taoism demographics utopias sustainability spiritualism all these issues and many more are discussed Authors include Alice Walker on massacre in the City of Brotherly Love Aldous Huxley on progress Lewis Mumford on the organic outlook Engels on natural dialectics Thoreau on the frontier life the Shelleys on vegetarianism and playing God Bacon on the New Atlantis Hildegard of Bingen on green vigour the unknown writer of the Bodhisattva and the Hungry Tigress and Plato on soil erosion Each article is set within its historical and thematic context A full introduction and a guide to further reading are also provided **Environmental Virtue Ethics** Philip Cafaro, Ronald Sandler, 2005-02-04 There is one certainty regarding the human relationship with nature there is no getting away from it But while a relationship with nature is a given the nature of that relationship is not Environmental ethics is the attempt to determine how we ought and ought not relate to the natural environment A complete environmental ethic requires both an ethic of action and an ethic of character Environmental virtue ethics is the area of environmental ethics concerned with character It has been an underappreciated and underdeveloped aspect of environmental ethics until now The selections in this collection consisting of ten original and four reprinted essays by leading scholars in the field discuss the role that virtue and character have traditionally played in environmental discourse and reflect upon the role that it should play in the future The selections also discuss the substantive content of the environmental virtues and vices and apply them to

concrete environmental issues and problems This collection establishes the indispensability of environmental virtue ethics to environmental ethics It also enhances the breadth and quality of the ongoing discussion of environmental virtue and vice and the role they should play in an adequate environmental ethic

Ecology and Control of the Natural Environment Yu.A. Izrael, 2012-12-06 In recent decades it has become increasingly urgent to protect human health and wellbeing from the possible negative consequences of man's economic activities both at the actual production sites and in areas where the impact is felt These negative effects have gradually become more and more widespread presenting a major hazard to the natural environment taking on an international character and assuming global proportions For the countries of Europe and North America transport of pollutants and acid rain across boundaries is a serious problem After the Chernobyl reactor accident regular measurements of radioactive isotopes became imperative It is obvious that drastic measures including steps taken on an international level are required to limit the negative anthropogenic impact on the environment Under the conditions of this growing man caused impact on nature the existing ecological reserves of the biosphere should be husbanded especially carefully We must determine the regimes of rational utilization of these reserves and of judicious management of the natural environment thereby maintaining a high quality of the biosphere and preserving nature's regenerative capacity Reliable methods should be developed to keep the environment from being overloaded and to safeguard the elements of the biosphere from injury Given such a situation it is of particular importance to have objective information about the critical factors of the human impact and the actual state of the biosphere as well as to obtain forecasts of its future state

Nature Peter Coates, 2013-04-25 Nature is a deceptively simple and ahistorical term suggesting intrinsic unchanging reality Yet nature has a history too both in terms of human attitudes and human impacts Coates outlines the major understandings of nature in the western world since classical times from nature as higher authority to its more recent meaning of threatened physical space and life forms Unlike many others this book places the history of attitudes to nature within the story of human induced changes in the material environment And few others take a supranational perspective or cross the divides between historical eras A distinctive unifying theme is Coates's interest in how green writers over the last thirty years have interpreted our past dealings with nature specifically their efforts to diagnose the roots of contemporary ecological problems and their search for ancestors He concludes with a discussion of the future of nature in the context of developments such as the new ecology global warming advances in genetic engineering and research on animal behaviour Assuming no previous knowledge Nature provides the reader with an accessible synthesis and introduction to some of environmental history's central features and debates confirming its status as one of the most enthralling current pursuits within historical studies This will be essential reading for second year undergraduates and above in cultural history and environmental history as well as to the general reader interested in environmental issues

Culture, Development and Social Theory John Clammer, 2013-10-10 This important book places culture back at the centre of debates in

development studies It introduces new ways of conceptualizing culture in relation to development by linking development studies to cultural studies studies of social movements religion and the notion of social suffering The author expertly argues that in the current world crises it is necessary to recover a more holistic vision of development that creates a vocabulary linking more technical and predominantly economic aspects of development with more humanistic and ecological goals Any conception of post capitalist society he argues requires cultural as well as economic and political dimensions Subject

Catalog Library of Congress,1982 *The Ecological Era and Classical Chinese Naturalism* Shuyuan Lu,2016-11-25

Reflecting the currently growing eco movement this book presents to western readers Tao Yuanming an ancient Chinese poet as a representative of classical oriental natural philosophy who offered lived experience of dwelling poetically on earth Drawing on Derrida s specter theory it interprets Tao Yuanming in a postmodern and eco critical context while also exploring his naturalist kindred spirits in other countries so as to urge the people of today to contemplate their own existence and pursuits The book s panoramic table of contents offers readers a wonderful reading experience **Regarding Nature**

Andrew McLaughlin,1993-01-01 McLaughlin philosophy City U of New York argues that industrialism is the cause of our current environmental crisis and that the solution requires a fundamental change in how we understand nature and humanity He reviews the capitalist socialist industrial and scientific views of nature the ideology of control anthropocentrism and other topics Paper edition unseen 16 95 Annotation copyright by Book News Inc Portland OR
