*Folk Housing in Middle Virginia* Henry Glassie,1975 In this fascinating analysis of eighteenth century vernacular houses of Middle Virginia Henry Glassie presents a revolutionary and carefully constructed methodology for looking at houses and interpreting from them the people who built and used them

Glassie believes that all relevant historical evidence unwritten as well as written must be taken into account before historical truth can be found. He is convinced that any study of man's past must make use of nonverbal and verbal evidence since written history, the story of man as recorded by the intellectual elite, does not tell us much about the everyday life, thoughts, and fears of the ordinary people of the past. Such people have always been in the majority, however, and a way has to be found to include them in any valid history. In *Folk Housing in Middle Virginia*, Glassie admirably sets forth such a way. The people who lived in Middle Virginia in the eighteenth century are almost unknown to history because so little has been written about them. After Glassie selected the area roughly Goochland and Louisa counties for study, he selected a representative part of the countryside, recorded all the older houses there, developed a transformational grammar of traditional house designs, and examined the area's architectural stability and change. Comparing the houses with written accounts of the period, he found that the houses became more formal and less related to their environment at the same time as the area's established political, economic, and religious institutions were disintegrating. It is as though the builders of the houses were deliberately trying to impose order on the surrounding chaotic world. Previous orthodox historical interpretations of the period have failed to note this. Glassie has provided new insights into the intellectual and social currents of the period and at that time has rescued a heretofore little-known people from historiographical oblivion. Combining a fresh perceptive approach with a broad interdisciplinary body of knowledge, he has made an invaluable breakthrough in showing the way to understand the people of history who have left their material things as their only legacy.

Henry Glassie is College Professor of Folklore at Indiana University. He is the author of *Pattern in the Material Folk Culture of the Eastern United States*, *Passing the Time in Ballymenone*, *Irish Folktales*, and *The Spirit of Folk Art*. He has served as president of the Vernacular Architecture Forum and the American Folklore Society.

Modern Geography Gary S. Dunbar, 2016-02-05 This book charts the developments in the discipline of geography from the 1950s to the 1980s, examining how geography now connects with urban, regional, and national planning and impacts on areas such as medicine, transport, agricultural development, and electoral reform. The book also discusses how technical and theoretical advancements have generated a renewed sense of philosophic reflection, a concern closely linked with the critical examination and development of social theory.

**Isle of the Saints** Lisa M. Bitel, 2019-06-30 *Isle of the Saints* recreates the harsh yet richly spiritual world of medieval Irish monks on the Christian frontier of barbarian Europe. Lisa Bitel draws on accounts of saints' lives written between 800 and 1200 to explain, from the monks' own perspective, the social networks that bound them to one another and to their secular neighbors.

A New History of Ireland, Volume II Theodore William Moody, Art Cosgrove, Francis X. Martin, Francis John Byrne, 2008-11-06 A wide range of national and international scholars in every field of study have produced studies of the archaeology, art, culture, geography, geology, history, language, law, literature, music, and related topics to produce a comprehensive and authoritative account of Irish history.

Cattle Lords and Clansmen Nerys T. Patterson, 1994-04-30 In *Cattle Lords and Clansmen*, Nerys Patterson

provides an analysis of the social structure of medieval Ireland focusing on the pre Norman period By combining difficult often fragmentary primary sources with sociological and anthropological methods Patterson produces a unique approach to the study of early Ireland one that challenges previous scholarship The second edition includes a chapter on seasonal rhythm material derived from Patterson s post 1991 publications and an updated bibliography *Deserted Villages Revisited* Christopher Dyer,Richard Jones,2010 Assembling leading experts on the subject this account explores the circumstances surrounding the disappearance of thousands of villages and smaller settlements in England and Wales between 1340 and 1750 By revisiting the deserted villages this breakthrough study addresses questions that have plagued archaeologists geographers and historians since the 1940s including why they were deserted why some villages survived while others were abandoned and who was responsible for their desertion offering a series of exciting insights into the fate of these fascinating sites Cattle in Ancient and Modern Ireland Fergus Kelly,James H. McAdam,Michael O'Connell,2016-04-26 Cattle have been the mainstay of Irish farming since the Neolithic began in Ireland almost 6000 years ago Cattle and especially cows have been important in the life experiences of most Irish people directly and or through legends such as the T in B Cuailnge The Cattle raid of Cooley In this book diverse aspects of cattle in Ireland from the circumstances of their first introduction to recent and ongoing developments in the management of grasslands still the main food source for cattle in Ireland are explored in thirteen essays written by experts New information is presented and several aspects relating to cattle husbandry and the interactions of cattle and people that have hitherto received little or no attention are discussed **The Carolina Backcountry Venture** Kenneth E. Lewis,2017-04-15 A study of the transformative economic and social processes that changed a backcountry Southern outpost into a vital crossroads The Carolina Backcountry Venture is a historical geographical and archaeological investigation of the development of Camden South Carolina and the Wateree River Valley during the second half of the eighteenth century The result of extensive field and archival work by author Kenneth E Lewis this publication examines the economic and social processes responsible for change and documents the importance of those individuals who played significant roles in determining the success of colonization and the form it took Established to serve the frontier settlements the store at Pine Tree Hill soon became an important crossroads in the economy of South Carolina s central backcountry and a focus of trade that linked colonists with one another and the region s native inhabitants Renamed Camden in 1768 the town grew as the backcountry became enmeshed in the larger commercial economy As pioneer merchants took advantage of improvements in agriculture and transportation and responded to larger global events such as the American Revolution Camden evolved with the introduction of short staple cotton which came to dominate its economy as slavery did its society Camden s development as a small inland city made it an icon for progress and entrepreneurship Camden was the focus of expansion in the Wateree Valley and its early residents were instrumental in creating the backcountry economy In the absence of effective larger economic and political institutions Joseph Kershaw and his associates

created a regional economy by forging networks that linked the immigrant population and incorporated the native Catawba people. Their efforts formed the structure of a colonial society and economy in the interior and facilitated the backcountry's incorporation into the commercial Atlantic world. This transition laid the groundwork for the antebellum plantation economy. Lewis references an array of primary and secondary sources as well as archaeological evidence from four decades of research in Camden and surrounding locations. *The Carolina Backcountry Venture* examines the broad processes involved in settling the area and explores the relationship between the region's historical development and the landscape it created.
